Future Arms Control Agenda Proceedings Of Nobel Symposium 118 1999:

A Future Arms Control Agenda Stockholm International Peace Research Institute, 2001 Organized by SIPRI the Nobel Symposium on A Future Arms Control Agenda considered how arms control contributes to a cooperative security system based on the peaceful resolution of disputes and the gradual demilitarization of international relations This book documents the proceedings including comprehensive discussions of new elements of the post Cold War global security system and objectives and limitations of arms control within that evolving system Special attention is given to the changing roles and responsibilities of the major powers in arms control efforts A Future of Arms Control Agenda Adam Daniel Rotfeld, Ian Anthony, 2001 *Narrativized Strategic Choice* John P. DeRosa, 2020-07-23 In February 2019 Donald Trump announced the United States withdrew from the landmark Cold War era Intermediate Range Nuclear Forces Treaty with Russia sparking worldwide concerns over the specter of a new nuclear arms race The rational actor and game theoretic models dominating international relations literature failed to predict or explain this strategic choice Rationalist normative and materialist models of strategic choice saturate the study of international relations Scholars continue to expose the shortfalls in these approaches in explaining or predicting outcomes of strategic interactions In this timely study John P DeRosa advances a new model of strategic choice through a narrative lens This narrative turn reframes the logic to emphasize the propositions of motives perceptions preferences and the reflexive interaction of strategic choices Case studies of American and Russian nuclear arms control treaties from the negotiations of the Intermediate Range Nuclear Forces INF Treaty in 1987 to the crisis of the US withdrawal from the INF Treaty in 2019 support building a theory of narrativized strategic choice **Confidence- and Security-building Measures in the New Europe** Zdzisław Lachowski, 2004 **Reconceptualising Arms Control** Neil Cooper, David Mutimer, 2014-01-02 The theory and practice of arms control seemed to have its heyday during the height of the Cold War with its focus on the East West conflict and nuclear arms In the past twenty years both arms technologies and various practices aimed at their control have continued to develop but scholarly thinking has not kept up This volume seeks to redress this scholarly neglect of the range of issues associated with the control of the means of violence by asking the question what does arms control mean in the 21st Century In asking this question the volume examines issues surrounding sovereignty geopolitics nuclear disarmament securitization of space technological developments human rights the clearance of landmines the regulation of small arms and the control of the black market for arms and nuclear secrets The book discusses terrorism with reference to the case of the suicide attacks in Beirut in 1983 and how the Obama administration is orientating its posture on nuclear arms This book was published as a special issue of Contemporary Security Policy **Combating Weapons of Mass Destruction** Nathan E. Busch, Daniel Joyner, 2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist

attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials

UN Security Council Edward C. Luck, 2006-09-27 Written by best selling author Edward C Luck this new text is broad and engaging enough for undergraduates sophisticated enough for graduates and lively enough for a wider audience interested in the key institutions of international public policy Looking at the antecedents of the UN Security Council as well as the current issues and future challenges that it faces this new book includes historical perspectives the founding vision procedures and practices economic enforcement peace operations and military enforcement human security proliferation and WMD terrorism reform adaptation and change

Transparency in Nuclear Warheads and Materials Nicholas Zarimpas, 2003 These studies address the technical means and procedures for establishing transparency in nuclear warheads and materials in the nuclear weapons states

International Security in a Time of Change Adam Daniel Rotfeld, 2004 Over a short period of time the area of security in its traditional sense has witnessed consecutive tides of threats and challenges which have caught the attention of researchers politicians and the media The interest and fascination of the security community has been stimulated by the successively long term and complicated consequences of the disintegration of the Soviet empire post communist nationalism ethnic religious and other conflicts humanitarian tragedies that called for international intervention rogue nations and failing states and finally international terrorism The unstable situation and its unpredictable development make it impossible to come up with a new paradigm of security and build a solid institutional infrastructure of international security The Polish and German editors of this book have encouraged a group of renown international researchers to tackle this project The authors look from different thematic and national perspectives at current problems of international security grouped into four large baskets Threats and challenges new concepts problems of security in the Euro Atlantic zone and issues of arms control The book is dedicated to Professor Adam Daniel Rotfeld nowadays a State Secretary in the Ministry of Foreign Affairs of Poland and formerly the Director of the Stockholm based International Peace Research Institute SIPRI

"Neither Illusion Nor Despair" Chen Zak, 2004 The last part of the dissertation offers policy recommendations These close the remaining gaps in the nuclear non proliferation safeguards system to effectively deter and detect non compliance
