Holding, 2021-10-07 Both chess play and psychological research offer rewards to their participants in the form of intellectual satisfaction It seems to follow that combining these two forms of activity by carrying out research into chess play should be a particularly engaging enterprise In the mid 1980s enough was now known for it to be feasible to tell a reasonably satisfying story by piecing together the accumulated results of experiments on chess There were remaining gaps in knowledge but the structure of chess skill had at least become sufficiently evident to exhibit where the gaps lay Originally published in 1985 this book was an attempt to summarize the progress that had been made at the time recounting some of the components of the research process while describing how the chessplayer seems to think imagine and decide

2015 Accordingly approaches to decision making and accounting at the national and business levels have to be reconsidered Neoclassical Cost Benefit Analysis CBA with focus on the monetary dimension and an assumed consensus about a specific market ideology to be applied is not compatible with democratic societies where citizen and actors in other roles normally differ with respect to ideological orientation Environmental Impact Statements and Multi Criteria methods are used to some extent to broaden approaches to decision making In this book Positional Analysis is advocated as a multidimensional and ideologically open approach Positional Analysis is based on a political economic conceptual framework as part of ecological economics that differs from neoclassical ideas of individuals firms and markets And since approaches to decision making and to accounting are closely connected a new theoretical perspective in economics similarly raises issues of how national and business accounting can be opened up to meet present demands among various actors in society This perspective raises also numerous ethical questions at the science and policy interface that need to be properly addressed for sustainability decision making
