Erwin Diewert, Klaus Spremann, Frank Stehling, 1993 Wolfgang Eichhorn was born on August 18 1933 in Ansbach Germany most likely under a lucky star if not fate must have made a mistake Everything in his life be it childhood education academic career or private life developed in a pleasurable and successful way But it would be a mistake and an injustice to credit his achievements to a lucky star First the success and recognition he earned in particular for his academic achievements are due to the motivation and the capabilities that he has possessed from a very early age on His abilities are

reflected in over a hundred publications in leading academic journals All of them share the unmistakable clarity the precision and the originality that he is known for He has become one of the leading and most successful advocates of a model based approach to economic problems a methodology that has a long tradition in the natural but not in the social sciences The rigor and the tools which are characteristic of his work make it clear that he never denied his academic background as a mathematician Therefore the choice of the title for this volume was an obvious one Second he always shares his enthusiasm and his high spirits with many people This may be even more remarkable than the above mentioned achievements because this feature is a very rare one      **Four Essays in Mathematical Economics and Econometrics** Heejoon Kang,1980
