Events Their Names

John D. Caputo

Events Their Names:

Events and Their Names Jonathan Bennett, 1988 This is a study of events and their place in our language and thought The author discusses what kind of item an event is how the language of events works and how these two themes are interrelated He argues that most of the supposedly metaphysical literature on events is really about semantics of their names and that the true metaphysic of events known by Leibniz and rediscovered by Jaegwon Kim has not been universally accepted because it has been obscured by a false semantic theory

Managing Sport Events T. Christopher Greenwell, Leigh Ann Danzey-Bussell, David Shonk, 2014 Managing Sport Events presents the principles and practices of effective event management taking readers through the entire process from event conception through postevent evaluation

The Insistence of God John D. Caputo, 2020-03-20 A tour de force provocative ideas expressed in Heideggerian Derridean and Deleuzian rhetoric for a new wave of Christian theologians Bibliographia The Insistence of God presents the provocative idea that God does not exist God insists God's existence is a human responsibility which may or may not happen For John D Caputo God's existence is haunted by perhaps which does not signify indecisiveness but an openness to risk to the unforeseeable Perhaps constitutes a theology of what is to come and what we cannot see coming Responding to current critics of continental philosophy Caputo explores the materiality of perhaps and the promise of the world He shows how perhaps can become a new theology of the gaps God opens John D Caputo is at the top of his game and he is not content to reiterate what he has already expressed but continues to develop his own ideas further by way of a thorough engagement with the fields of theology Continental philosophy and religious thought Clayton Crockett University of Central Arkansas For those allergic to theological certainty whether of God's existence or of God's death Caputo delivers storm fresh relief the theopoetics of God's insistence Catherine Keller Drew University In my life I have read no more stimulating book of theology Buckle your seatbelt Dialog An excellent text that opens the way into new forms of theological thinking He puts forward an argument that must be wrestled with and brings to light new avenues for both religious and theological thought Caputo is not for the faint of heart Reviews in Religion and Theology

Sovereignty and Event Calvin D. Ullrich, 2021-01-18 In this study Calvin D Ullrich argues for the political significance of the philosopher theologian John D Caputo's radical theology Against the backdrop of present debates the author traces the notions of sovereignty and event by drawing on the political theology of Carl Schmitt and Caputo's evolving engagement with postmodern thought from its genesis in Martin Heidegger to its deeply involved association with Jacques Derrida Calvin D Ullrich shows that contrary to some misleading interpretations of his religious deconstruction Caputo has always held nascent political concerns which culminate in his radical theology Writing for scholars working in contemporary philosophy and theology this book offers one of the first major in depth analyses covering Caputo's writings of the last four decades and seeks to defend their relevance for discussions responding to ongoing political theological challenges

Things, Facts and Events , 2022-04-19 The volume deals with

ontological and semantical issues concerning things facts and events Ontology tells us about what there is whereas semantics provides answers to how we refer to what there is Basic ontological categories are commonly accepted along with basic linguistic types and linguistic types are accepted as basic if and because they refer to acknowledged ontological categories In that sense both disciplines are concerned with structure the structure of the world and the structure of our language An extended introduction overviews the topic as a whole presenting in detail its history and the main contemporary approaches and discussions More than 20 contributions by internationally acknowledged scholars make the volume a comprehensive study of some very fundamental philosophical entities Organizing Special Events and Conferences Darcy Campion

Between Philosophy and Theology Lieven Boeve,Christophe Brabant,2010 Long past the time when philosophers from different perspectives had joined the funeral procession that declared the death of God a renewed interest has arisen in regard to the questions of God and religion in philosophy This book brings some of these philosophical views together to present an overview of the philosophical scene in its dealings with religion but also to move beyond the outsider s perspective Reflecting on these philosophical interpretations from a fundamental theological perspective the authors discover in what way these interpretations can challenge an understanding of today s faith **Festival and Event Management in Nordic Countries** Tommy Andersson,Donald Getz,Reidar Johan Mykletun,2014-06-11 This book on events related research marks a watershed in the development of a Nordic School of festival and event research Each of the chapters presents a new and interesting approach to the study of events in terms of methods perspectives or content It is mostly rooted in management theory but also incorporating other perspectives that enhance our understanding of the phenomena Implications for real world applications in tourism hospitality and community development are also at the fore The scholarship is comprehensive not focused on only tourism or economic aspects Management theory including stakeholder management social networks and institutionalization processes is being applied Attention is being given to the multiple roles festivals and events play in society and to evaluation of their worth and impacts Innovative methods are being

developed to examine event experiences innovation processes and success factors There is now a critical mass of scholars in the Nordic countries that share a strong interest in event studies and they are engaged in collaborative research making it an appealing and innovative region for other event students and researchers to visit It can be expected that the Nordic school will take an increasingly important place in the development of event studies which is now truly global in terms of scholarship and university degree programs This book was originally published as a special issue of Scandinavian Journal of Hospitality and Tourism

Radical Theology and Emerging Christianity Katharine Sarah Moody, 2016-03-03 The theological turn in continental philosophy and the turn to Paul in political philosophy have occasioned a return to radical theology a tradition whose philosophical heritage can be traced to the death of God announced in the work of Nietzsche and Hegel John D Caputo's deconstructive theology and Slavoj Žižek's materialist theology are two radical theologies that explore what it might mean to pass through the death of God and to abandon this experience as specifically Christian Radical Theology and Emerging Christianity demonstrates how these theologies are transforming everyday religious practices through an examination of the work of Peter Rollins and Kester Brewin two figures at the radical margins of a contemporary expression of Western religiosity called emerging Christianity The author uses her analysis of all four figures to argue that deconstructive practices can enable religious communities to become part of a wider materialist collective in which the death of God continues to resonate Pushing the methodological boundaries of philosophy of religion by examining religious practices as the site of philosophical signification the book challenges scholars and practitioners alike to a new and more demanding dialogue between theory and practice

The Correspondence Theory of Truth Andrew Newman, 2002-06-24 This work presents a version of the correspondence theory of truth based on Wittgenstein's Tractatus and Russell's theory of truth and discusses related metaphysical issues such as predication facts and propositions Like Russell and one prominent interpretation of the Tractatus it assumes a realist view of universals Part of the aim is to avoid Platonic propositions and although sympathy with facts is maintained in the early chapters the book argues that facts as real entities are not needed It includes discussion of contemporary philosophers such as David Armstrong William Alston and Paul Horwich as well as those who write about propositions and facts and a number of students of Bertrand Russell It will interest teachers and advanced students of philosophy who are interested in the realistic conception of truth and in issues in metaphysics related to the correspondence theory of truth and those interested in Russell and the Tractatus
