Catalogue ... 1882 San Francisco Public Library,1889      **Catalogue of the Newton Free Library of Newton, Massachusetts, 1892** Newton Free Library,1892      **Esotericism, Mysticism, and the Politics of Transcendence in Modern Asia** Soumen Mukherjee,Toshio Akai,2025-07-15 This invaluable anthology examines histories of esotericism mysticism and occultism in modern Asia understood here as the period roughly stretching from the late nineteenth through the twentieth century and paving eventually the way for the so called New Age The idea of histories in plural has to do with the complexities of their lineages the many pathways through which their affinities encounters and entanglements flowed and or developed during the period under review The contributors hail from different disciplines history literature and religious studies for instance and in what accounts for a cutting edge of the book provide truly multidisciplinary insights on the subject in one single volume Their select case studies illuminate key aspects of contemporaneous socio religious processes They explicate how aspects of mysticism esotericism and occultism were closely tied to wider socio political and intellectual processes of the period that were at once transregional even global and frequently transcultural and or cosmopolitan in character Postgraduate students research scholars and academics in general working in the fields of religious studies and or Asian religions in modern times will find this collection to be of great interest      Esoteric Buddhism A. P. Sinnett,2014-03 This Is A New Release Of The Original 1884 Edition      Esotericism and Deviance ,2024-02-06 The concept of deviance has been central to the academic study of Western esotericism since its inception This book being the proceedings of the 6th Biennial Conference of the European Society for the Study of Western Esotericism ESSWE explores the relationship between esotericism and various forms of deviance as concept category and practice from antiquity until late modernity The volume is the first to combine incisive conceptual explorations of the concept of deviance and how it informs and challenges the study of esotericism alongside a wide range of empirically grounded case discussions      *The Transcendental Universe* C. G. Harrison,1993 Most spiritual impulses today can be traced back to the nineteenth century explosion of esotericism In *The Transcendental Universe* one of the most enigmatic and thought provoking works of the period a mysterious and unknown figure C G Harrison examines theosophy from an esoteric Christian perspective He identifies true gnosis and with great courage makes public much esoteric knowledge that had remained hidden within occult orders      **A Secret History of Consciousness** Gary Lachman,2003 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living

evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read Contents Foreword by Colin Wilson Introduction Consciousness Explained The Search for Cosmic Consciousness Esoteric Evolution The Archaeology of Consciousness Participatory Epistemology The Presence of Origin Last Words Playing for Time Selected Bibliography A marvelously exhilarating gallop through every important modern theory of consciousness from Steiner to Maslow from Bucke s cosmic consciousness to Gebser s integral consciousness Colin Wilson author of *The Outsider* and *Access to Inner Worlds* Opens up vast vistas of possibility suggesting that what we experience as the earth may in itself be inseparable from our state of mind and that the evolution of human consciousness may be as fundamental a process as our development through genetics A must read for those seeking an escape from our contemporary culture s cul de sac Daniel Pinchbeck author of *Breaking Open the Head* Thinking outside the box Lachman challenges many contemporary theories by reinserting a sense of the spiritual back into the discussion Profoundly erudite yet easy to read this book is a provocative mind stretcher Leonard Shlain author of *Art Physics Alphabet* versus the Goddess and *Sex Time Power*

**Index Catalogue of Books in the Lending Department** Cardiff Free Libraries,1890      **Classified Catalogue, Not Including Fiction, Juveniles and German** Peoria Public Library,1899      **The Place of Enchantment** Alex Owen,2006-12-15 By the end of the nineteenth century Victorians were seeking rational explanations for the world in which they lived The radical ideas of Charles Darwin had shaken traditional religious beliefs Sigmund Freud was developing his innovative models of the conscious and unconscious mind And anthropologist James George Frazer was subjecting magic myth and ritual to systematic inquiry Why then in this quintessentially modern moment did late Victorian and Edwardian men and women become absorbed by metaphysical quests heterodox spiritual encounters and occult experimentation In answering this question for the first time *The Place of Enchantment* breaks new ground in its consideration of the role of occultism in British culture prior to World War I Rescuing occultism from its status as an irrational indulgence and situating it at the center of British intellectual life Owen argues that an involvement with the occult was a leitmotif of the intellectual avant garde Carefully placing a serious engagement with esotericism squarely alongside revolutionary understandings of rationality and consciousness Owen demonstrates how a newly psychologized magic operated in conjunction with the

developing patterns of modern life She details such fascinating examples of occult practice as the sex magic of Aleister Crowley the pharmacological experimentation of W B Yeats and complex forms of astral clairvoyance as taught in secret and hierarchical magical societies like the Hermetic Order of the Golden Dawn Through a remarkable blend of theoretical discussion and intellectual history Owen has produced a work that moves far beyond a consideration of occultists and their world Bearing directly on our understanding of modernity her conclusions will force us to rethink the place of the irrational in modern culture An intelligent well argued and richly detailed work of cultural history that offers a substantial contribution to our understanding of Britain Nick Freeman Washington Times

**Killing the Buddha** Jennifer Cowe, 2020-09-10 Incorporating the novels pamphlets and letters of Henry Miller Killing the Buddha argues for Miller s written work to be considered as a whole in relation to the theme of Zen Buddhism specifically the concept of Satori awakening By reading Miller s literary output and letters as a spiritual journey to awakening it is possible to chart his development as a writer and offer insight into his repetitive use of biographical material Reflecting upon the influence of Otto Rank and Henri Bergson on Miller s conceptualization of the role of the writer and then by examining his complex rejection of Surrealism it is possible to show Miller s burgeoning Zen Buddhism as a life long quest for acceptance and authenticity explicitly explored within his work With close readings of the Obelisk Trilogy of the 1930s Tropic of Cancer Tropic of Capricorn and Black Spring and The Rosy Crucifixion Trilogy 1949 1960 Miller s complex journey to Satori is shown as a continuous progression from his early notorious novels through to the essays and pamphlets of his later career
