Evaluation Research (social Action Programs) Mary A. Vance,1987 **Stakeholders** Ian Smillie,Henny Helmich,Judith Randel,Tony German,2013-11-05 This unique study from the OECD Development Centre presents a comprehensive review by independent experts of the relationships and division of responsibility between the 22 member governments of the OECD Development Assistance Committee DAC and NGOs from these donor countries working in international development Additional chapters cover the roles of the European Union and the World Bank Among other themes the book looks at two very significant issues First at the way in which an overemphasis on evaluation may be leading NGOs to focus purely on measuring their output thus choosing activities which are easily accountable Second it examines the important impacts of the evolution in the funding relationship between governments and NGOs from matching grants to contracts where NGOs must increasingly compete for contracts

Resources in Education,1998 **Library of Congress Catalogs** Library of Congress,1983 **Private Sector Development in an Emerging World** Diederik Boer,Harald Sander,Katharina Friz,Antonella Anastasi,2023-12-04 This book explores the interactions between private sector development public policies and societal institutions with a strong view on contributing to sustainable and inclusive development in emerging countries The private sector is often praised as an engine of economic growth This belief has led to significant efforts to promote private sector development in emerging countries Development agencies prioritize private sector development and national governments are following suit resulting in often huge incentives to stimulate and attract private investment However private sector development is not a panacea for sustainable and inclusive development as the past decades have clearly shown Economic growth societal development and environmental sustainability are often in a sharp conflict and more often than not economic growth has failed to improve the lives of all citizens This book examines the role the state and the private sector should play to benefit from the dynamics of business development while ensuring that these benefits are shared broadly without jeopardizing sustainability The views presented differ in detail but the analyses and case studies presented share common themes namely that the relative roles of state and private sector of

should be balanced and that this particular balance should be based on the context of each country in order to make the private public sector interaction work for all people **AGRIBUSINESS PROJECT APPRAISAL** J. P. Hella, 2017-01-16

A Clash of Paradigms Suan Maiava, 2020-07-24 This title was first published in 2001 This study indicates that researchers have far to go in understanding and assessing how development projects work The author shows that often the perception of failure is not shared by those whom were intended to benefit She uses a case study of Samoan villagers introduced to cattle farming to examine the wider development process and challenge the conventional theories By drawing on people centred perspectives that give much greater weight to the role of culture in development the volume does not simply criticize development project management but suggests practical and positive ways forward encouraging spontaneous indigenous development which should be supported by projects where appropriate
