Frankenstein to Dr Moreau to Doc Brown in Back to the Future the scientist has been a puzzling fascinating and threatening presence in popular culture From films we have learned that scientists are either evil maniacal geniuses or bumbling saviors of society Mad Bad and Dangerous puts this dichotomy to the test offering a wholly engaging yet not uncritical history of the cinematic portrayal of scientists Christopher Frayling traces the genealogy of the scientist in film showing how the scientist has often embodied the predominant anxieties of a particular historical moment The fear of nuclear holocaust in the 1950s gave rise to a rash of radioactive mutant horror movies while the possible dangers of cloning and biotechnology in the 1990s

manifested themselves in Jurassic Park During these eras the scientist's actions have been viewed through a lens of fascination and fear In the past few decades with increased public awareness of environmental issues and of the impact of technology on nature the scientist has been transformed once again into a villainous agent of money hungry corporate powers Mad Bad and Dangerous also examines biographical depictions of actual scientists illuminating how they are often portrayed as social misfits willing to sacrifice everything to the interests of science Drawing on such classic and familiar films as Frankenstein Metropolis and The Wizard of Oz Frayling brings social and film history together to paint a much larger picture of the evolving value of science and technology to society A fascinating study of American culture and film Mad Bad and Dangerous resurrects the scientists of late night movies and drive in theaters and gives them new life as cultural talismans

Film and Attraction André Gaudreault, 2011 Establishing a new vision for film history Film and Attraction From Kinematography to Cinema urges readers to consider the importance of complex social and cultural forces in early film André Gaudreault argues that Edison and the Lumières did not invent cinema they invented a device Explaining how this device the kinematograph gave rise to cinema is the challenge he sets for himself in this volume He highlights the forgotten role of the film lecturer and examines film's relationship with other visual spectacles in fin de siècle culture from magic sketches to fairy plays and photography to vaudeville In reorienting the study of film history Film and Attraction offers a candid reassessment of Georges Méliès' rich oeuvre and includes a new unabridged translation of Méliès' famous 1907 text Kinematographic Views A foreword by Rick Altman stresses the relevance of Gaudreault's concerns to Anglophone film scholarship
