The Essential Dewey: Ethics, logic, psychology John Dewey, 1998 In addition to being one of the greatest technical philosophers of

the 20th century John Dewey was one of America's last great public intellectuals. Based on the award-winning 37 volume critical edition of Dewey's work *THE ESSENTIAL DEWEY* presents in two volumes a collection that represents Dewey's thinking on every major issue to which he turned his attention. Vol. 1 *The Essential Dewey* John Dewey, 1998 [On Global Learning](#) Jason Ralph, 2023-09-21 Global security, climate and health challenges have all created a deep-seated unease about international society's capacity to cope with change. International Relations should help practitioners develop appropriate responses, but Jason Ralph argues that IR would be better positioned to do so if it drew more explicitly on the insights of classical Pragmatism. By bringing this tradition in from the margins, Ralph comprehensively engages norm, practice, realist and global IR theory to extend the new constructivist research agenda in a normative direction. He develops a Pragmatic Constructivist approach to assess how well communities of practice facilitate the learning that mitigates emergent social problems and improves lived experiences. This normative assessment focuses on the extent to which communities of practice are characterized by inclusive reflexivity and deliberative practical judgment. These two tests are then applied to critique existing communities of practice including the UN Security Council, the UNFCCC and the WHO. **Pragmatist Politics** John McGowan, 2012 In our current age of cynicism, John McGowan suggests that the time is right to take a fresh look at pragmatism, the philosophy of American democracy. As McGowan shows, pragmatism can be an inspiring alternative to the despair that seems to dominate contemporary American politics. Pragmatist Politics is passionate and convincing, both heartfelt and clear-eyed. It offers an expansive vision of what the United States could be and should be. From John Dewey and William James, McGowan derives a history of democracy as a way of life characterized by a distinctive ethos and based on an understanding of politics as potentially effective collective agency. That democratic ideal is wedded to a liberalism that focuses on extending the benefits of democracy and of material prosperity to all. Beyond the intellectual case for liberal democracy, McGowan turns to how James especially was attuned to the ways that emotional appeals often trump persuasion through arguments, and he examines the work of Kenneth Burke among others to investigate the link between liberal democracy and a comic view of human life. Comedy, McGowan notes, allows consideration of themes of love, forgiveness and generosity that figure far too infrequently in philosophical accounts of politics. In McGowan's work, the combination of pragmatism and comedy takes us on a wide-ranging exploration of what American politics and by extension American life could actually be like if it truly reflected American values. [The Oxford Handbook of Process Philosophy and Organization Studies](#) Jenny Helin, Tor Hernes, Daniel Hjorth, Robin Holt, 2014-05 This Handbook presents key ideas of philosophers and social theorists whose ideas inform process approaches to organization studies. Each chapter addresses the background and context of this thinker, their work with a focus on the processual elements and the potential contribution to organization and management research. **Pragmatic Cosmopolitanism** D. Bray, 2016-04-30 Building on the work of philosopher John Dewey, Bray develops an approach to transnational democracy called pragmatic cosmopolitanism. He argues for an ideal of

representative democracy that emphasizes the role of democratic leadership and the development of critical intelligence

The Edusemiotics of Images Inna Semetsky, 2013-02-11 Semetsky's new book offers a bracing account of Tarot semiotics in view of its deep significance for educational experience. Analyzing the symbolic language of Tarot images that express the intimations of the unconscious she invites readers to explore novel ways of learning about the nature of ourselves and the world we are situated in. Combining thorough research with an accessible style this groundbreaking book is essential reading for present and future generations of practitioners, academics and students across disciplines. Pia Br nzeu Professor of English Literature and Vice Rector of the University of Timisoara Romania author of *Corridors of Mirrors* A sequel to the author's *Re-Symbolization of the Self* Human Development and Tarot Hermeneutic and Semiotics Education Experience Semetsky's new book presents the Tarot sign system as a school of ethical living. Bringing the philosophies of Peirce, Deleuze, Dewey, Whitehead and Gebser in a dialogue with the cutting edge science of coordination dynamics she grounds the art of Tarot in the logic of signs acting across nature, culture and human mind. Building on Noddings' maternal factor Semetsky demonstrates how the lessons embodied in Tarot symbolism recover the feminine value of relations and contribute to Self-Other integration. Such is the message of Tarot images. *The Image is the Message* Igor Klyukanov Professor of Communication Eastern Washington University USA editor Russian Journal of Communication author of *A Communication Universe* Manifestations of Meaning Stagings of Significance Semetsky's amalgamation of the techniques of visual communication with the emerging field of edusemiotics is an absolute masterpiece in transdisciplinarity. By forging diverse strands of inquiry into an overall model of how images enhance learning Semetsky's new book provokes us to take a fresh look at iconic information and is a required reading for everyone who is engaged with the art and science of visual semiotics at the intersection of nature and culture. Marcel Danesi Professor of Anthropology University of Toronto Canada editor in chief *Semiotica* author of *The Quest for Meaning: A Guide to Semiotic Theory and Practice* Finally! An in-depth look at Tarot from within the field of semiotics, a perspective that had been inexplicably overlooked until now. As a language of exile from language Tarot cards are silent words that became images. Here is a book that turns our thirst for symbols into a learning tool. The sign sings in Inna Semetsky's work. Semiotic Subjectivity in Education and Counseling Inna R. Semetsky, 2019-10-16 *Semiotic Subjectivity in Education and Counseling* demonstrates the importance of addressing the concept of the unconscious in learning. Exploring the innovative concept of edusemiotics it challenges the received notion of learning as solely academic and linguistic instead offering an ethico-aesthetic paradigm that draws on transdisciplinary research in the context of this new direction in educational theory. The chapters explore the production of subjectivity within the process of semiosis as the action and transformation of signs. An unorthodox pedagogy of the unconscious blends with the therapeutic dimension and produces subjectivities that emerge in the midst of the relational dynamics of experience. The book argues for holistic education that rejects the schism between

