Elliott,2021-11-18 First published in 1996 The intention of this volume is two fold first to give a chronologically arranged overview of selected data on the history of science in the United States and second to orient the reader to the substantial reference literature and research sources as guidance to further study of the topic The subject areas that are covered include astronomy biology chemistry geology mathematics physics and their related disciplines areas such as anthropology and psychology are covered to a lesser extent Science is the central focus but the content of the work recognizes that the boundaries between subjects or activities are not absolute and certainly not when coverage spans several centuries **The Fossil Hunter** Shelley Emling,2009-10-13 At a time when women were excluded from science a young girl made a discovery that marked the birth of paleontology and continues to feed the debate about evolution to this day Mary Anning was only twelve years old when in 1811 she discovered the first dinosaur skeleton of an ichthyosaur while fossil hunting on the cliffs of Lyme Regis England Until Mary s incredible discovery it was widely believed that animals did not become extinct The child of a poor family Mary became a fossil hunter inspiring the tongue twister She Sells Sea Shells by the Seashore She attracted the attention of fossil collectors and eventually the scientific world Once news of the fossils reached the halls of academia it became impossible to ignore the truth Mary s peculiar finds helped lay the groundwork for Charles Darwin s theory of evolution laid out in his On the Origin of Species Darwin drew on Mary s fossilized creatures as irrefutable evidence that life in the past was nothing like life in the present A story worthy of Dickens The Fossil Hunter chronicles the life of this young girl with dirt under her fingernails and not a shilling to buy dinner who became a world renowned paleontologist Dickens himself said of Mary The carpenter s daughter has won a name for herself and deserved to win it Here at last Shelley Emling returns Mary Anning of whom Stephen J Gould remarked is probably the most important unsung or inadequately sung collecting force in the history of paleontology to her deserved place in history **Barren Lands** Kevin Krajick,2002-10 In the late 1970s two men set out on what would prove to be a twenty year quest to find a North American gem mine along a fabled path that had defied sixteenth century explorers Wild West fortune seekers and modern geologists They are an unlikely pair Chuck Fipke a ragged fanatical prospector with a singular talent for finding sand size mineral grains and Stew

What Jane Knew Maureen Konkle, 2024-04-09 The children of an influential Ojibwe Anglo family Jane Johnston and her brother George were already accomplished writers when the Indian agent Henry Rowe Schoolcraft arrived in Sault Ste Marie in 1822 Charged by Michigan's territorial governor with collecting information on Anishinaabe people he soon married Jane discovered the family's writings and began soliciting them for traditional Anishinaabe stories But what began as literary play became the setting for political struggle Jane and her family wrote with attention to the beauty of Anishinaabe narratives and to their expression of an Anishinaabe world that continued to coexist with the American republic But Schoolcraft appropriated the stories and published them as his own writing seeking to control their meaning and to destroy their impact in service to the civilizing interests of the United States In this dramatic story Maureen Konkle helps recover the literary achievements of Jane Johnston Schoolcraft and her kin revealing as never before how their lives and work shed light on nineteenth century struggles over the future of Indigenous people in the United States
