Baldwin, 2015-12-03 The science wars have been raging for decades raising many questions about the power of science Some critics claim that science including social science is merely a social construction that fallible humans have created with words and other symbols If this is true is science as formidable a source of knowledge as most scientists claim Baldwin explains why the edifice of science has robust properties that make it one of the most useful forms of knowledge that humans have ever created although it is not perfect He trenchantly examines all sides of the debate and uses the philosophy of pragmatism to reveal the special characteristics that make science work as well as it does Ending the Science Wars shows how science is far better grounded than its critics claim The book not only helps resolve many current debates about science it is a major contribution for explaining science in terms of a powerful philosophical system This makes the book valuable to scientists in all fields of research and intellectually challenging for science's critics *What Happens when We Die* Sam Parnia, 2006 Dr Sam Parnia shares the stories of people who have had near death experiences and examines current research on the subject **The World of Horrotica** David Edward

G. Riedel,2022-03-15 After retirement with time on my hands I decided to sit down and put in print the thoughts that came my way from one reading and another Then I ran into some heart surgery five bypasses and the question Why Why did this happen to me So after that life saving experience in those days when I seemed to be living beyond when I should have perhaps died I took what I have learned in the past and reflected in that history on what I read in the present hoping that I can speak to someone in a future time about a future time about all the possibilities that stand before them as they stood before me Then it will be their turn or maybe your turn to reflect on your life and perhaps share some words with others about their future      **Losing the Plot** Pardis Dabashi,2023-11-06 An examination of the relationship between literature and

classical Hollywood cinema reveals a profound longing for plot in modernist fiction The modernist novel sought to escape what Virginia Woolf called the tyranny of plot Yet even as twentieth century writers pushed against the constraints of plot driven Victorian novels plot kept its hold on them through the influence of another medium the cinema Focusing on the novels of Nella Larsen Djuna Barnes and William Faulkner writers known for their affinities and connections to classical Hollywood Pardis Dabashi links the moviegoing practices of these writers to the tensions between the formal properties of their novels and the characters in them Even when they did not feature outright happy endings classical Hollywood films often provided satisfying formal resolutions and promoted normative social and political values Watching these films modernist authors were reminded of what they were leaving behind both formally and in the name of aesthetic experimentalism by losing the plot      *Flicker* Chelsea Roche, *Flicker* is a young fairy with wings that never seem to fly quite right Clumsy and often embarrassed by his unpredictable light he longs to make friends in the magical forest where he lives But no matter how hard he tries he just can't seem to fit in until he meets Twinkle a fairy who sees the magic in him that others don't As *Flicker* learns to embrace his imperfections a new challenge arises A dark fairy named Noctis and his shadowy followers threaten the balance of the forest pushing the fairies to confront both their light and their darkness With the help of his new friends *Flicker* discovers that true magic comes not from being perfect but from finding the courage to shine no matter what A heartwarming adventurous tale of friendship self discovery and finding balance *Flicker* is a story for young readers ready to embrace who they are and face the darkness with courage      **The Shadow Builder** Bram