matter and spirit pervading Western thinking and represents a shift in rethinking spirituality while never separating it from logic and reason Giving voice to the unconscious contributes to learning and changing our habits as an important objective in educative and counseling practices The book critically examines the legacy of Charles S Peirce Lev S Vygotsky and other forerunners of edusemiotics It will be essential reading for academics researchers and postgraduate students across the fields of educational philosophy educational psychology and counseling as well as science studies **A Companion to**

Wrathall, 2009-04-20 A Companion to Phenomenology and Existentialism is a complete guide to two of the dominant movements of philosophy in the twentieth century Written by a team of leading scholars including Dagfinn Føllesdal J N Mohanty Robert Solomon Jean Luc Marion Highlights the area of overlap between the two movements Features longer essays discussing each of the main schools of thought shorter essays introducing prominent themes and problem oriented chapters Organised topically around concepts such as temporality intentionality death and nihilism Features essays on unusual subjects such as medicine the emotions artificial intelligence and environmental philosophy Seducing Souls Karl D. Hostetler, 2011-06-16 The simple premise of this book is that the

purpose of education is to serve the well being of students Well being might seem to be an obvious aim for education but it has been given insufficient attention and often is poorly understood Karl D Hostetler asks What does it mean for a human being to live a good life to experience well being How as individuals and a society can we debate and evaluate the quality of lives What classroom practices would be conducive to furthering the welfare of our students Hostetler explores how teachers can seduce students souls guiding and provoking while still respecting individuals rights to conceive and live a fulfilling life for themselves He prompts serious reflection about the purposes of education and challenges dominant ideas about the aims of education the politics of policy making and the practice of teaching Seducing Souls argues eloquently and provocatively for the necessity of experiences that touch the soul that elevate the young self so that students can better understand life and discern value **The Routledge Handbook of Metaethics** Tristram McPherson, David Plunkett, 2017-08-24 This Handbook

Political Matter Bruce Braun, Sarah J. Whatmore, Isabelle Stengers, 2010-09-03 An engaging collection that explores the politics of material objects **All Bullshit and Lies?** Chris Heffer, 2020 In a postfactual world in which claims are often held to be true only to the extent that they confirm pre-existing or partisan beliefs this book asks crucial questions how can we identify the many forms of untruthfulness in discourse How can we know when their use is ethically wrong How can we judge untruthfulness in the messiness of situated discourse Drawing on pragmatics philosophy psychology and law All Bullshit and Lies develops a comprehensive framework for analyzing untruthful discourse in situated context TRUST or Trust related Untruthfulness in Situated Text sees untruthfulness as encompassing not only deliberate manipulations of what is believed to be true the insincerity of withholding misleading and lying but also the distortions that arise from an irresponsible attitude towards the truth dogma distortion and bullshit Chris Heffer discusses times when truth is not in play as in jokes or fiction as well as instances when concealing the truth can achieve a greater good The TRUST framework demonstrates that untruthfulness becomes unethical in discourse though when it unjustifiably breaches the trust an interlocutor invests in the speaker In addition to the theoretical framework this book provides a clear practical heuristic for analyzing discursive untruthfulness and applies it to such cases of public discourse as the Brexit battle bus Trump's tweet about voter fraud Blair and Bush's claims about weapons of mass destruction and the multiple forms of untruthfulness associated with the Skripal poisoning case In All Bullshit and Lies Chris Heffer turns a critical eye to fundamental questions of truthfulness and trust in our society This timely and interdisciplinary investigation of discourse provides readers a deeper theoretical understanding of untruthfulness in a postfactual world
