Flim Flam The Truth About Unicorns Parapsychology And Other Delusions:

Flim Flam! James Randi, 1980-01-01 **Parapsychology** Jane Henry, 2005 Beginning with an introduction to the methodology this book provides the reader with a sympathetic yet critical overview of current research into unexplained phenomena including visions telepathy psychokinesis and out of body experiences **Parapsychology** Caroline Watt, 2017-07-05 Many people believe that they have experienced paranormal phenomena and others claim to possess psychic abilities For the past hundred years or so researchers have undertaken systematic and scientific work into these alleged experiences and abilities This collection of articles provides readers with a general sense of the methods used in this research the findings that have been obtained and the controversies generated by this work They cover a wide range of issues including the psychology of paranormal belief investigations into ghosts and hauntings laboratory research into extra sensory perception and psychokinesis and controlled tests of psychics and mediums An introductory essay sets each of the selected papers in context and provides additional references for those wishing to delve deeper into the issues surrounding each of the areas covered **Mysteries and Secrets Revealed** Loren Pankratz, 2021-04-01 *Mysteries and Secrets Revealed* uncovers the reality behind mysteries of nature and secrets of frauds that eluded common understanding The journey begins in the ancient Greek city of Delphi where priests claimed the gift of a priceless gold lion was an acknowledgement of their clairvoyant powers But their concocted story concealed an embarrassing blunder Those sufficiently savvy to catch the lie became aware of even deeper problems Author Loren Pankratz then guides us through the conflicts of Renaissance scholars including Galileo who explained things in ways that enraged philosophers and infuriated priests Galileo's methods of investigation were perpetuated by the meticulous work of the Academy of Experiment and Bernard Fontenelle's enthralling dialogue enabled common people to accept life in the rearranged sun centered universe Clairvoyants in a mesmeric trance claimed they could visit distant planets and endure brutal surgical procedures If any of this was real how was it possible One nineteenth century mesmeric savant Alexis Didier was so convincing that someone claimed no case of clairvoyance could be made for anyone if his accomplishments were not real This unchallenged declaration is now unraveled here for the first time through information gleaned from uncommon documents and rare antiquarian pamphlets The surprising manifestations of modern spiritualism quickly escalated into a psychic arms race that included mysterious tipping and turning of tables Scientist Michael Faraday devised ingenious experiments to show how subtle muscle reactions outside of awareness created these manifestations On the other hand explanations for table levitations and mysterious writing on slates could only be solved by individuals with acute observational skills and acquainted with the methods of trickery Each story in *Mysteries and Secrets Revealed* captures the tension of conflict the thrill of discovery and the strategies of science that unmasked frauds fakes false belief and the enigmas of our natural world **Legitimacy of Unbelief** Gerd H. Hövelmann, Hans Michels, 2017 Dutch journalist Piet Hein Hoebens 1948-1984 held a unique position in the controversies between proponents and skeptics

of parapsychology and related fields While he described himself as a card carrying skeptic with strong ecumenical leanings even many of his nominal opponents appreciated his work and his penetrating open minded criticism Hoebens constructive influence on the culture of responsible scientific exchange is felt to this day The editors have collected and mostly translated more than 40 of Hoebens most significant writings about half of which were never published in English before The editors also added editorial introductions to all chapters to elucidate their original contexts and their lasting relevance Therefore the book is more than a commemoration of an important author it provides valuable insights into the history of parapsychology and its skeptical reflections Back cover *The Cult Next Door* Judith L. Carlone, Elizabeth R. Burchard, LSW, 2017-03-18 During Thanksgiving vacation of her freshman year at Swarthmore College 1977 Elizabeth at her mother's insistence attended a stress reduction session with a biofeedback technician on staff at a Manhattan psychologist's office During that first visit this man filled her ears with prophetic visions of a glorious future the inheritance of those fortunate few who might choose to accompany him His confidence and charisma entranced her and she soon recruited two of her college roommates When the psychologist fired his assistant two years later Elizabeth and her mother followed Over the next decade this man a malevolent genius and master of manipulating metaphysical concepts to benefit a self-serving agenda organized a small dedicated band of followers The Group evolved into an incestuous family a cult Their brainwashed minds became fused with a distinctive New Age doctrine A coterie of spiritual Navy Seals they scrambled in terror training to survive the inevitable cataclysm one man's divine vision of Armageddon Subsequent to a momentous event in August 1994 with the guru as high priest The Black Dog Religion was born Elizabeth sank into a pit of despair darker than she ever could have imagined was possible From the adolescent gullibility which seduced her astray to the enlightenment which led her to freedom you will travel an incredible journey For anyone who has ever been trapped by a person who would not let them go within this book lies a message of hope **Mysteries of Ontario** John Robert Colombo, 1999-05 This book brings together some 500 accounts of strange events and eerie experiences in the province **Science, Mind and Paranormal Experience** Eric Lord, 2009-03-28 Speculations about paranormal phenomena and how they might be reconciled with modern scientific knowledge *Flim-flam! Psychics, ESP, Unicorns and Other Delusions*, 1982 *Debunk It! Fake News Edition* John Grant, 2019-09-03 We live in an era of misinformation much of it spread by authority figures including politicians religious leaders broadcasters and of course apps and websites In this second edition author John Grant uses ripped from the headlines examples to clearly explain how to identify bad evidence and poor arguments He also points out the rhetorical tricks people use when attempting to pull the wool over our eyes and offers advice about how to take these unscrupulous pundits down Updated to include a chapter on fake news *Debunk It* serves as a guide to critical thinking for young readers looking to find some clarity in a confusing world [The Atheist's Creed](#) Michael Palmer, 2010-10-29 In *The Atheist's Creed* a prominent and widely read contemporary philosopher Dr Michael Palmer presents the most comprehensive anthology of the

