Essence Of Life In Psychic Phenomena:

Essence of Life in Psychic Phenomena Immanuel Salminen, 1933 The Soul in the Axiosphere from an Intercultural Perspective, Volume One Joanna Jurewicz, Ewa Masłowska, Dorota Pazio-Wlazłowska, 2020-05-04 The essays collected in this volume form a multifaceted discourse on religious philosophical historical ethnocultural and sociocultural literary and linguistic issues A multicultural approach to the problem of the soul allows the presentation of it on a microscale focused on national and regional specificity as well as on the macroscale oriented toward universal values which can be observed in the cultures of peoples distant from each other in both time and space The book consists of 28 chapters addressing the fundamental themes of human existence which find expression in cultural texts in both colloquial and artistic language and which have a prominent place in anthropological psychological metaphysical and theological debates **Hermeneutical Heidegger** Michael Bowler, Ingo Farin, 2016-06-15 Hermeneutical Heidegger critically examines and confronts Heidegger's hermeneutical approach to philosophy and the history of philosophy Heidegger's work both early and late has had a profound impact on hermeneutics and hermeneutical philosophy The essays in this volume are striking in the way they exhibit the variety of perspectives on the development and role of hermeneutics in Heidegger's work allowing a multiplicity of views on the nature of hermeneutics and hermeneutical philosophy to emerge As Heidegger argues the rigor and strength of philosophy do not consist in the development of a univocal and universal method but in philosophy's ability to embrace not just tolerate the questioning of its basic concepts The essays in Hermeneutical Heidegger are exemplars of this kind of rigor and strength **Parapsychology Review**, 1980 **Transform Your World Through the Powers of Your Mind** Jawara D. King D.D., 2009-06-10 Jawara D King is back with another classic and has written the greatest self help book of all time with TRANSFORM YOUR WORLD THROUGH THE POWERS OF YOUR MIND which is a classic and spiritual masterpiece leading the world into manifested mind power This transformational life changing manual full of life changing principles will help you make the proper mental adjustments needed to experience the full manifestation of thought power A trained and directed mind disciplined to think the right thoughts will help you manifest the life you want through the power and possibility of faith Learn how to not limit yourself in your thinking and allow the energy of thought to create the circumstances you desire The only limits are our beliefs which make the possible impossible while everything is possible including the impossible using mind over matter to overcome impossibilities Through persistence will and daily commitment you will be able to change or manifest anything within the realm of the possible through applied action The beliefs you hold within are always repelling or attracting success and your thoughts and spoken words will manifest Building on the success of his first book WORLD TRANSFORMATION Dr Jawara D King returns with a spectacular effort full of techniques that will make dramatic positive changes for you if practiced and help you see and imagine yourself being what you affirm to be A decision backed by action is the root of all change along with a change in your thinking You have to believe it before you see

it Images of what you want in your mind begin the creative process You attract situations that match the images of your daily thoughts and what you mostly focus upon Through mind power your new life will reflect your new thoughts and habits

The Religious Dreamworld of Apuleius' Metamorphoses James Gollnick,2006-01-01 Apuleius Metamorphoses is probably best known as the literary source for the myth of Eros and Psyche and as a primary source of information about mystery religions in the ancient world There is another realm of the Metamorphoses which has until now received relatively little attention namely the many dreams found within it The Religious Dreamworld of Apuleius Metamorphoses offers an engaging portrait of the second century dreamworld Recognizing the centrality of the religious function and spiritual interpretation of dreams this book illustrates their vital importance in the ancient world and the wide variety of meanings attributed to them James Gollnick draws deeply from historical and psychological studies and provides a historical background on the current interest in the role of dreams in psychological and spiritual transformation This study of Apuleius Metamorphoses adds to an appreciation of Apuleius the dreamer and the second century dreamworld in which he lived and wrote

