Historical Archaeology of the Delaware Valley, 1600-1850 Richard Veit, David Orr, 2014-01-30
The Delaware Valley is a distinct region situated within the Middle Atlantic states encompassing portions of Delaware Pennsylvania New Jersey and Maryland With its cultural epicenter of Philadelphia its surrounding bays and ports within Maryland and Delaware and its conglomerate population of European settlers Native Americans and enslaved Africans the Delaware Valley was one of the great cultural hearths of early America The region felt the full brunt of the American Revolution briefly served as the national capital in the post Revolutionary period and sheltered burgeoning industries amidst the growing pains of a young nation Yet despite these distinctions the Delaware Valley has received less scholarly treatment than its colonial equals in New England and the Chesapeake region In *Historical Archaeology of the Delaware Valley 1600 1850* Richard Veit and David Orr bring together fifteen essays that represent the wide range of cultures experiences and industries that make this region distinctly American in its diversity From historic period American Indians living in a rapidly changing world to an archaeological portrait of Benjamin Franklin from an eighteenth century shipwreck to the archaeology of Quakerism this volume highlights the vast array of research being conducted throughout the region Many of these sites discussed are the locations of ongoing excavations and archaeologists and historians alike continue to debate the region s multifaceted identity The archaeological stories found within *Historical Archeology of the Delaware Valley 1600 1850* reflect the amalgamated heritage that many American regions experienced though the Delaware Valley certainly exemplifies a richer experience than most it even boasts the palatial home of a king Joseph Bonaparte elder brother of Napoleon and former King of Naples and Spain This work thoroughly based on careful archaeological examination tells the stories of earlier generations in the Delaware Valley and makes the case that New England and the Chesapeake are not the only cultural centers of colonial America

Archaeology in America Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration *Archaeology in America* is the first resource that provides students

researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America. Leading scholars, most with an intimate knowledge of the area, have written in-depth essays on over 300 of the most important archaeological sites that explain the importance of the site, the history of the people who left the artifacts, and the nature of the ongoing research. Archaeology in America divides its coverage into 8 regions: the Arctic and Subarctic, the Great Basin and Plateau, the Great Plains and Rocky Mountains, the Midwest, the Northeast, the Southeast, the Southwest, and the West Coast. Each entry provides readers with an accessible overview of the archaeological site, as well as books and articles for further research.

Historical Archaeologies of the Caribbean Todd M. Ahlman, Gerald F.

Schroedl, 2019-11-12. New perspectives on Caribbean historical archaeology that go beyond the colonial plantation. *Historical Archaeologies of the Caribbean: Contextualizing Sites through Colonialism, Capitalism, and Globalism* addresses issues in Caribbean history and historical archaeology such as freedom, frontiers, urbanism, postemancipation life, trade, plantation life, and new heritage. This collection moves beyond plantation archaeology by expanding the knowledge of the diverse Caribbean experiences from the late seventeenth through the mid-nineteenth centuries. The essays in this volume are grounded in strong research programs and data analysis that incorporate humanistic narratives in their discussions of Amerindian freedmen, plantation, institutional, military, and urban sites. Sites include a sample of the many different types found across the Caribbean from a variety of colonial contexts that are seldom reported in archaeological research yet constitute components essential to understanding the full range and depth of Caribbean history. Contributors examine urban contexts in Nevis and St. John and explore the economic connections between Europeans and enslaved Africans in urban and plantation settings in St. Eustatius. The volume contains a pioneering study of frontier exchange with Amerindians in Dominica and a synthesis of ceramic exchange networks among enslaved Africans in the Leeward Islands. Chapters on military forts in Nevis and St. Kitts call attention to this often neglected aspect of the Caribbean colonial landscape. Contributors also directly address culture heritage issues relating to community participation and interpretation. On St. Kitts, the legacy of forced confinement of lepers ties into debates of current public health policy. Plantation site studies from Antigua and Martinique are especially relevant because they detail comparisons of French and British patterns of African enslavement and provide insights into how each addressed the social and economic changes that occurred with emancipation. Contributors: Todd M. Ahlman, Douglas V. Armstrong, Samantha Rebovich, Bardoe Paul, Farnsworth, Jeffrey R. Ferguson, R. Grant Gilmore III, Diana Gonzales Tennant, Edward Gonzales Tennant, Barbara J. Heath, Carter L. Hudgins, Kenneth G. Kelly, Eric Klingelhofer, Roger H. Leech, Stephan Lenik, Gerald F. Schroedl, Diane Wallman, Christian Williamson.

International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

Loving Sheryll Cashin, 2017-06-06 The landmark story of how interracial love and marriage changed American history and continues to alter the landscape of American politics When Mildred and Richard Loving wed in 1958 they were ripped from their shared bed and taken to court Their crime miscegenation punished by exile from their home state of Virginia The resulting landmark decision of Loving v Virginia ended bans on interracial marriage and remains a signature case the first to use the words white supremacy to describe such racism Drawing from the earliest chapters in US history legal scholar Sheryll Cashin reveals the enduring legacy of America s original sin tracing how we transformed from a country without an entrenched construction of race to a nation where one drop of nonwhite blood merited exclusion from full citizenship In vivid detail she illustrates how the idea of whiteness was created by the planter class of yesterday and is reinforced by today s power hungry dog whistlers to divide struggling whites and people of color ensuring plutocracy and undermining the common good Not just a hopeful treatise on the future of race relations in America Loving challenges the notion that trickle down progressive politics is our only hope for a more inclusive society Accessible and sharp Cashin reanimates the possibility of a future where interracial understanding serves as a catalyst of a social revolution ending not in artificial color blindness but in a culture where acceptance and difference are celebrated
