Professor Hugh Beale former Commercial Law and Common Law Commissioner at the Law Commission of England and Wales the volume presents an authoritative exposition of a branch of the law that is of considerable interest and great practical importance for practitioners scholars and students interested in Indian contract law **Australian Books in Print 1998** Bowker,1998-04 excellent coverage essential to worldwide bibliographic coverage AMERICAN REFERENCE BOOKS ANNUAL This comprehensive reference provides current finding ordering information on more than 75 000 in print books published in or about Australia or written by Australian authors organized by title author keyword You ll also find brief profiles of more than 7 000 publishers distributors whose titles are represented as well as information on trade associations local agents of overseas publishers literary awards more From D W Thorpe *Bibliography of Nautical Books* Alan Obin,2000-02 This is the 15th annual edition of the Bibliography of Nautical Books a reference guide to over 14 000 nautical publications It deals specifically with the year 2000 **Searching the Law - The States** Francis R Doyle,2022-11-14 This revised two volume set reproduces the easy to use logically organized format of Searching the Law for each of the 50 U S states Arranged by state and by topic within each state it features a complete list of all the legal research materials available for each state jurisdiction thousands of citations to the legal literature of each state materials applicable to more than one topic listed under each topic repeated listings under each state and topic where they apply and author title publisher format and the latest known supplement for each citation Searching the Law The States is the companion text to Searching the Law Together the sets form one of the most comprehensive logical legal reference sources available Published under the Transnational Publishers imprint The print edition is available as a set of two volumes 9781571052872 **The Idea of Authorship in Copyright** Lior Zemer,2017-03-02 As information flows become increasingly ubiquitous in our post digital environment the challenges to traditional concepts of intellectual property and the practices deriving from them are immense The romantic understanding of the lone author as an endless source of new creations has to face these challenges In order to do so this work presents a collectivist model of intellectual property rights The core argument is that since copyright works enjoy profit from significant public contribution they should not be privately owned but considered to be a joint enterprise made real by both the public and author It is argued that every copyright work depends on and is reflective of the author s exposure to externalities such as language culture and the various social events and processes that occur in the public domain therefore copyright works should not be regarded as exclusive private property The study takes its organizing principle from John Locke defining and proving the fatal flaw inherent in debates on copyright on the one hand the copyright community is eager to arm authors with a robust property right over their creation while on the other this community totally ignores the fact that the exposure of the individual to externalities is what makes him or her capable of creating material that is copyrightable Just as Locke was against the absolute authority of kings the expressed view of the study is against the exclusive right an author can claim *MULTIDISCIPLINARY SUBJECTS FOR RESEARCH-VIII, VOLUME-2* Dr. Dilipkumar

Hierarchical Methods V. Kulish, 2006-04-11 The book consists of two Volumes The first the preceding volume is devoted to the general nonlinear theory of the hierarchical dynamic oscillative wave systems This theory has been called the theory of hierarchical oscillations and waves Here two aspects of the proposed theory are discussed The first aspects concern the fundamental nature and the basic concepts and ideas of a new hierarchical approach to studying hierarchical dynamic systems A new hierarchical paradigm is proposed as a synthesis of a new point of view of such types of systems In turn a set of hierarchical principles is formulated as the fundamental basis of this paradigm Therein the self resemblance holographic principle plays a key role here An adequate mathematical description factorization of the proposed paradigm is carried out The concepts of structural and dynamic functional operators are put into the basis of this description Electrodynamics is chosen as a convenient basis for an obvious demonstration of some key points of the proposed new theory The second aspect has a purely mathematical nature It is related to the form of factorization i.e. mathematical description of hierarchical types of dynamic models and discussion of the methods of their mathematical analysis A set of the hierarchical asymptotic analytical numerical methods is given as an evidence of the practical effectiveness of the proposed version of hierarchical theory

The Foundations of European Private Law Roger Brownsword, Hans-W. Micklitz, Leone Niglia, Stephen Weatherill, 2011-09-19 There remains an urgent need for a deeper discussion of the theoretical political and federal dimensions of the European codification project While much valuable work has already been undertaken the chapters in this volume take as their starting point the proposition that further reflection and critical thought will enhance the quality and efficacy of the ongoing work of the various codification bodies The volume contains chapters by representatives of the Common Frame of Reference the Study Group and the Acquis Group as well as by those who have not been involved in particular projects but who have previously commented more distantly on their work for instance those belonging to the Trento Group and the Social Justice Group The

chapters between them represent the most comprehensive attempt so far to survey the state of the codification project its theoretical political and federal foundations and the future prospects for enforcement and compliance