Hyperreality Johanna Blomqvist,2024-04-09 How should we approach life and its challenges Are they real What do we really know about reality Could modern physics help us to understand What kind of worldview does it really shape for us What is the connection between reality and consciousness Do we live in a simulation In this book Johanna Blomqvist Ph D is diving into the question of reality a topic which has been of interest to her since childhood The desire to understand the world reality and the purpose of everything has also led her to the frontiers of science and to topics physicists do not often approach Her first book From Quantum Physics to Energy Healing A Physicist s Journey to Mind and Healing was published on Amazon in 2018 Hyperreality is a book about the nature of our reality and the hypotheses we have made about it through the centuries Johanna Blomqvist describes many cases and research experiments that will puzzle your mind Our reality seems to be something other than what the current prevailing materialistic worldview suggests From Chapter 2 Are we only machines There are many phenomena that we encounter almost daily but which do not fit into the current materialistic worldview Such phenomena are often classified as anomalies or parapsychological when it is impossible to explain them with prevailing theories Such phenomena include premonitions intuition telepathy premonition dreams and synchronicity Science seeks to find objective truth but is such a goal even possible After all all objective information is based on subjective observation Robert Jahn and Brenda Dunne founders of the PEAR Princeton Engineering Anomalies Research laboratory which has studied the effect of the mind on matter for decades say Mind without matter leaves us with a world of ephemeral abstraction matter without mind eliminates the essence of life itself It seems that the transition to the so called post materialistic era is essential We don t have any alternatives if we want to continue our life as humanity on Earth into the future We have to change our thinking It is time to understand our effect on physical reality and move to a new era beyond materialism You exist dive into hyperreality in which you are a significant participant Hyperreality book has been written to

everyone seeking for answers about the nature of our reality purpose of everything consciousness and the connection between science and spirituality It may help you to understand phenomena that you earlier have only omitted This book is the answer that Johanna Blomqvist herself wanted to find as a teen when she was contemplating the question of reality why we are here and how should one live About the Author Johanna Blomqvist Ph D is a physicist entrepreneur and internationally published author In her work she combines a wide variety of fields and methods in a unique way often discussing topics from the cutting edge and unconventional areas of science Blomqvist is also a sought after lecturer educator and energy healer Since childhood she has been interested in understanding our reality consciousness and our role in this universe Johanna s first book From Quantum Physics to Energy Healing A Physicist s Journey to Mind and Healing was published on May 2018 She has written also Hyperreality Beyond the Horizon where Physics Meets Consciousness 2021 and The Mystery of Water A Physicist s Dive into Our Deepest Essence Fall 2024 Johanna lives in Helsinki Finland

The Vital Dimension Carl Gunther, 2006-08 The nature of life is at the center of national debate Are we mere material mechanisms Or is life a vast nonphysical dimension that organizes matter Does God exist The issue is not academic The question defines the nature of human reality What are the limits of consciousness Do our memories exist in our brains or in the vastness of time The Vital Dimension examines the thoughts of eminent scientists such as the Nobel Prize Winners Erwin Schrödinger Werner Heisenberg and Sir John Eccles who concluded that life is a mysterious force unknown to modern science The Vital Dimension embraces René Descartes admonition Doubt all that can be doubted to look beyond the rigid preconceptions of mechanistic biology and construct a truly radical theory of life More than mere speculation the weight of scientific evidence points to the fact that the modern material view of reality is on the verge of a profound revolution The world stands at the threshold to the Vital Dimension Dare we open the door

Tertium Organum: The Third Canon of Thought P. D. Ouspensky, 2021-10-20 Tertium Organum or the third canon of thought gives a new view of the perception of the world In Tertium Organum the author offers the shift of the paradigm and speaks of higher consciousness or the consciousness of the fourth dimension the domain for the personal development of the human the ability to control your emotions and actions The book is inspired by the teachings of Gurdjieff about the Fourth Way According to this philosophy there are three ways of self development the Way of the Fakir developing physical body the Way of the Monk dealing with the emotions and the Way of the Yogi mastering the mind Yet there is another way the Fourth Way that enables a human being to combine all three ways and live in harmony of body spirit and mind Ouspensky applies this theory to the study of time and space where he defines time as the fourth dimension of space and personality The book s name is the allusion to the Organum of Aristotle which laid the basis for the development of science and the Organum Novum by Francis Bacon who defined knowledge as only those facts that can be checked empirically

General Psychopathology Karl Jaspers, 1997-11-27 In his most important contribution to the Heidelberg school a founder of existentialism critiques the scientific aspirations of

psychotherapy In 1910 Karl Jaspers wrote a seminal essay on morbid jealousy in which he laid the foundation for the psychopathological phenomenology that through his work and the work of Hans Gruhle and Kurt Schneider among others would become the hallmark of the Heidelberg school of psychiatry In General Psychopathology his most important contribution to the Heidelberg school Jaspers critiques the scientific aspirations of psychotherapy arguing that in the realm of the human the explanation of behavior through the observation of regularity and patterns in it Erkl rende Psychologie must be supplemented by an understanding of the meaning relations experienced by human beings Verstehende Psychologie

