A History of Sociology in Britain A. H. Halsey, 2004-03-18 This is the first ever critical history of sociology in Britain written by one of the world's leading scholars in the field Renowned British sociologist A H Halsey presents a vivid and authoritative picture of the neglect expansion fragmentation and explosion of the discipline during the past century He is well equipped to write the story having lived through most of it and having taught and researched in Britain the USA and Europe The story begins with L T Hobhouse's election to the first chair in sociology in London in 1907 but traces earlier origins of the discipline to Scotland and the English provinces There is a lively account of the nineteenth century battles between literature and science for the possession of the third culture of social studies setting the context for a narrative history of rapid expansion in the second half of the twentieth century LSE had a virtual monopoly before World War II The educational establishment of Oxford and Cambridge opposed its introduction into the undergraduate curriculum Only the expansion of sociology to the Scottish Welsh provincial and new universities after the Robbins Report of 1963 brought reluctant acceptance of the subject to Oxford and Cambridge The student troubles of 1968 are then described and the subsequent doubts confrontations and cuts of the 1970s and 80s Then paradoxically by a Conservative Government there was a new university expansion incorporating polytechnics and other colleges with a consequent doubling of both staff and students in the 1990s Yet the end of the century left sociology riven by intellectual conflict It had survived the Marxist subversions of the 70s and the feminist invasion Yet the renewed challenges of various forms of relativism especially ethno methodology and post modernism still threatened and at root the war was as it began between a scientific quantifying and explanatory subject and a literary interpretative set of cultural studies

Michael Young, Social Science, and the British Left, 1945-1970 Lise Butler, 2020-09-02 In post war Britain left wing policy maker and sociologist Michael Young played a major role in shaping British intellectual political and cultural life using his study of the social sciences to inform his political thought In the mid twentieth century the social sciences significantly expanded and played a major role in shaping British intellectual political and cultural life Central to this intellectual shift was the left wing policy maker and sociologist Michael Young As a Labour Party policy maker in the 1940s Young was a key architect of the Party's 1945 election manifesto Let Us Face the Future He became a sociologist in the 1950s publishing a classic study of the East London working class Family and Kinship in East London with Peter Willmott in 1957 which he followed up with a dystopian satire The Rise of the Meritocracy about a future society in which social status was determined entirely by intelligence Young was also a prolific social innovator founding or inspiring dozens of organisations including the Institute of Community Studies the Consumers Association Which

magazine the Social Science Research Council and the Open University Moving between politics social science and activism Young believed that disciplines like sociology psychology and anthropology could help policy makers and politicians understand human nature which in turn could help them to build better political and social institutions This book examines the relationship between social science and public policy in left wing politics between the end of the Second World War and the end of the first Wilson government through the figure of Michael Young Drawing on Young s prolific writings and his intellectual and political networks it argues that he and other social scientists and policy makers drew on contemporary ideas from the social sciences to challenge key Labour values like full employment and nationalisation and to argue that the Labour Party should put more emphasis on relationships family and community Showing that the social sciences were embedded in the project of social democratic governance in post war Britain it argues that historians and scholars should take their role in British politics and political thought seriously

[Leisure, citizenship and working-class men in Britain, 1850-1940](#) Brad Beaven, 2013-07-19 From the bawdy audience of a Victorian Penny Gaff to the excitable crowd of an early twentieth century football match working class male leisure proved to be a contentious issue for contemporary observers For middle class social reformers from across the political spectrum the spectacle of popular leisure offered a view of working

class habits and a means by which lifestyles and behaviour could be assessed For the mid Victorians gingerly stepping into a new mass democratic age the desire to create a bond between the recently enfranchised male worker and the nation was more important than ever This trend continued as those in governance perceived that good leisure and citizenship could fend off challenges to social stability such as imperial decline the mass degenerate city hooliganism civic and voter apathy and fascism Thus between 1850 and 1945 the issue of male leisure became enmeshed with changing contemporary debates on the encroaching mass society and its implications for good citizenry Working class culture has often been depicted as an atomised and fragmented entity lacking any significant cultural contestation Drawing on a wealth of primary and secondary source material this book powerfully challenges these recent assumptions and places social class centre stage once more Arguing that there was a remarkable continuity in male working class culture between 1850 and 1945 Beaven contends that despite changing socio economic contexts male working class culture continued to draw from a tradition of active participation and cultural contestation that was both class and gender exclusive This lively and readable book draws from fascinating accounts from those who participated in and observed contemporary popular leisure making it of importance to students and teachers of social history popular culture urban history historical geography historical sociology and cultural studies

Colonized by Humanity Rob Waters, 2023-09-05 Colonization through a process of affection wrote the London based Barbadian novelist George Lamming in 1960 was the worst form of colonization Lamming's London was marked by the violent currents of racism some seen many disavowed But the operations of race the putting in place of its hierarchies the destructions of the self that its logics entailed exceeded only expressions of violence and hatred It was in affection too that colonialism's racial visions operated It was not only among the illiberals but among the liberals that colonization continued its hold on metropolitan culture This was colonization as Lamming would also put it by humanity Colonized by Humanity is a study of racial liberalism at the end of empire It uncovers the projects to cultivate racial integration developed in the two decades between the arrival of the Empire Windrush and the passage of the first Race Relations Act These were the years that integrationism took hold as a social phenomenon its reflexes lodged deep in an English culture that took the idea of tolerance as its watchword It was a culture that re-inscribed race even as it aimed at overcoming its discriminations Caribbean London is at the heart of this story It was in the capital that integration projects multiplied fastest and it was the multicultural capital that provided integrationism's imaginative geographies Viewing integrationism through the eyes of Caribbean Londoners Colonized by Humanity allows us to see it as they did with its colonial and racial dynamics up close

