French Trade in Istanbul in the Eighteenth Century Edhem Eldem, 2023-08-28 This work deals with French trade in Istanbul in the eighteenth century using French and Ottoman sources and integrating the political and social dimensions of the question It also sheds light on the financial dimension of trade particularly that of bills of exchange and monetary trade linking Istanbul to other Ottoman cities and to European financial centers Finally it tackles the issue of western economic penetration arguing that despite some signs of domination French control over the market was efficiently opposed by local actors that economic integration with the West was often realized on equal terms and that much of the domination witnessed toward the end of the century was in fact the result of French diplomatic leverage and of the gradual estrangement of non Muslim traders from the Ottoman commonwealth

Economic Life in Ottoman Europe Bruce McGowan, 1981 A painstaking study of Ottoman

records providing analyses of the economic fiscal and demographic situation **Society and Economy in Early Modern Europe, 1450-1789** Barry Taylor,1989 British Economic and Social History R. C. Richardson,William Henry Chaloner,1996 *A Social History of Western Europe, 1450-1720* Sheldon J. Watts,2017-07-06 This thoroughly readable and stimulating social history of Western Europe first published in 1984 explores the family religion and the supernatural and the social structure and social controls of rural society This title will be of interest not only to students but to anyone who is anxious to understand the lives both internal and external of rural people in his fascinating period that is so central to everyone s past Transitions to Capitalism in Early Modern Europe Robert S. Duplessis,1997-09-18 Between the end of the Middle Ages and the Industrial Revolution the long established structures and practices of European agriculture and industry were slowly disparately but profoundly transformed Transitions to Capitalism in Early Modern Europe first published in 1997 narrates and analyzes the diverse patterns of economic change that permanently modified rural and urban production altered Europe s economy and geography and gave birth to new social classes Broad in chronological and geographical scope and explicitly comparative the book introduces readers to a wealth of information drawn from throughout Mediterranean east central and western Europe as well as to the classic interpretations and current debates and revisions The study incorporates scholarship on topics such as the world economy and women s work and it discusses at length the impact of the emergent capitalist order on Europe s working people Revolution and Rebellion in the Early Modern World Jack A. Goldstone,2016-12-19 What can the great crises of the past teach us about contemporary revolutions Jack Goldstone shows the important role of population changes youth bulges urbanization elite divisions and fiscal crises in creating major political crises Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns triggered when inflexible political economic and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state elite relations Examining the great revolutions of Europe the English and French Revolutions and the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia but led to different outcomes In this 25th anniversary edition Goldstone reflects on the history of revolutions in the last twenty five years from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State In a new introduction he re examines his pioneering look at the role of population changes such as rising youth cohorts urbanization shifting elite mobility as continuing causal factors of revolutions and rebellions The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East Asia and Africa **The Great Divergence** Kenneth Pomeranz,2021-04-13 A landmark comparative history of Europe and China that examines why the Industrial Revolution emerged in the West The Great Divergence sheds light on one of the great questions of history Why did sustained industrial growth begin in Northwest Europe Historian Kenneth Pomeranz shows that as recently as 1750 life expectancy consumption

and product and factor markets were comparable in Europe and East Asia Moreover key regions in China and Japan were no worse off ecologically than those in Western Europe with each region facing corresponding shortages of land intensive products Pomeranz's comparative lens reveals the two critical factors resulting in Europe's nineteenth century divergence the fortunate location of coal and access to trade with the New World As East Asia's economy stagnated Europe narrowly escaped the same fate largely due to favorable resource stocks from underground and overseas This Princeton Classics edition includes a preface from the author and makes a powerful historical work available to new readers Town and Country in Europe, 1300-1800 S. R. Epstein, 2001 This 2001 book was the first survey of relations between town and country across Europe between 1300 and 1800 **Balkan Economic History, 1550-1950** John R. Lampe, Marvin R.

