**Determination of Anions in Natural and Treated Waters** T R Crompton, 2003-09-02 As environmental controls are lagging behind industrial development metals are an increasing hazard to humans animal and plant life Bioaccumulation of metals through the food chain creates a serious impact on public health yet analytical techniques for detecting the often low concentrations of contaminants are poorly understood Determination of Anions in Natural and Treated Waters draws together the scattered literature and presents in a systematic fashion the latest available analytical techniques for detecting
