Among them, the laws that govern relationships between spouses are of crucial importance because they imply rules of how a divorce should take place.

Many aspects stand for grounds for divorces, but once they emerge, specific laws and regulations should be implemented to help people dissolve their marriages. It is so because healthy relationships are essential to the psychological well-being of individuals. Thus, divorce law is a crucial component of the legislation that regulates established relationships between spouses, has its own history, and is applied to solve many significant cases.

Essays in the History of Canadian Law Christopher English, 2005-12-15

The study of Canadian legal history has seen a remarkable growth in the past decade nowhere more so than in Atlantic Canada Given its early settlement and some of the liberties taken with legal procedure there as well as some creative interpretations of English law the region is ripe for close study in the legal history field This new collection examines that history on two islands Newfoundland and Prince Edward Island The essays examine legal themes developments and disputes and offer a framework for comparing ways of administering justice through the courts in the eighteenth and nineteenth centuries The cases examined are particularly interesting for the light they throw on legal process and especially on the motives of the parties Unlike in contemporary England and Upper Canada the English precedents gave way to local needs as equitable regimes emerged that put family and community interests first and treated all members of the family in ways tailored to their personal needs and circumstances This volume which includes a number of essays examining women's legal status and access to the courts is a comprehensive and fascinating examination of legal history in two Canadian provinces

Islamic substantive law otherwise called branches of the law *furu al fiqh* covers the textual provisions and jurisprudential rulings relating to specific transactions under Islamic law It is to Islamic substantive law that the rules of Islamic legal theory are applied The relationship between Islamic legal theory and Islamic substantive law is metaphorically described by Islamic jurists as a process of cultivation *istithmar* whereby the qualified jurist *mujtahid* as the cultivator uses relevant rules of legal theory to harvest the substantive law on specific issues in form of fruits *thamarat* from the sources The articles in this volume engage critically with selected substantive issues in Islamic law including family law law of inheritance law of financial transactions criminal law judicial procedure and international law *al siyar* These areas of substantive law have been selected due to their contemporary relevance and application in different parts of the Muslim world today The volume features an introductory overview of the subject as well as a comprehensive bibliography to aid further research

**The American catalogue of books (original and reprints), published in the United States** James Kelly, 1871      **Essays on Private Law** Ian F.G. Baxter, 1966-12-15 This book contains a series of essays on conflict laws including jurisdiction of the courts choice of law *renvoi* property recognition of family status and recognition of foreign corporations It is not a text book but an analysis and criticism of existing principles with recommendations for reform and for a different approach to the subject In general an approach is advocated that will be simpler and less abstract and doctrinaire than at present and better integrated with the ordinary laws of the forum The recommendations made could be thought of as principles on which to build a reform of conflict of laws or a model code The first two chapters deal with jurisdiction and choice of law two distinct topics with different considerations of policy which have not always been kept distinct by judges and text writers The third chapter considers certain questions of legal interpretation mainly in the construction of money obligations expressed in a foreign currency This shows a working out of the problems of contract analysis and interpretation which are dealt with more generally in other chapters Another chapter discusses property law a branch of the law which has been influenced historically by the doctrine of *situs* and the recognition of status in family law and in corporation law The concluding chapter draws together the main results of the preceding discussion and states from basic principles one of which is that there is a

need for greater unity between the conflict rules and the general law and for allowing where appropriate the influence of legal systems other than that of the forum Professor Baxter's discussion clearly shows that the complexity of current legal theory can lead to unjust rulings in the courts and his case for greater simplification is argued compellingly
