**Forgotten Agricultural Heritage** Parviz Koochafkan, Miguel A. Altieri, 2016-11-25 Contemporary agriculture is often criticized for its industrial scale adverse effects on nutrition rural employment and the environment and its disconnectedness from nature and culture Yet there are many examples of traditional smaller scale systems that have survived the test of time and provide more sustainable solutions while still maintaining food security in an era of climate change This book provides a unique compilation of this forgotten agricultural heritage and is based on objective scientific evaluation and evidence of the value of these systems for present and future generations The authors refer to many of these systems as Globally Important Agricultural Heritage Systems GIAHS and show how they are related to the concepts of heritage and the World Heritage Convention They demonstrate how GIAHS based on family farms traditional indigenous knowledge and agroecological principles can contribute to food and nutrition security and the maintenance of agro biodiversity and environmental resilience as well as sustain local cultures economies and societies Two substantial chapters are devoted to descriptions and assessments of some 50 examples of designated and potential GIAHS from around the world including rice fish culture in China mountain terrace systems in Asia coffee agroforestry in Latin America irrigation systems and land and water

management in Iran and India pastoralism in East Africa and the dehesa agrosilvopastoral system of Spain and Portugal The book concludes by providing policy and technical solutions for sustainable agriculture and rural development through the enhancement of these systems Traditional Ecological Knowledge of Resource Management in Asia Suresh Chand Rai,Prabuddh Kumar Mishra,2023-01-01 This book highlights the different ways of traditional ecological knowledge TEK practices that conserve natural resources sustainably Traditional ecological knowledge TEK along with synonymous or closely related terms like indigenous knowledge and native science originates in the literature on international development and adaptive management Against the backdrop of unprecedented global degradation and reduction in ecosystem services with impacts on human well being over the last 50 years there is a growing interest in the role of traditional ecological knowledge TEK practices and systems of local communities in ensuring the sustainable utilization and management of resources In this context this book comprehensively analyzes the important aspects of natural resources in Asia This book covers a detailed study of the different aspects of natural resources It is divided into three sections which deal with varying dimensions of indigenous ecological knowledge of resource management in Asia The first part reflects upon the concept of traditional ecological knowledge the second part analyzes the systematic documentation of TEK practices and the third part deals with policy for governance This book critically describes and explains the indigenous knowledge about resource management This book is the ideal text for undergraduate postgraduate and research scholars in India and abroad This book is designed in such a manner that it covers all the aspects of natural resources It also helps the administrator and policymakers use indigenous knowledge in resource management **Disaster Risk Reduction and Rural Resilience**

Sudip Mitra,Rajib Shaw,2024-10-30 Even though frequent disaster losses occur in rural and agricultural areas a substantial number of the prevailing disaster research has focused on urban areas often failing to notice rural populations communities and rural development as a whole It is critical to assess how the needs and vulnerabilities in rural communities impact the creation of resilience especially in countries with a large area under rural regions For disaster managers rural areas present different opportunities and challenges from their urban counterparts Rural communities position after a disaster is different from that of urban communities Efficient DRR disaster risk reduction is the key to sustainable rural development Disasters can cause human and animal life loss field crops stored seeds agricultural equipment materials supply systems e g infrastructure livelihood and associated indigenous knowledge Such impacts have its short term repercussions and affect the long term sustainability of the rural sector Rural regions of the developing world can be remote with high concentrations of mass poverty food insecurity and illiteracy hence access to food shelter and communication related to relief and recovery is a challenge after a disaster In rural areas farmers strongly rely on natural resources and have no alternative source of income or employment making them more vulnerable to a crisis Role of women in rural development and agricultural activities is of paramount importance Yet they are the most affected ones during any disaster Vulnerabilities of children and especially

abled people in the rural sector are untouched areas that require more attention in days to come This book deliberates on the aspects as mentioned above related to disaster risk reduction preparedness and management Apart from the introduction the book has four parts 1 Food and Agriculture 2 Water and Sanitation 3 Gender and Social Issues and 4 Technology Overall this book is a valuable resource material for students researchers academia policymakers and development practitioners
