Future Of Religions:

The Future of Religion Rodney Stark, William Sims Bainbridge, 2023-04-28 Religion is alive and well in the modern world and the social scientific study of religion is undergoing a renaissance For much of this century respected social theorists predicted the death of religion as inevitable consequence of science education and modern economics But they were wrong Stark and Bainbridge set out to explain the survival of religion Using information derived from numerous surveys censuses historical case studies and ethnographic field expeditions they chart the full sweep of contemporary religion from the traditional denominations to the most fervent cults This wealth of information is located within a coherent theoretical framework that examines religion as a social response to human needs both the general needs shared by all and the desires specific to those who are denied the economic rewards or prestige enjoyed by the privileged By explaining the forms taken by religions today Stark and Bainbridge allow us to understand its persistence in a secular age and its prospects for the future This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 Religion is alive and well in the modern world and the social scientific study of religion is undergoing a renaissance For much of this century respected social theorists predicted the death of religion as inevitable consequence of science education

The Future of Religion and the Religion of the Future Theodore John Rivers, 2011-11-25 In The Future of Religion and the Religion of the Future Theodore John Rivers explores the changing relationship between technology and religion Rivers draws upon his expertise in the fields of medieval and religious history to discuss how the promotion of Christianity and monasticism in the Middle Ages began a process that has lent religious undertones to the way in which we interact with modern technology Rivers ultimately suggests that the growing presence of technology makes it a likely candidate for the next religious form competing with all the major religions in place today

The Future of New Religious Movements David G. Bromley, Phillip E. Hammond, New Ecumenical Research Association (Unification Theological Seminary), 1987

The Future of Religion and the Religion of the Future Theodore John Rivers, 2011-11-25 In The Future of Religion and the Religion of the Future Theodore John Rivers explores the changing relationship between technology and religion Rivers draws upon his expertise in the fields of medieval and religious history to discuss how the promotion of Christianity and monasticism in the Middle Ages began a process that has lent religious undertones to the way in which we interact with modern technology Rivers ultimately suggests that the growing presence of technology makes it a likely candidate for the next religious form competing with all the major religions in place today

Pluralism: The Future of Religion Kenneth Rose, 2013-03-28 Theology of religions has defaulted in the last two decades to an epicyclic inclusivism which seeks to undermine pluralism with claims that it is covertly triumphalistic and that it mirrors the logic of exclusivism

With the exception of pioneers in the field such as John Hick and Paul Knitter most major figures in this theological field have retreated from pluralism and promote versions of particularism and inclusivism Pluralism The Future of Religion argues for an apophatic pluralism that is motivated by the insight that it is impossible to secure universal assent for changeable bodies of religious teachings This insight implies the non finality and consequent departicularization of all religious teachings and their inclusivistic defenses These conclusions point us inevitably toward pluralism and lead us out of the inclusivistic impasse of contemporary theology in religions

The Future of Religious Leadership Alon Goshen-Gottstein, 2018-08-08 The chapters collected in this book prepared by a think tank of the Elijah Interfaith Academy address the subject of religious leadership The subject is of broad relevance in the training of religious leaders and in the practice of religious leadership As such it is also germane to religious thought where reflections on religious leadership occupy an important place What does it mean to be a religious leader in today's world To what degree are the challenges that confront religious leadership today the same perennial challenges that have arrested the attention of the faithful and their leaders for generations and to what degree do we encounter challenges today that are unique to our day and age One dimension is surely unique and that is the very ability to explore these issues from an interreligious perspective and to consider challenges opportunities and strategies across religious traditions Studying the theme across six faith traditions Christianity Islam Judaism Sikhism Hinduism and Buddhism The Future of Religious Leadership World Religions in Conversation recognizes the common challenges to present day religious leadership Contributors Awet Andemicael Timothy J Gianotti Alon Goshen Gottstein Anantanand Rambachan Maria Reis Habito Meir Sendor Balwant Singh Dhillon Miroslav Volf *The Future of Religions* Paul Tillich, 1976

Between Eden and Armageddon : The Future of World Religions, Violence, and Peacemaking Diplomacy Marc Gopin James H. Laue Professor and Director of the Center on Religion, and Conflict Resolution George Mason University, 2000-06-26 Recent years have seen a meteoric rise in the power and importance of organized religion in many parts of the world At the same time there has been a significant increase in violence perpetrated in the name of religion While much has been written on the relationship between violence and religious militancy history shows that religious people have also played a critical role in peacemaking within numerous cultures In the new century will religion bring upon further catastrophes Or will it provide human civilization with methods of care healing and the creation of peaceful and just societies In this groundbreaking book Marc Gopin integrates the study of religion with the study of conflict resolution He argues that religion can play a critical role in constructing a global community of shared moral commitments and vision a community that can limit conflict to its nonviolent constructive variety If we examine religious myths and moral traditions Gopin argues we can understand why and when religious people come to violence and why and when they become staunch peacemakers He shows that it is the conservative expression of most religious traditions that presents the largest challenge in terms of peace and conflict Gopin considers ways to construct traditional paradigms that are committed to peacemaking on a deep level and

offers such a paradigm for the case of Judaism Throughout Gopin emphasizes that developing the potential of the world's religions for coping with conflict demands a conscious process on the part of peacemakers and theologians His innovative and carefully argued study also offers a broad set of recommendations for policy planners both inside and outside of government

