Scott,1990-03-05 Each book in this series is designed to make available to students important new work on key historical problems and periods that they encounter Each volume devoted to a central topic or theme contains specially commissioned essays from scholars in the relevant field These provide an assessment of a particular aspect pointing out areas of development and controversy and indicating where conclusions can be drawn or where further work is necessary while an editorial introduction reviews the problem or period as a whole In this text the contributors assess reform and reformers in late 18th century Europe covering such topics as Catherine the Great the Danish reformers the Habsburg Monarchy and events in Spain and Italy *Thomas Hobbes and Political Theory* Mary G. Dietz,1990 The eight essays in this volume celebrated the 400th birthday of the English political thinker Thomas Hobbes **Dictionary of Modern Political Ideologies** Michael A. Riff,1987 **Time's Reasons** Leonard Krieger,2015-03-12 This original work caps years of thought by Leonard Krieger about the crisis of the discipline of history His mission is to restore history's autonomy while attacking the sources of its erosion in various new histories which borrow their principles and methods from disciplines outside of history Krieger justifies the discipline through an analysis of the foundations on which various generations of historians have tried to establish the coherence of their subject matter and of the convergence of historical patterns The heart of Krieger's narrative is an insightful analysis of theories of history from the classical period to the present with a principal focus on the modern period Krieger's exposition covers such figures as Ranke Hegel Comte Marx Acton Troeltsch Spengler Braudel and Foucault among others and his discussion involves him in subtle distinctions among terms such as historicism historicism and historicity He points to the impact on history of academic political radicalism and its results the new social history Krieger argues for the autonomy of historical principles and methods while tracing the importation in the modern period of external principles for historical coherence *Time's Reasons* is a profound attempt to rejuvenate and restore integrity to the discipline of history by one of the leading masters of nineteenth and twentieth century historiography As such it will be required reading for all historiographers and intellectual historians of the modern period **A History of Western Public Law** Bruno Aguilera-Barchet,2014-12-31 The book outlines the historical development of Public Law and the state from ancient times to the modern day offering an account of relevant events in parallel with a general historical background establishing and explaining the relationships between political religious and economic events **The Black Hole of Empire** Partha Chatterjee,2012-04-08 When Siraj the ruler of Bengal overran the British settlement of Calcutta in 1756 he allegedly jailed 146 European prisoners overnight in a cramped prison Of the group 123 died of suffocation While this episode was never independently confirmed the story of the black hole of Calcutta was widely circulated and seen by the British public as an atrocity committed by savage colonial subjects The Black Hole of

Empire follows the ever changing representations of this historical event and founding myth of the British Empire in India from the eighteenth century to the present Partha Chatterjee explores how a supposed tragedy paved the ideological foundations for the civilizing force of British imperial rule and territorial control in India Chatterjee takes a close look at the justifications of modern empire by liberal thinkers international lawyers and conservative traditionalists and examines the intellectual and political responses of the colonized including those of Bengali nationalists The two sides of empire s entwined history are brought together in the story of the Black Hole memorial set up in Calcutta in 1760 demolished in 1821 restored by Lord Curzon in 1902 and removed in 1940 to a neglected churchyard Challenging conventional truisms of imperial history nationalist scholarship and liberal visions of globalization Chatterjee argues that empire is a necessary and continuing part of the history of the modern state

Authority Frank Furedi, 2013-09-12 Concern with authority is as old as human history itself Eve s sin was to challenge the authority of God by disobeying his rule Frank Furedi explores how authority was contested in ancient Greece and given a powerful meaning in Imperial Rome Debates about religious and secular authority dominated Europe through the Middle Ages and the Reformation The modern world attempted to develop new foundations for authority democratic consent public opinion science yet Furedi shows that this problem has remained unresolved arguing that today the authority of authority is questioned This historical sociology of authority seeks to explain how the contemporary problems of mistrust and the loss of legitimacy of many institutions are informed by the previous attempts to solve the problem of authority It argues that the key pioneers of the social sciences Marx Durkheim Simmel Tonnies and especially Weber regarded this question as one of the principal challenges facing society

Defoe's Footprints Robert M. Maniquis, Carl Fisher, 2009-01-01 In Defoe s Footprints essays by prominent scholars

of eighteenth century literature salute Maximilian E Novak's influence upon the study of Daniel Defoe. Best known today as the author of Robinson Crusoe, Defoe was a prolific writer in the late seventeenth and early eighteenth centuries who wrote novels, essays, pamphlets, and poems. Widely extending Novak's perspectives, this volume explores Defoe's place in the English novel and in literary developments of mimesis, realism, and popular mythology. The contributors locate Defoe in new ways within the complex symbolism and discourse of a turbulent world of burgeoning capitalism, Protestantism, imperialism, and economic speculation. With attention to Defoe's neglected writings as well as to his important works, this volume uncovers his distance from and influence on modern literature, paying tribute to Maximilian E Novak by presenting new ideas about and new readings of Daniel Defoe.

Revolutionary Contagion and International Politics Chad E. Nelson, 2022. A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations. When do leaders fear that a revolution elsewhere will spread to their own politics and what are the international effects of this fear? In *Revolutionary Contagion*, Chad E. Nelson develops and tests a theory that explains how states react to ideological-driven revolutions that have occurred in other nations. To do this, he analyzes four key revolutionary movements over two centuries: liberalism, communism, fascism, and Islamism. He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries. According to the theory, Nelson argues, fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents. In other words, leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state. A powerful theory of the profound effects revolutions have on international relations, this book shows why one simply cannot make sense of international politics, including patterns of alliances and wars, in certain situations without considering the fear of contagion.

Russia Yegor Gaidar, 2012-11-02. An important Russian economist and politician takes a long view of economic history and Russia's development. It is not so easy to take the long view of socioeconomic history when you are participating in a revolution. For that reason, Russian economist Yegor Gaidar put aside an early version of this work to take up a series of government positions as Minister of Finance and as Boris Yeltsin's acting Prime Minister in the early 1990s. In government, Gaidar shepherded Russia through its transition to a market economy after years of socialism. Once out of government, Gaidar turned again to his consideration of Russia's economic history and long-term economic and political challenges. This book, revised and updated shortly before his death in 2009, is the result. Gaidar's account of long-term socioeconomic trends puts his country in historical context and outlines problems faced by Russia and other developing economies that more developed countries have already encountered: aging population, migration, evolution of the system of social protection, changes in the armed forces, and balancing stability and flexibility in democratic institutions. This is not a memoir, but Gaidar points out, neither is it written from the position of a man who spent his entire life in a research institute. Gaidar's long view is inevitably informed and enriched by his experience in

government at a watershed moment in history
