Global Geostrategy Brian Blouet, 2020-09-23 This is a new examination of Halford Mackinder's seminal global geostrategic work from the perspective of geography diplomatic history political science international relations imperial history and the space age Mackinder was a man ahead of his time He foresaw many of the key strategic issues that came to dominate the twentieth century Until the disintegration of the Soviet Union western defence strategists feared that one power or alliance might come to dominate Eurasia Admiral Mahan discussed this issue in *The Problem of Asia* 1900 but Mackinder made the most authoritative statement in *The Geographical Pivot of History* 1904 He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that if controlled by one force could be the basis of a World Empire James Kurth in *Foreign Affairs* has commented that it has taken two World Wars and the Cold War to prevent Mackinder's prophecy becoming reality In World War I and World War II Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union In the former conflict the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest Litovsk be given up In World War II Britain and the US gave material support to Stalin's totalitarian regime to prevent Nazi Germany gaining control of the territory and resources that might have been a basis for world domination The west highly conscious of Mackinder's dictum 1919 that Who rules East Europe commands the Heartland quickly adopted policies to contain the Soviet Union History has therefore proved Mackinder's work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular

Beyond Walls:

Re-inventing the Canada-United States Borderlands Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations

Hidden Geopolitics John Agnew, 2022-07-27 A 2023 Choice

Reviews Outstanding Academic Title Geopolitics is not dead but nor does it involve the same old logic of a world determined by physical geography in a competition between Great Powers Hidden Geopolitics recaptures the term to explore how the geography of power works both globally and nationally to structure and govern the workings of the global political economy Globalization far from its antithesis is tightly wound up in the assumptions and practices of geopolitics relating to the scope of regulatory authority state sponsorship and the political power of businesses to operate worldwide Agnew shows how this hidden geopolitics and globalization have been vitally connected He focuses on three moments the origins of contemporary globalization in the policies pursued by successive US governments and allies after 1945 and its continued relevance even as the US role in the world changes the close connection between geopolitical history and status of different countries and their relative capacities to exploit the possibilities and limit the costs of globalization and new regulatory and standard setting agencies which emerged under the sponsorship of major geopolitical powers but have grown in power and authority as the dominant states have become limited in their ability to manage the explosion of transnational transactions on their own

Agnew argues that it is time to move on from the narrow inter imperial cast of geopolitics and the foolish policy advice it produces The old perspective on geopolitics has taken on new life with the rise of national populist movements in Europe and the United States and the reinvigoration of territorial authoritarian regimes in Russia and China Notwithstanding this trend we must see the contemporary world through the lens of these complex hidden geopolitical underpinnings that Agnew seeks to expose **Linder V. Ryan** ,2001 *Peace and Conflict Studies* Anindya Jyoti Majumdar,Shibashis Chatterjee,2020-08-09

This volume explores how we theorize politicize and practice peace and conflict discourses in the social sciences As concepts peace and conflict are intricately interwoven into a web of complementary discourses where states and other actors are able to negotiate deliberate and arbitrate their differences short of the overt and covert use of physical violence The essays in this volume reflect this eclecticism they reflect on concerns of contemporary conflicts in world politics the dissection of the ideas of peace and power the way peace studies join with global agencies peace and conflict in connection to geopolitics and identity the domestic basis of conflict in India and the South Asian theatre including class social cleavages and gender Further they also process elements like globalization media communication and films that help us engage with the popular tropes and discursive construction of the reality that play critical roles in how peace and violence are articulated and acted upon by the elites and the masses in societies This volume will be of great interest to scholars and researchers of political science international relations theory peace and conflict studies public policy and area studies It will also be a key resource for bureaucrats policy makers think tanks and practitioners working in the field of international relations **Hoffek V.
