The Theater of Truth William Egginton,2009-12-17 The Theater of Truth argues that seventeenth century baroque and twentieth century neobaroque aesthetics have to be understood as part of the same

complex The Neobaroque rather than being a return to the stylistic practices of a particular time and place should be described as the continuation of a cultural strategy produced as a response to a specific problem of thought that has beset Europe and the colonial world since early modernity This problem in its simplest philosophical form concerns the paradoxical relation between appearances and what they represent Egginton explores expressions of this problem in the art and literature of the Hispanic Baroque new and old He shows how the strategies of these two Baroque emerged in the political and social world of the Spanish Empire and how they continue to be deployed in the cultural politics of the present Further he offers a unified theory for the relation between the two Baroque and a new vocabulary for distinguishing between their ideological values **Atenea** ,2007 **The Real Guide to Grad School: The humanities** Edward Batchelder,2001
