Beyond the Congregation Christopher P. Scheitle, 2010-09-30 Christianity in the United States has long been organized around congregations and denominations However a different type of organization operating outside of these traditional structures is claiming an increasingly important place in the religious market The growth of Christian nonprofits popularly called parachurch organizations has been recognized by churchgoers and social scientists alike as an important development that is transforming the composition and dynamics of American Christianity The size resources and activities of this population have made it the public face of American Christianity and altered the relationship between individuals churches and denominations Beyond the Congregation utilizes data on almost 2 000 of the largest and most influential Christian nonprofits in the United States to answer some of the key questions raised by these organizations What explains the growth of Christian nonprofits What activities are they pursuing How are they funded and how do they use those funds Beyond the Congregation provides a much needed examination of these issues that is accessible and informative for scholars nonprofit executives religious leaders and the general public

Offerings of the Heart Shawn Israel Zevit, 2005-09-06 Nadiv Lev Offerings of the Heart This phrase sets the tone for the Jewish spiritual perspective that money is a tool for actualizing God's presence in the world Building on this core value and setting aside the financial spiritual split with which many congregational leaders operate Rabbi Shawn Zevit brings the depth and breadth of Jewish teachings on money and the spiritual life to all faith communities This book provides texts and tools to help clergy staff and lay leaders of congregations of any faith approach financial and other resources as core means to build and maintain whole and holy lives in a communal setting Zevit demonstrates how faith communities can create values based approaches to developing and managing financial and human resources that are rooted in the very sacred traditions principles and impulses that bring us together Rabbi Shawn Zevit has gathered much of the wisdom of the Jewish community learned through four millennia of life with God He

shows us the rich thought and experience Hebrew scriptures and traditions contribute for all who seek to be faithful in the use of money in their communities A deep understanding of generosity and giving is brought to bear on the practicalities of budgets planning and reaching out in deeds of justice and mercy Loren B Mead founding president The Alban Institute

Basic Interests Frank R. Baumgartner, Beth L. Leech, 1998-03-23 A generation ago scholars saw interest groups as the single most important element in the American political system Today political scientists are more likely to see groups as a marginal influence compared to institutions such as Congress the presidency and the judiciary Frank Baumgartner and Beth Leech show that scholars have veered from one extreme to another not because of changes in the political system but because of changes in political science They review hundreds of books and articles about interest groups from the 1940s to today examine the methodological and conceptual problems that have beset the field and suggest research strategies to return interest group studies to a position of greater relevance The authors begin by explaining how the group approach to politics became dominant forty years ago in reaction to the constitutional legal approach that preceded it They show how it fell into decline in the 1970s as scholars ignored the impact of groups on government to focus on more quantifiable but narrower subjects such as collective action dilemmas and the dynamics of recruitment As a result despite intense research activity we still know very little about how groups influence day to day

governing Baumgartner and Leech argue that scholars need to develop a more coherent set of research questions focus on large scale studies and pay more attention to the context of group behavior Their book will give new impetus and direction to a field that has been in the academic wilderness too long Money For Change Susan Ostrander,2010-06-17 From the inside out this study of a democratic philanthropy probes the world of social movement funding **Discourse in the Professions** Ulla Connor,Thomas A. Upton,2004-11-30 This book explores the structure and use of academic and professional discourse through the lens of corpus linguistics The goal of this book is to show how insights from corpus linguistic analyses can help us better understand how we use academic and professional language and help us find ways to better train newcomers to the genres used in various professional contexts The contributions to this book show that specialized corpora of specific genres from a variety of fields allow us to make more relevant observations about the function and use of language for particular purposes The specialized corpora examined include written and spoken academic genres written and spoken business and legal genres and written philanthropic genres The book showcases a variety of approaches to analyzing the discourse of specialized corpora and each chapter concludes with a reflection on the practical and pedagogical implications of the analysis Living With Childhood Cancer Leigh A. Woznick,Carol D. Goodheart,2001-09-15 Like a natural disaster the diagnosis that your child has cancer can leave you and your family feeling helpless How do you explain the disease to the child and to his or her siblings How can you communicate your child s needs to the hospital staff What are the best ways to reduce the physical side effects and the emotional distress of treatment How will you your child or teenager and the rest of your family cope with cancer and what can you do to help When and where do you find good psychological help for your child or your family How do you manage financial and school issues How can you foster your child s development and self esteem More than 12 000 American children will be diagnosed with cancer this year and roughly 75% will survive In addition to excellent medical care their survival depends on a strong support network which may include parents siblings extended family members friends and neighbors classmates and teachers In this down to earth guidebook the authors draw on their own family s experience with cancer as well as their professional expertise and stories from others to help families address the psychological impact of cancer The result is a book filled with sound emotional guidance useful information and practical advice for families coping with cancer
