Odysseas Kopsidas

Department of Industrial Management and Technology, University of Piraeus, Piraeus 18534, Greece

Abstract: This paper is about essays on political economy. These essays are about interdisciplinary proportions in the study of economics, the economic education as a communication laboratory between tax communication and society, determining the excellent number of students/three who participate in the formation of an innovative educational program for social relations between students/three with rational criteria, the tax obligations and religious freedom, the methodology from macro to micro economic analysis in education of management of environmental goods, the assumptive assessment method for assessing the will of citizens to participate in the excavation and restoration of the ancient theater of Leffkada, the public evaluation of aesthetic pollution in a democracy. Cooperation between the private and public sectors can improve the urban environment and the position of socially vulnerable groups by the “invisible hand” of the economy according to Adam Smith’s theory.

Key words: Goods, benefit public, cost, environment, optimization.

1. Interdisciplinary Proportions in the Study of Economics

The interdisciplinary approach is both the cause and the result of the synergy that develops between the various branches of science. Economics borrows tools and methods of analytical approach from other sciences in order to complete its contribution to knowledge. Thus the main economic problem associated with the unlimited needs of the people and the limited means available to meet these needs begins with the theological teaching of the Old Testament and the expulsion of the first ones from the Garden of Eden. The “Invisible Hand” that leads the economy to the optimal level of prosperity is another presentation of the “Invisible Hand” of Divine Providence, as it appears in the works of Thomas Aquinas. The decisions of the civil courts that are called upon to assess money are usually non-market goods using the WTP-WTA (Willingness to Pay, Willingness to Accept) Experimental Economics method. Criminal court decisions weigh the costs and benefits to social welfare of each decision by

applying a CBA (Cost-Benefit Analysis) method. But also the economics of labor presents the work produced by the worker expressed not in units of energy but in monetary units (wages), while the surplus of energy that the entrepreneur reaps in order for the system to benefit him, is presented as business profit. In these and other cases, finding interdisciplinary proportions leads the researcher to take a holistic approach to the knowledge and science of economics and the functioning of society [1, 2].

2. Economic Education as a Communication Laboratory between Tax Communication and Society

The purpose of this work is to analyze the importance of economic education as a tool of communication between the tax administration and society, as well as the interpretation of taxation (direct-indirect) in the context of tax education, as well as the promotion of social justice they involve direct taxes as opposed to indirect taxes. Initially, a theoretical approach is made to the general concepts and principles governing tax law. Then the Greek tax and fiscal system is presented, in combination with the harmonization of tax legislation in the context of EU (Community) law in accordance with the instructions
