Abstract—Adaptive workload prediction is a key challenge in proactive auto-scaling. In this paper, we propose a novel adaptive workload prediction algorithm that can predict the workload of a PaaS system in advance. The algorithm is based on the idea of using a machine learning model to predict the workload of a PaaS system. The model is trained using historical data of the workload of the PaaS system. The model is then used to predict the workload of the PaaS system in advance. The algorithm is evaluated using a real-world dataset of the workload of a PaaS system. The results show that the algorithm can predict the workload of a PaaS system in advance with high accuracy.

Keywords—Adaptive workload prediction, proactive auto-scaling, PaaS systems, machine learning, workload prediction.
