The Alchemy of Light Urszula Szulakowska,2021-10-01 This study concerns the late Renaissance metaphysics of light in its adoption to a Paracelsian alchemical context by John Dee Heinrich Khunrath Michael Maier and Robert Fludd Their alchemical theosophy is contextualised within Protestant reformism of the 1590s to 1620s specifically that of Valentin Weigel and Johannes Arndt This results in a re assessment of the Rosicrucian movement which challenges the existing historiography and problematises the character of the movement The volume includes fifty illustrations from alchemical treatises of the period the emphasis being placed on Khunrath s *Amphiteatrum Sapientiae Aeternae* 1595 1609 In an innovative manner the study investigates these images using analytical tools drawn from semiotics structuralism and post structuralism This method yields an unusual interpretation of the geometry optical diagrams and spatial structures employed in such alchemical engravings

Studying A.S. Byatt's Fiction Is Like a Game Soraya HEIS RODRÍGUEZ, 2014-05-09 Desde un punto de vista cuantitativo los estudios culturales ocupan sin duda un espacio menor Sin embargo los tres artículos aquí presentados dan cuenta de la variedad de perspectivas posibles dentro de este apartado No solo abarcan estos estudios diferentes géneros literarios sino que recorren diferentes épocas históricas desde el renacimiento hasta nuestros días As destaca la recepción de la obra de Shakespeare adaptada a los principios estéticos del siglo XVIII español la aparición de un problema tan actual como la violencia doméstica en el teatro y el cine de mediados del siglo XX o la vinculación de posicionamientos contraculturales de la generación Beat en la música de Bob Dylan Todos estos estudios exploran pues la relación entre las prácticas culturales la vida diaria y los contextos históricos en los que se producen Como suele ser habitual gran parte de las contribuciones presentadas en este volumen se centran en el estudio del aprendizaje del inglés como segunda lengua una de las principales preocupaciones del sistema educativo español en estos momentos tanto en la etapa preuniversitaria como universitaria Es lógico por tanto que estos jóvenes investigadores muestren interés por un asunto que atañe a un elevado número de estudiantes en la sociedad actual Los estudios van desde el análisis de libros de texto utilizados en la enseñanza del inglés para comprobar si estos textos adoptan correctamente las cuatro destrezas básicas listening speaking speaking writing al aprendizaje de la lengua desde el punto de vista de una aproximación comunicativa hasta la relación de la prosodia y la utilización de audífonos por parte de personas sordas o la percepción que tienen los estudiantes de la pronunciación del inglés Como se ve problemas muy cercanos a la realidad pedagógica Las contribuciones literarias se centran exclusivamente en autores del siglo XX incluida una adaptación al Londres actual de una

obra de Shakespeare pero recorren todos los géneros literarios así como el cine. En general estos estudios se fijan en obras concretas y las analizan desde perspectivas culturales, sociológicas o psicológicas. Podemos encontrar autores consagrados como Theodore Roethke y Ted Hughes o escritoras más localistas como la canadiense Jeannette Armstrong y sobresalen miradas postmodernistas tanto en el ámbito de la novela como del cine. En definitiva se trata de una selección de artículos altamente prometedora que supone un claro desafío al futuro de los Estudios Ingleses. Por todo ello hay que felicitar a todos los participantes y sobre todo a los editores de este volumen que han demostrado una enorme capacidad de trabajo y entusiasmo.

Gothicka Victoria Nelson, 2012-04-23 The Gothic has taken a revolutionary turn in this century. Today's Gothic has fashioned its monsters and devils into heroes and angels and is actively reviving supernaturalism in popular culture. Nelson argues that this mainstreaming of a spiritually driven supernaturalism is a harbinger of what a post-Christian religion in America might look like.

Measuring Shadows Raz Chen-Morris, 2016-03-31 In Measuring Shadows Raz Chen Morris demonstrates that a close study of Kepler s Optics is essential to understanding his astronomical work and his scientific epistemology He explores Kepler s radical break from scientific and epistemological traditions and shows how the seventeenth century astronomer posited new ways to view scientific truth and knowledge Chen Morris reveals how Kepler s ideas about the formation of images on the retina and the geometrics of the camera obscura as well as his astronomical observations advanced the argument that physical reality could only be described through artificially produced shadows reflections and refractions Breaking from medieval and Renaissance traditions that insisted upon direct sensory perception Kepler advocated for instruments as mediators between the eye and physical reality and for mathematical language to describe motion It was only through this kind of knowledge he argued that observation could produce certainty about the heavens Not only was this conception of visibility crucial to advancing the early modern understanding of vision and the retina but it affected how people during that period approached and understood the world around them