Religion and the Human Future David E. Klemm, William Schweiker, 2009-01-30 This powerful manifesto outlines a vision called theological humanism based on the idea that the integrity of life provides a way to articulate the meaning of religion for the human future Explores a profound quest to understand the meaning and responsibility of our shared and yet divided humanity amidst the uncertainty of modern society Articulates the idea that human beings are mixed creatures striving for integrity not only trying to conform to God's will Sets forth a dynamic and robust vision of human life beyond the divisions that haunt the humanities social sciences theology and religious studies Future Survey Annual 1986 Michael Marien, 1987-01-01

The Religion of the Future Roberto Mangabeira Unger, 2014-04-08 How can we live in such a way that we die only once How can we organize a society that gives us a better chance to be fully alive How can we reinvent religion so that it liberates us instead of consoling us These questions stand at the center of *The Religion of the Future* a book about religion and a religious work in its own right

An Outline of the Future Religion of the World Richard Morris Smith, 1884

Is Vedanta The Future Religion? Swami Vivekananda, This is a powerful lecture delivered by Swami Vivekananda in San Francisco in 1900 Published by Advaita Ashrama a publication house of Ramakrishna Math Belur Math India it is one of the best books delineating in brief the fundamentals of Vedanta in a lucid authoritative and candid tone

The World's Great Religions and the Religion of the Future Alfred Wilhelm Martin, 1921 *The Future of Religion* Paul Rennick, Stanley B. Cunningham, Ralph Henry Johnson, 2010 Religion evokes strong emotions and raises hard questions This volume addresses many of the contentious elements that religion provokes and challenges some of the easy answers contemporary society has produced The frequent and often facile dictum about the separation of church and state when examined closely may prove to contribute to the erosion of some of our most cherished human values rather than to their preservation The science versus religion dichotomy is dogma for many yet the empiricism that is the hallmark of scientific method and knowledge can be singularly absent from positions that claim to be science The current spate of attacks against God and religion that are now commonplace when critically scrutinized often fail to provide compelling arguments or even to be as objective as their authors claim These and other explorations are the focus of this book From the Forward in which Charles Kimball challenges the West to re-evaluate its perspective and understanding of the East particularly Islam to the Afterword in which theologian Gregory Baum chronicles the extraordinary reversal of sociology's estimation of religion the invitation from this volume to all of us is to review our pieties and presuppositions as we reflect on the future of religion

The Future of God Stephen R. Schwalbe, 2025-05-30 This book reviews the three Abrahamic faiths Judaism Islam and Christianity to determine how humankind will accommodate God in the future While there are many publications about the

future of God or the future of religion they tend to reflect a specific academic field such as theology or sociology This book reviews the future of God reflected in four primary academic fields including theology dealing directly with God and religion sociology addressing how societies evolved with God and religion biology dealing with the scientific evidence of the existence of God and physics addressing God's intelligent design of the universe Then the book analyzes each field's future projections for God in order to determine the most likely future In the end the book discusses a possible future religion based on the academic review of the future of God

Islam The Future World Religion Hazrat Mirza Bashir-ud-Deen Mahmood Ahmad, 2019-05-18 Islam the Future World Religion is an abbreviated essay taken from a lecture delivered by Hazrat Mirza Bashir ud Deen Mahmood Ahmad ra the second khalifa of the Ahmadiyya Muslim Community on 11 April 1920 in Sialkot At the heart of the essay is the question of what the future world religion will be with a detailed explanation from Huzoor as to why in his estimation Islam will soon emerge as the dominant religious force in the world

The Future of Religion Richard Rorty, Gianni Vattimo, 2005 Though coming from distinct intellectual traditions Richard Rorty and Gianni Vattimo are united in their criticism of the metaphysical tradition The challenges they put forward extend beyond philosophy and entail a reconsideration of the foundations of belief in God and the religious life They urge that the rejection of metaphysical truth does not necessitate the death of religion Instead it opens new ways of imagining what it is to be religious This unique collaboration fuses pragmatism Rorty and hermeneutics Vattimo and recognizes the limits of both traditional religious belief and modern secularism Rorty discusses Vattimo's work Belief and argues that the end of metaphysics paves the way for an anti essentialist religion Vattimo explores the surprising congruence between Christianity and hermeneutics in light of the dissolution of metaphysical truth In a concluding dialogue both philosophers analyze the future of religion together with the political social and historical aspects that characterize our contemporary postmodern postmetaphysical and post Christian world

The Non-religion of the Future Jean-Marie Guyau, 1897

Facing the Unknown Future Ina ter Avest, Cok Bakker, Julia Ipgrave, Silke Leonhard, Peter Schreiner, 2020 During the 20 year history of the European Network for Religious Education through Contextual Approaches ENRECA several books have been published on the subject of Religious Education from sociological psychological or anthropological perspectives and always in the contextual settings of national educational frameworks and other specific culturally bound phenomena Also very often an international comparative perspective was included The shared goal was not so much to reflect on religion as such and on its changing doctrines institutions and prescriptions but to try and understand religion in the specific European contexts of secularization and the plurality of life orientations and to understand how religion becomes manifest in education in a variety of concrete policies and classroom practices reflecting various social issues This volume marking the 20th anniversary of ENRECA has a specific focus on the contextual dimension of time
