proud truth is that this volume represents a great national achievement From its formal inception in 1979 this encyclopedia has always represented a vote of faith in Canada in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated At the start of a new century and a new millennium in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations this Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future The statistics behind this volume are staggering The opening sixty pages list the 250 Consultants the roughly 4 000 Contributors all experts in the field they describe and the scores of researchers editors typesetters proofreaders and others who contributed their skills to this massive project The 2 640 pages incorporate over 10 000 articles and over 4 000 000 words making it the largest some might say the greatest Canadian book ever published There are of course many special features These include a map of Canada a special page comparing the key statistics of the 23 major Canadian cities maps of our cities a variety of tables and photographs and finely detailed illustrations of our wildlife not to mention the colourful informative endpapers But above all the book is encyclopedic which the Canadian Oxford Dictionary describes as embracing all branches of learning This means that with rare exceptions there is satisfaction for the reader who seeks information on any Canadian subject From the first entry A mari usque ad mare from sea to sea which is Canada's motto and a good description of this volume's range to the Zouaves who mustered in Quebec to fight for the beleaguered Papacy there is the required summary of information clearly and accurately presented For the browser the constant variety of entries and the lure of regular cross references will provide hours of fascination The word encyclopedia derives from Greek expressions alluding to a grand circle of knowledge Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known Yet now Canada's finest scientists academics and specialists have distilled their knowledge of our country between the covers of one volume The result is a book for every Canadian who values learning and values Canada

When Catharine Parr Traill came to Upper Canada in 1832 as a settler from England she brought along with her ties to British botanical culture Nonetheless when she arrived she encountered a new natural landscape and like other women chronicled in this book set out to advance the botanical knowledge of the time from the Canadian field Flora's Fieldworkers employs biography botanical data herbaria specimens archival sources letters institutional records book history and abundant artwork to reconstruct the ways in which women studied and understood plants in the nineteenth century It features figures ranging from elite women involved in imperial botanical projects in British North America to settler colonial women in Ontario and Australia most of whom were scarcely visible in the historical record who were active in plant work as collectors writers artists craft workers teachers and

organizers Understood as an appropriate pastime for genteel ladies botany offered women pathways to scientific education financial autonomy and self expression The call for more diverse voices in the present must look to the past as well Bringing botany to historians and historians to botany Flora s Fieldworkers gathers compelling material about women in colonial and imperial Canada and Australia to take a new look at how we came to know what we know about plants
