Geriatric Medicine C.K. Cassel,J.R. Walsh,2012-12-06 With the appearance of a textbook as comprehensive as this one it is clear that the field of geriatrics is coming of age The broad scope of these volumes shapes a substantial answer to the question What is geriatrics and why should we be interested in it As I see it there are at least five reasons First the scientific or intellectual reason gerontology is the study of aging from the biologic psychological and social perspectives There is increasing interest in the fascinating insights into the biologic mechanisms of aging errors in protein synthesis DNA repair mechanisms alterations of the neuroendocrine system changes in the immune system genetic controls and somatic mutations Second the demographic reason this is the century of old age There has been a 26 year gain in the average life expectancy This gain compares with that acquired from 3 000 years B C the Bronze Age to the year 1900 which was about 29 years Therefore in one century there has been a gain in the average life expectancy almost equal to 5 000 previous years of human history In 1830 one of three newborn infants survived beyond 60 years of age

complicated tests performed in hospitals For most patients the GP is an accessible trusted and reliable source of information and advice So when patients under hospital follow up are confused about their treatment they often turn to their GP In addition general practitioners have open access to an increasing array of hospital based investigations and in the context of clinical governance they have a greater responsibility to understand and use them properly This guide provides a compendium of all those hospital based tests which the GP is likely to encounter organised according to specialty It also includes the rather more specialised tests available only to the relevant consultant but which GPs might end up having to explain to perplexed patients Each chapter is written by a specialist in the field and the book is edited by a general practitioner to be presented in a uniform digestible way This essential resource enables GPs to order secondary care investigations confidently and rationally and to answer patients queries with authority Meeting the Needs of the Frail Elderly United States.
