and internationalization challenge the realm of jurisprudence to an extraordinary degree. The division in special fields and the relationship with other social sciences necessitate critical reevaluation in view of many interactions. Cross references between commercial law regulation and private autonomous arrangement distinctly show this development. Jurisprudence emerging beyond Germany has to deal with such challenges. The law of financial services serves as an example of the cross section material from private law and public commercial law. This takes into account the series at hand in terms of content and method. In addition to banking capital market and financial law as the main emphasis, corporate law, competition law, cartel law, intangible property rights, insolvency law, and also labor law show similar overlaps. The intensive internationally oriented treatment of the overlaps of classical private law in particular contractual law and commercial law promise a bountiful yield especially on the European level under the summarizing aspect of corporate law. The outstanding monography also finds its place in the series as well as the conference volume works in German and also occasional works in English. There are economically aligned works in addition to juridical works constituting the main emphasis. Works pertaining to Europeanization and internationalization are compiled in the series which convey commercial law and commercially conceived private law in an outstanding manner.

**Subject Guide to Books in Print**, 1997      *Global Securities Litigation and Enforcement* Pierre-Henri Conac, Martin Gelter, 2019-01-03. *Global Securities Litigation and Enforcement* provides a clear and exhaustive description of the national regime for the enforcement of securities legislation in cases of misrepresentation on financial markets. It covers 29 jurisdictions worldwide, some of them are important although their law is not well known. It will be an invaluable resource for academics and students of securities litigation as well as for lawyers, policy makers and regulators. The book also provides a comprehensive contribution to the debate on whether public or private enforcement is preferable in terms of development of securities markets. It will appeal to those interested in the legal origins theory and in comparative securities law and shows that the classification of jurisdictions within legal families does not explain the differences in legal regimes. While US securities law often serves as a model for international convergence, some of its elements such as securities class actions have not been adopted worldwide.

**The Foundations of European Transnational Private Law** Anna Beckers, Hans-W. Micklitz, Rodrigo Vallejo, Pia Letto-Vanamo, 2024-05-30. Since Anu Bradford's groundbreaking book on the Brussels Effect, there is a vastly evolving literature on the EU as a global regulatory actor as well as the global reach of EU law. This edited collection connects to this debate. Yet it shifts the focus from the currently predominant public law focus to investigating European and EU private law and to connecting to literature and research on transnational law. To that end, it proceeds first conceptually by introducing and giving shape to the notion of a European Transnational Private Law through four conceptual contributions by the editors. Secondly, it focuses on several sectors: finance, taxation, investment, consumer law, labour law, and topics: climate litigation, global value chains, non-discrimination, to trace sector specifically the role of EU private law in relation to transnational legal ordering.      *The*

*European Union and Global Financial Regulation* Lucia Quaglia, 2014-06-26 The European Union and Global Financial Regulation examines the influence of the European Union EU in regulating global finance addressing several inter related questions Why does the EU upload international financial regulation in some cases download it in other cases and cross load either actively or passively in other instances Has this changed over time especially after the third stage of Economic and Monetary Union and the completion of the single financial market or after the global financial crisis Under what conditions is the EU more or less likely to upload download or cross load rules Through which mechanisms does this take place Overall does the EU act as a pace setter in regulating global finance or is it mainly a follower Why The key explanatory variable used in this research is the concept of regulatory capacity applied to the EU and the US distinguishing between strong and weak regulatory capacity The influence of the EU in global financial regulation depends on the combinations of EU and US regulatory capacities When EU regulatory capacity is weak and US regulatory capacity is strong the US will mainly upload its domestic rules internationally and or actively cross load them to the EU whereas the EU will mainly download international rules When the EU regulatory capacity is strong and US regulatory capacity is weak the EU is able to upload its rules internationally and or actively cross load them to third countries When the EU and the US regulatory capacities are weak private sector governance prevails When the EU and US regulatory capacities are strong both jurisdictions seek to upload and cross load their domestic rules
