Women Scientists Magdolna Hargittai, 2015-03-04 A compilation of sixty biographical sketches of influential female scientists discussing topics like the state of the modern female scientist and the underrepresentation of women at the higher levels of academia

**The Cost of Unethical Behavior** Maurizio Bottoni, 2010-03-05 While working at the Argonne National Laboratory by Chicago Illinois in the years 1990-96 Dr Bottoni proposed to the Argonne management to invite his old acquaintance Prof Katsuhiko Sakai of the Osaka University Japan to cooperate with him during a one year stay on numerical problems related to thermal and fluid dynamics computer simulations At the end of the stay Prof Sakai wrote a report documenting his work made with Dr Bottoni and part time with a younger colleague Dr Sun At this point the section manager who had not cooperated to the technical work pretended to be considered as co author of the report excluding Dr Bottoni This blatant violation of professional ethics was reported to higher management levels which however engaged in a cover up policy aiming at tolerating the violation of the Code of Ethics established by the Laboratory The book uncovers a full chain of violations so that the question arises whether the Code of Ethics is only a piece of paper The author not only claims justice but also thinks that the American taxpayer should be made aware of a state of affairs which implies waste of time and of financial resources

*The Ethics of Everyday Medicine* Erwin B. Montgomery Jr., 2020-09-24 Ethics of Everyday Medicine Explorations of Justice examines and analyses the relatively unexplored domain of ethics involved in the everyday practice of medicine From the author's clinical experience virtually every decision made in the day to day practice of medicine is fundamentally an ethical question as virtually every decision hinges on some value judgment that goes beyond the medical facts of the matter The first part of the book is devoted to medical decision cases in several areas of medicine These cases highlight elements of the current healthcare ecosystem involving players other than the physician and patient Insurers private commercial and governmental administrators and regulators perspectives are surfaced in point of care case analysis Part two contributes to the development of actionable tools to develop better ethical systems for the everyday practice of medicine by providing a critical analysis of Reflective Equilibrium and ethical induction from the perspective of logic and statistics The chapter on Justice discusses the neurophysiological representations of just and unjust behaviours The chapter on Ethical Theories follows describing the epistemic conundrum principlism reproducibility abstraction chaos and complexity The following chapter approaches ethical decisions from the logic and statistic perspectives The following chapter The Patient as Parenthetical the author discusses patient centric ethics and the rise of business and government centric ethics The

final chapter A Framework to Frame the Questions for Explore Further proposes a working framework to deal with current ethical issues Ethics of everyday Medicine Explorations of Justice acknowledges that there are no answers yet to the ethical dilemmas that confront the everyday practice of medicine but proposes a framework for deeper analysis and action This reading would be useful to all healthcare professionals Regulators and policy makers could also benefit from understanding how the complex healthcare environment influences medical decisions at point of care Offers an overview of the current health care ecosystem and the ethical questions posed by divergent interests Includes cases for ethical analysis of common medical practice Proposes a framework for ethical decision making in the clinical setting Provides critical analysis of Reflective Equilibrium and ethical induction from the perspective of logic and statistics

#### **Women Scientists in America**

Margaret W. Rossiter, 1998-09-29 Winner of the Pfizer Award for Outstanding Book in the History of Science Margaret Rossiter's widely hailed Women Scientists in America Struggles and Strategies to 1940 marked the beginning of a pioneering effort to interpret the history of American women scientists That effort continues in this provocative sequel that covers the crucial years of World War II and beyond Rossiter begins by showing how the acute labor shortage brought on by the war seemed to hold out new hope for women professionals especially in the sciences But the public posture of welcoming women into the scientific professions masked a deep seated opposition to change Rossiter proves that despite frustrating obstacles created by the patriarchal structure and values of universities government and industry women scientists made genuine contributions to their fields grew in professional stature and laid the foundation for the breakthroughs that followed 1972

**Opening Pandora's Box** G. Nigel Gilbert, Michael Mulkey, 1984-02-23 This book proposes a fresh approach to sociological analysis and in particular to the analysis of scientific culture It moves away from previous studies which have tended to focus on scientists actions and beliefs to show that analysis of scientific discourse can be productive and revealing The book demonstrates that scientists produce varying accounts of their actions and beliefs in different social situations Rather than attempting to extract one coherent interpretation from these diverse accounts the study identifies two basic scientific repertoires and shows how scientists use them to create their discourse This provides a point of departure for more complex analytical topics Discourse analysis is applied to show how different degrees of consensus can be ascribed to the same group of scientists at a given moment in time through the application of standard interpretive techniques Finally discourse analysis is used to explore scientists humour a neglected topic that is shown to provide important insights into the normally hidden interpretive regularities which underlie the cultural diversity of science
