rural areas to live in increasingly uninhabitable cities disadvantaged teenage girls unable to meet their aspirations due to social strictures internal mutiny messy geopolitics from the rise of China and a political and business class whose interests are in conflict with a majority of the population Shastri challenges conventional thinking about Asia's place in the world and the book is essential reading for those with an interest in the continent's future Related Link's *Low-carbon, Sustainable Future in East Asia* Socheol Lee, Hector Pollitt, Seung-Joon Park, 2015-08-27 East Asia is a key region in the global economy including both the second and third largest global economies already and led by China continuing to expand at a rapid rate This economic growth has led to unprecedented gains in prosperity in the region but it has also led to increasing environmental pressures and energy issues This book assesses ways in which East Asia can continue or even increase existing rates of economic growth while at the same time reducing greenhouse gas emissions and other environmental degradation Using advanced modelling approaches future scenarios for four East Asian countries are assessed in detail including analysis of particular challenges in each country e.g. coal power in China nuclear power in Japan Prospects for each country's energy system are assessed in detail and the potential effects of various types of Environmental Tax Reform in the four countries are also considered carefully The final section of the book explores the interaction between trade liberalization a key driver of growth and emission levels in the East Asia region **The Future of the Asia-Pacific Economic**

The Future of the Gulf Region Arno Tausch, 2021-08-09 This book studies values and attitudes in the Gulf region In light of global power shifts the threatening collapse of internal security in the West and uncertainty about the current leadership vacuum in world society this book explores a future leading role of the Gulf countries in such institutions as the G 20 and the OECD Based on rigorous analysis of macro level data and opinion surveys with relevance for the Gulf region it analyzes the global macro factors shaping the Gulf's future at a time of the global COVID 19 crisis and depression and rising global tensions Starting with an empirical time series analysis of the long cycles of global politics and economics it highlights the implications for the Gulf region Offering a multivariate analysis of civil society values in the Gulf the author analyzes value changes and attitudes on antisemitism political Islam internal security democracy and other issues of Arab politics The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf's civil society and

strongly suggest that the Gulf's future is rather with the free societies of the West and not with a Neo Ottoman Empire in whatever form Exceptional in scope and right up to the minute in coverage Brian M Pollins Associate Professor Emeritus The Ohio State University An outstanding and topical book by an astute scholar of the MENA region Professor Hussein Solomon Academic Head of Department Political Studies and Governance University of the Free State South Africa The most comprehensive and insightful study on the subject to date Manfred B Steger Professor of Sociology University of Hawai'i at Manoa and Global Professorial Fellow Western Sydney University *East Asia's Monetary Future* Suthiphand Chirathivat, Emil Maria Claassen, Jürgen Schroeder, 2005-01-01 Leading scholars from East Asia Europe and the US contribute new insights to the key questions facing the organization and future of the monetary system in East Asia Central questions discussed and analysed in the book include amongst others should the region move towards monetary union Should countries peg their exchange rates to the US dollar Is complete dollarization an option for East Asia The authors argue that having realized price stability over the last twenty years in contrast to Latin America and Africa the next logical step would be the gradual formation of various currency blocs within the region This comprehensive discussion of the fundamental issues at stake will ensure the book's appeal to academics and researchers of Asian studies and financial economics Financial experts working in this area and policymakers will also find much of interest to them within this book
