Smith, Raymond L. Smith, 2017-12-14 Invest in building talent The best principals don't just happen When new principals are handed the keys and left to make decisions about their schools without adequate sustained support what happens Too often school improvement efforts don't gain full traction principals often give up and leave and real student gains remain out of reach Impact Coaching bucks the notion of leaving principals to learn the ropes on their own This book offers a solid sustainable and laser sharp focus on instructional leadership and helps leaders hone model and lead new learning through deliberate practice by Engaging in rich rigorous and reflective open to learning conversations with both coaches and colleagues to improve instructional leadership practices Leveraging their 5 Big Winner Practices for highest impact Using Linking Walk templates to apply new ideas to real scenarios that improve lead learner practices This book could be your single most impactful investment toward eventual student achievement The authors do a great job of sharing the benefits of coaching and elaborating on how the coaching partnership should and could look The book is very relevant clearly based on research and has some great checklists to further clarify the recommended steps Kathy Rhodes Principal Hinton Elementary Hinton IA Impact Coaching provides school leaders with the tools to turn opportunity into action Educational leaders possess an incredible capacity to influence the system and impact student learning Ray and Julie Smith present strategies for focusing on leadership practices that maximize impact on student learning and achievement This book will re ignite your commitment to creating effective change bolster your confidence to persist through challenges and renew your motivation to reach your fullest potential The authors will simultaneously inspire your soul and challenge your mind Russell J Quaglia President Founder Quaglia Institute for Student Aspirations **Supporting Literacy Across the Sunshine State** Julie A. Marsh, 2008 Despite recent progress in reading achievement among children in primary grades many children are not moving beyond basic decoding skills to fluency and comprehension as they go on to higher grades To address this problem many policymakers suggest that reading coaches master teachers who offer ongoing on site instructional support for teachers can improve teachers practice and students literacy skills RAND researchers evaluated the middle school reading coach program in Florida to answer these questions How is the program being implemented by the state districts schools and individual coaches What is the impact of coaching on teachers practice and students achievement in reading and mathematics What features of reading coach models and practices are associated with better outcomes **Harcourt School Publishers Math Florida** HSP, 2003-04 *Florida Administrative Register*, 2010-02 **Managing School Districts for High Performance** Stacey Childress, 2007 Managing School Districts for High Performance brings

together more than twenty case studies and other readings that offer a powerful and transformative approach to advancing and sustaining the work of school improvement. At the center of this work is the concept of organizational coherence aligning organizational design, human capital management, resource allocation, and accountability and performance improvement systems to support an overarching strategy. This central idea provides a valuable conceptual framework for current and future school leaders. The case studies presented in *Managing School Districts for High Performance* grow out of the Public Education Leadership Project (PELP), a unique partnership between the Harvard Business School, the Harvard Graduate School of Education, and a network of urban school districts. This rich array of cases explores the managerial challenges districts face as they seek to ensure rich learning opportunities and high achievement for all students across a system of schools. This book of insightful case studies fills a void long felt by educational administrators in search of practical, real-world training tools. It will serve as a catalyst for the tough conversations district leaders need to have about achieving high-quality outcomes for all students. The Broad Center for the Management of School Systems has used many of these cases with great success, and we are excited that they are now compiled into a single collection. Dan Katzir, Managing Director, The Broad Foundation. This volume is not a treatise about how schools and districts should work. Rather, it provides a deep immersion in the real dilemmas involved in advancing school district reform. Anyone who works through these cases cannot help but come away with a more informed vision for change, a more reflective orientation about the interrelationships among the multiple tasks involved, and a more prudent grasp of what it takes to educate all children to high academic standards. The course of study presented by *Managing School Districts for High Performance* should be required professional education for anyone charged with advancing a coherent agenda of school improvement in our diverse, demanding, and rapidly changing society. Anthony S. Bryk, Spencer Professor of Organizational Studies, Stanford University. This set of case studies offers practitioners, policymakers, and scholars the opportunity to learn from the collective wisdom and real-life experiences of educational leaders involved in systemic transformation. Implementing coherent reform strategies designed to improve and sustain student performance often takes place in a vacuum. As a former urban superintendent, I believe that these selected educational case studies provide a compelling forum for shared experiential teaching and learning. Arlene Ackerman, Christian A. Johnson, Professor of Outstanding Educational Practice Teachers College, Columbia University. This collaboration between the Harvard Business School and the Harvard Graduate School of Education provides a set of analytical tools to address the most complex and challenging issues facing urban public schools. The contemporary case studies document actual choices and constraints and point to patterns and similarities across organizations, from urban schools to corporate environments. Carol Johnson, Superintendent, Boston Public Schools. Stacy Childress is a lecturer at Harvard Business School. Richard F. Elmore is the Gregory R. Anrig Professor of Educational Leadership at the Harvard Graduate School of Education. Allen S. Grossman is the MBA Class of 1957 Professor of Management Practice at Harvard Business School.
