Especially For Wives When Was The Last Time:

Encyclopedia of Women in American History Joyce Appleby, Eileen Chang, Joanne Goodwin, 2015-07-17 This illustrated encyclopedia examines the unique influence and contributions of women in every era of American history from the colonial period to the present. It not only covers the issues that have had an impact on women but also traces the influence of women's achievements on society as a whole. Divided into three chronologically arranged volumes, the set includes historical surveys and thematic essays on central issues and political changes affecting women's lives during each period. These are followed by A-Z entries on significant events and social movements, laws, court cases, and more, as well as profiles of notable American women from all walks of life and all fields of endeavor. Primary sources and original documents are included throughout.

Encyclopedia of Women and Gender, Two-Volume Set Judith Worell, 2001-10-16 The study of gender differences began in earnest in the 1970s and has since increased dramatically to infiltrate virtually all fields of study in the social and behavioral sciences. Along the way, it was discovered that while women very often think and behave differently than do men, industrialized societies cater to masculine perspectives. The Psychology of Women emerged as a field of study focusing on just those areas in which women most often butted against assumed roles. And similarly in the 1990s, the Psychology of Men emerged to focus on the same issues for men. The Encyclopedia of Gender covers all three areas under one cover, discussing psychological differences in personality, cognition, and behavior, as well as biologically based differences and how those differences impact behavior. Coverage includes studies of these differences in applied settings such as education, business, the home, in politics, sports, competition, etc. Key Features: Over 100 in-depth chapters by leading scholars in the psychology of women and gender. Addresses critical questions of similarities and differences in gendering across diverse groups, challenging myths about gender polarization and the Venus/Mars distinction. Broad coverage of topics from theory and method to development, personality, violence, sexuality, close relationships, work, health, and social policy. Sensitive attention to multicultural and cross-cultural research. Clearly written, readable, comprehensive, with helpful guides, outline, glossary, reference list. Raises difficult questions related to power, inequality, ethics, and social justice. Challenges the reader to revise established truths and to seek further information. Maintains a feminist and woman-centered focus.

Gender Inequality in the Global Labor Market Reyna Elizabeth Rodríguez Pérez, David Castro Lugo, 2024-10-24 This book examines gender inequality from the perspective of feminist economics with empirical application across different countries such as Turkey, the United States, Mexico, Uruguay, Argentina, Colombia, Costa Rica, and territories within Europe. It centers on topics such as labor participation, occupational segregation, feminization of poverty, and migration wage differentials, changes in, and the quality of employment, equity index, and gender bias in fiscal policies. It encompasses both developed and developing countries and shows that the gender gap has been narrowing over time, although not completely, mainly due to the sparse implementation of programs and public policies with a feminist economic approach which help to make gender

dimensions in the economy visible and highlight the implications this has on women's lives. The book also examines the impact of the COVID 19 crisis on inequality on the working lives of men and women. This book will be an important asset in teaching forums on the most recent advances in economic science across a number of different theories, approaches and research hypotheses that explain the study of gender inequality. It also presents different empirical studies using multiple methodologies and databases applied to specific problems in multiple countries to identify the advances, opportunities and changes that have occurred in gender inequality from a feminist economic perspective. The book offers relevant novel and original scientific data and makes public policy proposals to encourage the participation of women in the labor market.

Consequently, it will also be of interest to policymakers concerned with global trends in the labor market. *Feminist Perspectives on Family Care* Nancy R. Hooyman, Judith Gonyea, 1995-08-29. Today women find themselves playing an ever increasing role in caring for older family members who are frail, developmentally disabled or suffering from serious mental illness. While this role of women as caregivers has been documented, the actual impact on the lives of women has remained largely unstudied. In this volume the authors examine caregiving as a central feminist issue, looking at its impact on women socially, personally and economically. The authors review how changing family structures, the changing economy and workforce and the changing health care demands of needy adults have impacted on women's lives. They critique existing public and private policies, demonstrating a need for fundamental structural changes in social institutions and attitudes to improve the lives of women. Finally, they propose a social model of care that is oriented toward gender justice, recognition of the work of caring and its impact upon women socially, personally and economically. For students, scholars and practitioners in the field of gerontology, gender studies and social work, this book is a must. **Handbook of Marriage and the Family**

Marvin B. Sussman, Suzanne K. Steinmetz, Gary W. Peterson, 2013-06-29. To know where we are going as scholars, educators and practitioners in the field of marriage and family life, we first need to know where we have been. A perusal of early texts on marriage and family life provides some thought-provoking insights into the accuracy of the saying "what goes around comes around." It is interesting to note who has been considered to be in a position to provide information on marriage and family life. Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality, doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease, who emphasized cleanliness, order, fighting germs and eliminating rodents and insects. There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics. An insightful essay of this type is by Marta Karlweis (1926) in which she notes: "There is no other fetish that society holds to so firmly as the conception of woman with all its usual associations of infantilism and dependence. The child requires protection, is a minor and consequently a serf, but above all it possesses no spiritual existence. Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the

women farmers traditionally at a disadvantage vis vis their male counterparts in access to resources and extension can serve to enhance women s agency and collective action in agricultural value chains We used 59 key informant interviews and nine focus group discussions to examine the constraints to and facilitators of women s and men s participation in three women only FPOs in Jharkhand an eastern Indian state Additionally we study the gender and power dynamics in such FPOs and the potential of collective efficacy to enhance agricultural and empowerment outcomes The FPO intervention we evaluated was supported by an NGO that provides FPO members with both agricultural and gender based inputs to improve agronomic practices market linkages agricultural yields and profits and the role of women both within the FPO and within their households and communities In this paper we provide contextual insights on what works to empower women in this context Women s perceptions of the benefits from FPO membership were heterogeneous Our qualitative analysis suggests a nuanced picture of women s autonomy and decision making within and outside their household further shaped by women s and men s perception of shifts in women s access to resources and services The emerging lessons provide inputs for development implementers and policymakers to recognize diverse contextual barriers in designing FPO interventions to enable and enhance women empowerment outcomes The research also contributes to the body of knowledge on local gender norms and understanding of empowerment