major philosophical arguments for atheism now before the public While the so called new atheism of Richard Dawkins and others has attracted considerable publicity it is these philosophical arguments that have down the ages provided the principal landmarks in the unfolding and increasingly widespread belief that no God exists Using a combination of extracts detailed introductions biographies and extensive bibliographies the author guides the reader through the history of atheism from the time of the early Greeks down to the present day In this analysis particular attention is given to the writings of Hume Nietzsche Marx and Freud The Atheist's Creed requires no specialist knowledge of philosophy Each chapter is structured around a single theme and the various authors coordinated to allow the full force of the particular atheistic argument to emerge The result is a compelling and powerful assessment of the case for atheism which will be essential and fascinating reading for student and non student alike and for all those concerned with the fundamental question whether or not there is a God

A New Approach to Psi Lance Storm, 2024-12-23. This book critiques conventional parapsychological viewpoints about extrasensory perception (ESP) and psychokinesis (PK), collectively referred to as psi. Since the 1930s, an overarching view on psi has been built on J. B. Rhine's research and theories at Duke University. The author argues that there are fundamental problems with the psi paradigm and offers solutions based largely on Jung's Theory of Synchronicity, treating the subject matter in a rigorous scientific way. The synchronicity concept speaks to ambiguous psi terminology, the narrow methodological approaches in psi testing, and limited interpretations of psychic experience that do not consider the pivotal role of meaning. This book considers problems with terminology, findings, and the psi construct from a Jungian synchronistic standpoint, which gives credence to issues such as archetypes, meaningfulness, and numinosity. An important new contribution to the understanding of psi, this book will be of interest to practitioners and researchers working in the disciplines of psychology, parapsychology, consciousness studies, and physics, especially quantum mechanics.

The Atheist's Primer Michael Palmer, 2012-10-08. Arguing that a new atheism, driven largely by Darwinian objections to God's existence, has limited debate to a scientific framework, *The Atheist's Primer* reinstates the importance of philosophy in the debate about God's existence and, in so doing, recovers the distinguished philosophical tradition of atheism which Dawkins and others have obscured. Beginning with the Ancient Greeks and culminating with Hume, Michael Palmer provides the philosophical framework on which scientific objections to theism are hung. He explicates and comments on the thinking behind atheism, discussing issues such as evil, morality, miracles, and the motivations for belief. Although delving deeply into epistemological concerns, emphasising the disheartening limitations of man's capacity for knowledge and our materialist dependencies, Palmer concludes on a positive note, arguing alongside Nietzsche, Marx, and Freud, and many others, that happiness and personal fulfilment are to be found in the very materialism that religious belief rejects. An eloquent abridgment of his previous work *The Atheist's Creed*, which was aimed at the educational market, *The Atheist's Primer* is written in fluent and concise prose, making it an accessible introduction for the general reader.

Conjuring the Spirit World George H. Schwartz, Tedi Asher, Christopher Jones, Ian Morgan, Tony Oursler, Jennifer Lemmer Posey, Mark Schwartz, 2024-09-03. Posters, photography, and objects from the height of Spiritualism and the history of magic gain renewed power when seen through today's lens. The human desire to connect with the dead, since the mid-19th century, gave rise to a fascination with the supernatural and the magical. Mediums and magicians from Harry Houdini, Margery the Medium, Howard Thurston, and the Fox Sisters offered communication with the departed ancestors, and magic shows two interrelated forms of popular culture.

that relied heavily on illusions and stagecraft This is the first illustrated volume to gather the art and objects that made medium and magician performances iconic during the Spiritualism movement and beyond a time when people actively debated and wondered can spirits return An international selection of paintings photographs posters stage apparatuses film publications and other objects reveal how audiences were entranced and mystified by these experiential performances captivating willing believers and garnering skeptics as they navigated the intersecting realms of science and spirituality From the origins of the iconic Ouija board to spirit photography this book is a treasure trove **Paranthropology:**

Anthropological Approaches to the Paranormal Edited by Jack Hunter, 2012-06-30 We are living in a complicated period in relation to our understanding of extraordinary phenomena Naïve materialist approaches are more assertive than ever in anthropology and in the world more generally At the same time the taboos against admitting to the reality of the paranormal are weakening There is a growing body of writing which takes the paranormal and extraordinary seriously while bringing to it the same academic standards that any other subject matter would require This is a valuable and important development and it helps open the way to new modes of understanding in the sciences and social sciences that will not reject scientific rationality but expand that rationality so as to include more of the world of human experience The articles in this Paranthropology reader provide important clues and suggestions along with rigorous argument to help us in exploring what is likely to be a major area of anthropological engagement in coming years Dr Geoffrey Samuel Cardiff University *The New Annotated H.