Bridey Murphy--fact, Fraud, Or Fancy? ,1956 **Spiritual Nutrition** Gabriel Cousens, M.D.,2009-03-03 When we eat can we feed the soul as well as the body Can a diet have an impact on spirituality Spiritual Nutrition empowers readers to develop personal diets that are appropriate to their lifestyles and spiritual practices Drawing on 14 years of clinical experience and research Dr Gabriel Cousens discusses nutritional issues that can help answer these questions including raw vs cooked food high vs low protein the concepts of assimilation and fasting alkaline acid balance attitudes about food nutrients energy and structure building In addition Cousens shares his new dietary system of spiritual nutrition that is based on the relationship that the color of the food has to corresponding colors of the human chakra system hence the rainbow diet For true nourishment he strongly promotes the connection of diet to meditation fellowship wisdom and love *Handbook of Psychiatry* Michael Shepherd,1983 **Seeing and Believing** Margaret Ruth Miles,1997-09-04 Enriched by a cultural studies approach a deep understanding of religion and history and a love for the movies Seeing and Believing explores what popular films of the 1980s and 1990s say about religion and the values by which we live **Falling Leaf Essences** Grant R. Lambert,2002-06 Autumn embodies the energy of change transformation and release Essences prepared from autumn leaves can relieve ailments associated with the autumn experiences of our lives separation job change or the release of old patterns Contains descriptions of 160 essences and their healing properties Civil Society and Social Reconstruction George F. McLean,1997 *Concepts of Personality* Joseph M. Wepman,2017-07-12 The psychologist who pursues an interest in personality is constantly faced by a dilemma He seeks to investigate what is to him the most intriguing and interesting subject the multifaceted operations of man in his natural environment The predicament lies in the discrepancy between the complexity and richness of man s subjective experience and the pallid analog of these experiences the psychologist is able to study effectively with the research procedures available to him In Concepts of Personality Joseph M Wepman and Ralph W Heine offer a comprehensive survey of classical and contemporary personality theory including a wide array of examples of these two trends If the psychologist holds to the premises of strict objectivity through controlled observations he finds himself driven to the periphery of the very problem he seeks to understand This is a place where the reliability of measurement and the validity and predictability of his instruments can often be specified but only at the cost of abandoning the goal of useful generality or of application to the individual in his ordinary life circumstances Concepts of Personality

unlike most books on the subject is not limited to broad general theories It includes chapters on basic processes learning perception genetics and drive theory on the major analytical approaches of psychology and psychiatry on anthropological and sociological contributions and on the problems of measurement and assessment Each chapter is by an authority on the point of view expressed The editors introduction itself a major essay on the complex and divergent patterns and themes of contemporary views of personality carefully leads the reader through the information at hand The book as a whole constitutes an encyclopedic summary of the state of the science

Transcendental Phenomenological Psychology Jon L. James, 2011-06 From the Preface to the Revised Edition Since its publication in 2007 *Transcendental Phenomenological Psychology* has been sold on every continent except Antarctica and is in the collections of research libraries in North America Europe and Asia Even so its presentation to the academic community rightly provoked many comments corrections suggestions and criticisms Such input while mostly welcome provided the impetus to publish a revised edition A phenomenological explanation of human consciousness has long been sought in regions of psychology since the discipline was first carved out of philosophical concepts and theories about the human condition In its earliest years Western psychology was faced with two possible directions for this explanation an empirical naturalistic approach along with physics and biology or a non empirical eidetic approach along with logic and mathematics Edmund Husserl took up the latter His phenomenological tradition of inquiry successfully spanned nearly forty years until suddenly stopped and largely suppressed during the Second World War This book recovers Husserl s revolutionary approach toward the human sciences just as it was developed and just as it is presented for further study Here the author systematically gathers what Husserl calls the leading clues in the phenomenological method proper for a psychology of affective inner experience and then for the first time applies Husserl s own methodology for introducing a phenomenological psychology in the transcendental register of human consciousness Unlike contemporary phenomenological psychology in the existential register transcendental phenomenological psychology is presented as an eidetic non empirical act psychology in Husserl s mature genetic phenomenology This novel approach takes in the full range of solipsistic and transcendental subjectivity in Husserl s theories of human consciousness and follows Husserl s lead in presenting phenomenological psychology as an applied geometry of intentional experience within a step wise theory of inquiry This book is unique in human science today not only in its presentation of the development and applications of Husserl s key concepts for the discipline of psychology but also for introducing a psychology that could be intuitively grasped as self evidently valid wherever one s interest might lie
