

PLATE A

The transition from the diesel-electric "fleet type" submarine to the production "nuclear fast attack" not only changed the size of submarines but produced a fundamental change in their shape. The fleet type design (1) had to compromise a good submerged performance hull form with the need to be seaworthy on the surface where it spent most of its time. The Tang Class diesel-electric fast attack design (2) smoothed much of the hull form to decrease drag. From the Nautilus design (3) was learned a great deal about high-speed submerged ship characteristics. It still retained a small superstructure for surfaced operations. The Skate Class design (4) was the first "production design" nuclear fast attack.

the causes of the conflict major battles and campaigns weapons systems including military aviation chemical warfare the submarine and the tank and the terms of the peace Some 350 biographies provide information on the roles played in the conflict by generals admirals and civilian leaders There are also biographies of individuals who were shaped by the war such as Charles De Gaulle Adolf Hitler Benito Mussolini and Joseph Stalin essays on each of the countries involved in the conflict new appraisals of such subjects as military medicine and artillery tactics and essays on such diverse subjects as art literature and music in the war Each entry has references for additional reading and a subject index provides easy access The volume is an excellent reference source for scholar and neophyte alike *Bureau of Ships Journal*, 1952 *Naval Ship Systems Command Technical News*, 1958 *Bureau of Ships Journal* United States. Navy Department. Bureau of Ships, 1958 The Men Stephen Leal Jackson, 2010 Submarine duty during World War II was one of the most statistically deadly physically demanding and emotionally challenging assignments in the U S Navy The boats had few crew comforts and war patrols typically thirty to sixty days in length were so exhausting that the submarine sailors often got a month of rest after each patrol What would motivate men to volunteer for this unmistakably difficult and dangerous job This is the question that The Men will answer using the oral histories of enlisted submarine veterans a collection of letters of one sailor who did not return and other primary sources These volunteers from diverse locales and backgrounds ignored the danger accepted the privations and exalted in the camaraderie Their excitement fear and humble heroism is captured in their own words the real story of the undersea war in the Pacific told by the men who fought it A veteran of the United States Navy Stephen Leal Jackson spent eight years in the submarine force serving on the USS Los Angeles SSN 688 and the USS Florida SSBN 728 Jackson's service included several Western Pacific cruises to the oceans lands and ports described in The Men A lifelong student of American history Jackson's ongoing research concentrates specifically on World Wars I and II Jackson received his Master of Arts in American History from Providence College and is currently in the Ph D program at Salve Regina University Jackson has served as the primary spokesperson for a major electrical utility on nuclear and environmental issues His unique perspective as a onetime navy enlisted submariner trained historian and skilled communicator allows Jackson to provide clear and easy access to the fascinating experiences of the men who fought the undersea battles during World War II **The Submarine Service, 1900-1918** Nicholas Lambert, 2020-11-26 The year 2001 marks the centenary of the Royal Navy's submarine service In the aftermath of the 2016 celebrations of the Battle of Jutland centenary it is worth considering how the First World War at sea changed This volume opens with an examination of the background to the Board of Admiralty's decision in 1900 to buy submarines bringing to light documents that go a long way toward dispelling the myth that Britain's pre 1914 naval leaders were opposed to the development of the submarine as a major weapon Indeed the documents show that senior naval officers and influential civilians in Whitehall believed that the advent of the submarine would revolutionize naval warfare in a way that would bolster the Royal Navy's position as the world's predominant naval power This edited

selection of documents illustrates not only the Admiralty's thinking on the employment of the submarine between 1900 and 1918 it also charts the technical development of British submarines and explains issues such as why the pioneer submariners came to regard themselves as an elite group within the Royal Navy and were allowed to become the silent service. *The Japanese Submarine Force and World War II* Akihiko Yoshida, 2013-01-15 When first published in 1995 this book was hailed as an absolutely indispensable contribution to the history of the Pacific War. Drawing heavily from Japanese sources and American wartime intercepts of secret Japanese radio messages a noted American naval historian and a Japanese mariner painstakingly recorded and evaluated a diverse array of material about Japan's submarines in World War II. The study begins with the development of the first Japanese 103 ton Holland type submersible craft in 1905 and continues through the 1945 surrender of the largest submarine in the world at the time the 5300 ton I-400 class that carried three airplanes. Submarine weapons equipment personnel and shore support systems are discussed first in the context of Japanese naval preparations for war and later during the war. Both successes and missed opportunities are analyzed in operations ranging from the California coast through the Pacific and Indian Oceans to the coast of German occupied France. Appendixes include lists of Japanese submarine losses and the biographies of key Japanese submarine officers. Rare illustrations and specifically commissioned operational maps enhance the text. **Encyclopedia of British Submarines 1901-1955** Paul

Akermann, 2002-11 The history of the development of submarines covered in this book spans the most tumultuous years of the 20th century. When the little Holland No. 1 was launched in 1901 few could guess that the submarine would become the most potent weapon of war ever developed. Navy Yearbook United States, 1919 *Proceedings of the United States Naval Institute* United States Naval Institute, 1923 *United States Naval Institute Proceedings*, 1925 **Department of State Wireless Bulletin**, 1950 *All Hands*, 1968 *The Silent Service in World War II* Edward Monroe-Jones, Michael Green, 2012-12-07 From the naval battle of Guadalcanal to rescuing George Bush Sr in the Pacific here are the stories of US submariners in WWII. *The Silent Service in World War II* tells the story of America's intrepid submarine warriors in the words of the men who served and fought in the Pacific against Japan. When Pearl Harbor was attacked in 1941 the enemy had already deployed naval forces but the United States was soon able to match them. By 1943 new Gato class submarines were making a difference carrying the war not just to the Japanese Imperial Navy but to the vital merchant fleet that transported essential resources to the island country. Starting with the American victory at Guadalcanal US submarine forces began to constrict the Japanese sea lanes. Operating independently and in wolfpacks they attacked convoys operating beyond the range of American airpower making daring forays even into Japanese home waters. Taking on Japanese warships as well as rescuing downed airmen including the grateful first President Bush US submarines made an enormous contribution to our war against Japan. Aside from enemy action the sea itself could be an extremely hostile environment as many of these stories attest. From early war patrols in obsolescent unreliable S-boats to modern fleet submarines roving the Pacific the forty six

stories in this anthology offer a full understanding of life as a US Navy submariner in combat
