

The Elementary and Secondary Education Act of 1968 (ESEA) was an extraordinary landmark in the history of American education. For the first time in over a century of attempts to legislate federal general aid to education, Congress took positive action toward solving the greatest problems facing this country—poverty and ignorance, both rooted in the inequalities of the American education system.

ESEA—The Office of Education Administers a Law. Stephen K. Bailey and Edith K. Mosher. Syracuse, N.Y.: Syracuse University Press, 1968, pp. xviii+393, \$10.

This book is a study in public administration. It is the story of the role played by the U.S. Office of Education, an agency of previously minor importance, in developing and administering Public Law 89-10 (ESEA). The new law, with its massive infusion of funds and authority, demanded a strong agency, courageous leaders, and a new outlook.

The time of this case study covers two years—spring of 1964 to spring of 1966. Extended interviews and extensive readings are the base of the study.

Following a scholarly first chapter on the historical setting, the authors pitch right into the politics of the passage of Public Law 89-10. The Democratic landslide of November 1964, President Johnson's interest in improving educational quality and opportunity, and Democratic majorities in both the Senate and the House all contributed to a favorable political climate. Francis Keppel, Commissioner of Education, played a key role as an intermediary broker of ideas.

"A package format of five separate titles for the bill was one of the devices employed by the architects of ESEA to grant a variety of benefits, while denying to each protagonist his full range of demands."

Title I, Better Schooling for Educationally Deprived Children, accounted for five-sixths of the total funds authorized for ESEA. It "offered an ingenious balance of power among levels of government, an interweaving of specific and ambiguous program parameters, and a mingling of short- and long-range objectives. Even so, its authors concluded that it alone would fully satisfy neither

The Ordeal of Equality David K. Cohen, Susan L. Moffitt, 2010-02-28 American schools have always been locally created and controlled But ever since the Title I program in 1965 appropriated nearly one billion dollars for public schools federal money and programs have been influencing every school in America What has been accomplished in this extraordinary assertion of federal influence What hasn't? Why not? With incisive clarity and wit David Cohen and Susan Moffitt argue that enormous gaps existed between policies and programs and the real world practices that they attempted to change Learning and teaching are complicated and mysterious So the means to achieve admirable goals are uncertain and difficult to develop and sustain particularly when teachers get little help to cope with the blizzard of new programs new slogans new tests and new rules Ironically as the authors observe the least experienced and least well trained teachers are often in the most needy schools so federal support is compromised by the inequality it is intended to ameliorate If new policies and programs don't include means to create the capability they require they cannot succeed We don't know what we need to enable states school systems schools teachers and students to use the resources that programs offer The trouble with standards based reform is that standards and tests still don't teach you how to teach **Report on Changes Under Chapter 1 of the Education Consolidation and Improvement Act** John Chrysostom Dougherty, 1985 Education and the State Carla Aubry, Michael Geiss, Veronika Magyar-Haas, Jürgen Oelkers, 2014-08-07 In most countries in the world school education is the business of the state Even if forms and functions differ the imparting of elementary knowledge is universally regarded as a public function Yet this is neither self evident nor self explanatory The degree of involvement of state agencies in the supervision financing and organization of the school system sometimes varies so much that the usual assumption of a common understanding of the state seems to be an illusion Making international comparisons and focusing strongly on the historical conditions of the current form of state education this volume paints a nuanced picture of how the relationship between education and state has been and is conceptualized Insights into this relationship are gained by considering and analysing both specific processes such as financing and bureaucracy and conceptual ideas for example community authority and political utopias The book presents comparative studies and analyses of regional and local conditions arguing that the history of each country or region is critical to educational success and the relationship between the education and the state must be reconsidered both internationally and historically in order to be of actual conceptual value Education and the State presents a broad variety of approaches and examples that provide a significant contribution to the understanding of the relationship
