Gardening in California, Landscape and Flower John McLaren,2015-06-04 Excerpt from Gardening in California Landscape and Flower This handbook is respectfully submitted to gardeners in California amateur and professional as supplementary to and a modification of those excellent treatises and encyclopedias on Landscape and Flower Gardening which have become the authorities and text books on the subject but which were written for the conditions of climate and season in European countries and the Eastern States of our own land In California these conditions are so different and the possibilities of the culture and development of trees shrubs and flowers are so much greater than in Europe or any other of the United States of America that our gardeners have had to do a great deal of original investigation and experimental work The results of such investigation and work by the writer are recorded in these pages The difference referred to is well illustrated by the universally loved Pansy which in the Eastern States is sown in February flowering in May or June while in California it is sown in July and flowers from November to May and also by the Acacia which in the East is

grown in pot in the conservatory protected by glass and heated by artificial heat whereas in our State it grows a handsome tree in any soil in the open air and flowers in midwinter Although it has been found necessary to treat of the conservatory to a certain extent yet this has been done only as subsidiary to the main purpose of the book the treatment in the conservatory of plants which are not hardy in the open air locally being the same here as in any other part of the country It should however be kept in view that hundreds of trees shrubs and flowers which cannot possibly exist in the open air in those parts of the United States and Europe where the climatic conditions are more harsh than here flourish and give grand effects out of doors in California About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
