Essays On Spiritual Psychology Reflections On The Thought Of Emanuel Swedenborg:

Essays on Spiritual Psychology Carolyn Blackmer, 1991 Two essays examining the thought of Swedish scientist and theologian Emanuel Swedenborg 1688 1772 from a psychological perspective **International Handbook of the Religious, Moral and Spiritual Dimensions in Education** Marian de Souza, Gloria Durka, Kathleen Engebretson, Robert Jackson, Andrew McGrady, 2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it is today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world The Four Virtues Tobin Hart, 2014-02-04 Find meaning wholeness and spiritual depth with this field guide to the inner life that explores and integrates four essential virtues Presence Heart Wisdom and Creation In a world with greater knowledge more advanced technology and more groundbreaking innovation than ever at our fingertips we are still looking to find our way We are still searching for that essential insight on how to lead a really good life By drawing from across tradition and time from neuroscience to ancient wisdom Tobin Hart reveals that we all possess four essential virtues Presence Heart Wisdom Creation that help us to build balance and integrate our psychological and spiritual life on earth While these virtues may be universal the way they live in each of us is unique With the Spiritual Assessment Matrix SAM and expert practices and tools this highly accessible thought provoking guide shows us how to grow and activate these powers from the inside out When in balance these four virtues serve as a field guide to the inner life bringing you heart and wisdom as well as helping you recognize beauty rekindle awe and find your own voice *The Journal of Transpersonal Psychology*, 2000 Reflections on the Principles of Psychology Michael G. Johnson, Tracy B. Henley, 2013-04-15 This important volume looks back to 1890 and 100 years later asks some of the same questions William James was asking in his Principles of Psychology In so doing it reviews our progress toward their solutions Among the contemporary concerns of 1990 that the editors consider are the nature of the self and the will conscious experience associationism the basic acts of cognition and the nature of perception Their findings Although the developments in each of these areas during the last 100 years have been monumental James views as presented in the Principles still remain viable and provocative To provide a context for understanding James some

chapters are devoted primarily to recent scholarship about James himself focusing on the time the Principles was written relevant intellectual influences and considerations of his understanding of this new science of psychology The balance of this volume is devoted to specific topics of particular interest to James One critical theme woven into almost every chapter is the tension between the role of experience or phenomenological data within a scientific psychology and the viability of a materialistic or biologically reductive account of mental life Written for professionals practitioners and students of psychology in all disciplines

The New Philosophy; ,1998

From Information to Transformation Tobin Hart,2001

From Information to Transformation is about remembering what matters in education and in life In many ways it concerns who we are and how we know Drawing largely from the wisdom traditions transpersonal psychology and pedagogy a map of the depths of knowing and learning is constructed that unfolds through six interrelated layers information knowledge intelligence understanding wisdom and transformation This provides both a process and a direction for education students and teachers can engage these layers in a single moment or over the course of an assignment Entering into these depths offers an education that is both practical and remarkable one that replaces radical disconnection with radical amazement It includes the education of the mind and the heart balances intuition with the analytic and mastery with mystery emphasizes community character and creativity and cultivates wisdom over the mere accumulation of facts

Psychosis, Psychiatry and Psychospiritual Considerations Brian Spittles,2022-11-29 A phenomenological and spiritual investigation of anomalous mental experiences From a psychiatric perspective psychosis is generally viewed as a psychopathological and often incomprehensible mental disorder of biological cause In his book Brian Spittles argues that this represents a rather limited view and that a psychospiritual investigation of psychosis may enable a better understanding of its nature and determinants His aim is not to negate the discipline of psychiatry but to demonstrate the viability and efficacy of incorporating psychospiritual considerations into psychosis research Within these pages Spittles challenges several core psychiatric beliefs and calls for the discipline to extend its investigative parameters beyond the limited epistemological bounds of materialism The book uses an open ended heuristic approach that enables the systematic examination and critical appraisal of views on psychosis across the materialist to metaphysical spectrum This is structured in four Focal Settings that sequentially examine the construal of psychosis within different paradigms of psychospiritual understanding which provide a historical overview of evolving understandings of psychosis within the tradition of psychiatry in which psychospiritual matters are generally not considered