Sociology and Statistics in Britain, 1833-1979 Plamena Panayotova, 2020-09-28 At the beginning of the twentieth century Britain stood at the forefront of science and statistics and had a long and respected tradition of social investigation and reform But it still did not yet have a science of society When in the early 1900s a small band of enthusiasts got together to address this situation the scene was set for a grand synthesis No such synthesis ever took place and instead British sociology has followed a resolutely non-statistical path Sociology and Statistics in Britain 1833-1979 investigates how this curious situation came about and attempts to explain it from an historical perspective It uncovers the prevalence of a deep and instinctive distrust within British sociology of the statistical methodology and mindset resulting in a mix of quiet indifference and active hostility which has persisted from its beginnings right up to the present day While British sociology has thrived institutionally since the post-war expansion of higher education this book asks whether or not it is poorer for having failed to recognise that statistics provides the foundations for the scientific study of society and for having missed opportunities to build upon those foundations Ultimately this important revealing and timely book is about British sociology's refusal to come to grips with a modern scientific way of thinking which no discipline that aspires to an effective study of society can afford to ignore

Scott, 2014-07-18 Leading sociologists outline the historical development of the discipline in Britain and document its continuing influence in this essential and comprehensive reference work Spanning the Scottish enlightenment of the 18th century to the present day this Handbook maps the discipline and the British contribution

Placing the Public in Public Health in Post-War Britain,

1948-2012 Alex Mold, Peder Clark, Gareth Millward, Daisy Payling, 2019-05-16 This open access book explores the question of who or what the public is within public health in post war Britain Drawing on historical research on the place of the public in public health in Britain from the establishment of the National Health Service in 1948 the book presents a new perspective on the relationship between state and citizen Focusing on health education health surveys heart disease and the development of vaccination policy and practice the book establishes that the public was not one thing but many It considers how public health policy makers and practitioners imagined the public or publics These publics were not mere constructions they had agency and the ability to speak back to public health The nature of publicness changed during the latter half of the twentieth century and this book argues that the relationship between the public and public health offers a powerful lens through which to examine such shifts

The Rise of Data in Education Systems Martin Lawn, 2013-05-13 The growth of education systems and the construction of the state have always been connected The processes of governing education systems always utilized data through a range of administrative records pupil testing efficiency surveys and international projects By the late twentieth century quantitative data had gained enormous influence in education systems through the work of the OECD the European Commission and national system agencies The creation and flow of data has become a powerful governing tool in education Comparison between pupils costs regions and states has grown ever more important The visualization of this data and its range of techniques has changed over time especially in its movement from an expert to a public act Data began to be explained to a widening audience to shape its behaviours and its institutions The use of data in education systems and the procedures by which the data are constructed has not been a major part of the study of education nor of the histories of education systems This volume of contributions drawn from different times and spaces in education will be a useful contribution to comparative historical studies

Difficult Folk? David Mills, 2008 How should we tell the histories of academic disciplines All too often the political and institutional dimensions of knowledge production are lost beneath the intellectual debates This book redresses the balance Written in a narrative style and drawing on archival sources and oral histories it depicts the complex pattern of personal and administrative relationships that shape scholarly worlds Focusing on the field of social anthropology in twentieth century Britain this book describes individual departmental and institutional rivalries over funding and influence It examines the efforts of scholars such as Bronislaw Malinowski Edward Evans Pritchard and Max Gluckman to further their own visions for social anthropology Did the future lie with the humanities or the social sciences with addressing social problems or developing scholarly autonomy This new history situates the discipline's rise within the post war expansion of British universities and the challenges created by the end of Empire

Transformations of Retailing in Europe after 1945 Lydia Langer, 2016-02-17 After World War II structures practices and the culture of retailing in most West European countries went through a period of rapid change The post war economic boom the emergence of a mass consumer society and the adaptation of innovations which already had been implemented in the USA

during the interwar period revolutionized the world of getting and spending But the implementation of self service and the supermarket the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe This volume presents a series of case studies looking at transformations of retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing

Dead Men's Propaganda Terhi

Rantanen,2024-05-07 In *Dead Men's Propaganda Ideology and Utopia in Comparative Communications Studies* Terhi Rantanen investigates the shaping of early comparative communications research between the 1920s and 1950s notably the work of academics and men of practice in the United States Often neglected this intellectual thread is highly relevant to understanding the 21st century's challenges of war and rival streams of propaganda Borrowing her conceptual lenses from Karl Mannheim and Robert Merton Rantanen draws on detailed archival research and case studies to analyse the extent and importance of work outside and inside the academy illuminating the work of pioneers in the field Some of these were well known academics such as Harold Lasswell and the authors of the seminal book *Four Theories of the Press* Others operated in the world of news agencies such as Associated Press's Kent Cooper or were marginalised as migr scholars notably Paul Kecskemeti and Nathan Leites Her study shows how comparative communications from its very beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them The close relationship between these two concepts resulted in a bias in knowledge production contributed to dominant narratives of generational conflicts and to the demarcation of Insiders and Outsiders By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century this book challenges orthodoxies in the intellectual histories of communication studies
