*The German Army on the Eastern Front* Jeff Rutherford,Adrian E Wettstein,2018-05-30 A documentary history of the war of annihilation Nazi Germany fought against the Soviet Union its people and the Red Army during World War II Histories of the German army on the Eastern Front generally focus on battlefield exploits on the war as it was fought in the front line They tend to neglect other aspects of the army s experience particularly its participation in the racial war demanded by the leadership of the Reich This ground breaking book aims to correct this incomplete often misleading picture Using a selection

of revealing extracts from a wide range of wartime documents it looks at the totality of the Wehrmacht's war in the East. The documents have previously been unpublished or have never been translated into English and they offer a fascinating inside view of the army's actions and attitudes. Combat is covered and complicity in Hitler's war of annihilation against the Soviet Union. There are sections on the conduct of the war in the rear areas, logistics, medical, judicial and the army's tactics, motivation and leadership. The entire text is informed by the latest research into the reality of the conflict as it was perceived and understood by those who took part.

**German Automatic Rifles 1941-45** Chris McNab, 2013-03-20 This book explores the origins, development, combat use and lasting influence of Nazi Germany's automatic rifles, focusing on the Gew 41, W Gew 43, Kar 43, FG 42 and MP 43, StG 44. The Blitzkrieg campaigns of 1939-40 convinced many observers that most infantry combat took place at closer ranges than the 750-1,000m. From 1941, Germany's arms designers took note and produced a new series of infantry firearms. This study not only provides a detailed technical description of each weapon but also explores how the firearms performed on the battlefields of World War II. The combat takes us from the FG 42 in the hands of Fallschirmjäger at Monte Cassino through to StG 44s being used by Waffen SS soldiers on both the Eastern and Western Fronts. Postwar service is also studied, such as the Gew 43's adoption by the Czech Army and the StG 44's use by the Viet Cong in the Vietnam War. Setting each firearm in its tactical and historical context and employing striking photographs and full colour artwork, firearms expert Chris McNab sets out the absorbing story of this distinctive and influential series of weapons.

**MG 34 and MG 42 Machine Guns** Chris McNab, 2012-10-20 With the MG 34, the German Wehrmacht introduced an entirely new concept in automatic firepower: the general purpose machine gun (GPMG). In itself, the MG 34 was an excellent weapon: an air-cooled, recoil-operated machine gun that could deliver killing firepower at ranges of more than 1,000m. Yet simply by changing its mount and feed mechanism, the operator could radically transform its function. On its standard bipod, it was a light machine gun ideal for infantry assaults; on a tripod, it could serve as a sustained fire medium machine gun. During World War II, the MG 34 was superseded by a new GPMG, the MG 42. More efficient to manufacture and more robust, it had a blistering 1,200rpm rate of fire. Nicknamed Hitler's buzzsaw by Allied troops, it was arguably the finest all-round GPMG ever produced and, alongside the MG 34, it inflicted heavy casualties. Featuring specially commissioned full colour artwork and drawing upon numerous technical manuals and first-hand accounts, this study explores the technological development, varied roles and lasting influence of the revolutionary MG 34 and MG 42 machine guns and their postwar successors.