Jackson, 1982-06-22 Western economic historians have traditionally concentrated on the success stories of major developed economies while development economists have given most of their attention to the problems of the Third World The authors of this pioneering work study a part of Europe neglected by both approaches Modernizing patterns in Balkan economic history are traced from the sixteenth century when the territory was shared by Ottoman and Habsburg empires through the nineteenth century when they emerged as independent states to the end of World War II and its aftermath Despite present differences in economic systems Greece's private market economy Yugoslavia's planned market economy and the centrally planned economies of Romania Bulgaria and Albania the authors find that shared origins and common subsequent experiences are ample justifications for treating the area as an economic unit Balkan Economic History 1550-1950 will be a major case study for development economists and will provide historians with the first analytical and statistical study to survey the entire region from the start of the early modern period **The Sovereign State and Its Competitors** Hendrik Spruyt, 2020-05-05 The present international system composed of the most part of sovereign territorial states is often viewed as the inevitable outcome of historical development Hendrik Spruyt argues that there was nothing inevitable about the rise of the state system however Examining the competing institutions that arose during the decline of feudalism among them urban leagues independent communes city states and sovereign monarchies Spruyt disposes of the familiar claim that the superior size and war making ability of the sovereign nation state made it the natural successor to the feudal system The author argues that feudalism did not give way to any single successor institution in simple linear fashion Instead individuals created a variety of institutional forms such as the sovereign territorial state in France the Hanseatic League and the Italian city states in reaction to a dramatic change in the medieval economic environment Only in a subsequent selective phase of institutional evolution did sovereign territorial authority prove to have significant institutional advantages over its rivals Sovereign authority proved to be more successful in organizing domestic society and structuring external affairs Spruyt's interdisciplinary approach not only has important implications for change in the state system in our time but also presents a novel analysis of the general dynamics of institutional change **Making Big Money in 1600** Nelly Hanna, 1998-05-01

Nelly Hanna's work challenges the standard perceptions about Middle East society and economy of the seventeenth century. Both novel in its approach and information, this book's central theme revolves around the rise of an indigenous form of capitalism existing as early as the 1600s. *Making Big Money in 1600* examines the reemergence of the economic sector and its complex influences on social conditions during this time. By examining the life and work of Isma'il Abu Taqiyya, Hanna traces the relationship between economic activities and culture. As we are introduced to Abu Taqiyya, we learn how he negotiates partnership with other merchants, arranges for the handling of goods, and negotiates loans for colleagues. Hanna reveals his home life, his wives, children, and concubines, his relations with his family and friends, and how these relations evolved and were affected by the changing social and economic conditions, a perspective rarely discussed in works before the modern period.

In Praise of Books Nelly Hanna, 2003-10-01 In fine detail, the author explores economic influences on culture during periods of plenty and poverty. She examines the bond between commerce and escalating literacy via the building of schools, the availability of cheap paper, and the proliferation of books. And she assesses coffeehouses, storytellers, and phantom plays as a principal circuit for the spread of oral middle class culture. Drawing on both published and unpublished sources, Hanna unveils a full-fledged Cairene middle class culture that bridges the gap between the salons, majalis of the elite, and the common people. A major contribution to Egypt's cultural record, this book sets a high standard for future research on the history of the Middle East.

War and Society in Habsburg Spain I.A.A. Thompson, 2024-10-28 The historical study of war in the Spain of Philip II forms the starting point for the articles in this volume. They approach this not so much from a military angle but as a problem of organization, procurement, and finance. In a sense, the articles represent an assessment of the effectiveness of the Spanish government, and so, given the apparent precocity of government growth in 16th century Spain, they can also be seen as a critical commentary on the operational capabilities of the early modern absolutist state. Six of the essays here focus on the Spanish Armada in terms of its political and military objectives but demonstrating how these were conditioned by basic systems' limitations, not least in the procurement of suitable cannon. In the final articles, Dr. Thompson turns to the impact of war and its financing on the social structure, bearing in particular on the definition of nobility and its sale, and on local democracy, and making full use here, as elsewhere, of the relatively unexplored local sources. Two of the papers here appear for the first time in English, whilst a third has been newly prepared for this volume. *L'étude historique de la guerre sous Philippe II roi d'Espagne est la base des articles contenus dans le présent recueil. Ceci est abordé non tant sous l'angle militaire mais comme un problème d'organisation d'acquisition de matériel et de financement. En un certain sens, ces documents représentent une évaluation de l'efficacité du gouvernement espagnol et peuvent par conséquent donner l'apparence précocité de la croissance gouvernementale en Espagne au 16^{si} siècle. Ils sont considérés comme un commentaire critique quant aux capacités opérationnelles de l'Etat absolu proto-moderne. Une demi-douzaine des essais font l'examen de l'Armada espagnole en termes d'objectifs politiques et militaires tout en démontrant comment ces*
