**German Science** Pierre Maurice Marie Duhem, 1991 Pierre Duhem 1861 1916 is a major influence in twentieth century thought a source for many of the ideas of the Vienna circle Karl Popper Imre Lakatos and Thomas S Kuhn Yet Duhem's arguments have often been perceived as enigmatic quirky muddled or even disingenuous because his influence has been greatest outside his native France many of his works have never been translated and Duhem's readers have mostly been ignorant of the peculiar French cultural and political background during Duhem's lifetime German Science here translated into English for the first time is a document of importance for understanding Duhem's better known works Duhem's Aim and Structure of Physical Theory has been misunderstood because of ignorance of the position set forth in German Science

Winkler, 2018-10-19 This collection reflects recent discussions on the relation between identity and difference in metaphysics and in moral and political theory in both the analytic and continental traditions The contributions to the volume tackle such issues as the role and place of the concept of identity in Hegel's Science of Logic the question of personal identity in Parfit Riceour and Schechtman the problem of inclusion and exclusion in Heidegger's reading of the history of philosophy Heidegger's conception of the relation between philosophy and politics the question of alterity in Levinas and Foucault's conception of the relation between sexual instinct economic interest and desire This book was originally published as a special issue of the Journal of the British Society for Phenomenology **Heidegger and Jewish Thought** Elad

Lapidot, Micha Brumlik, 2017-11-15 Once a prophet of critical other thought Heidegger has now for many become the epitome of the unthinkable in the light of the Black Notebooks controversy The unthinkable here is anti-Semitism The encounter between Heidegger and the Jews has thus come to signify very much in the spirit of Heidegger's own anti-Judaism the end of thought The present volume resists this view by positing not only Heidegger but also the Jewish people as representing thought The encounter between Heidegger and various traditions of Jewish thought is conceived here as a conversation inter alia an exchange between real or perceived others others to the philosophical tradition to mainstream modernity to Western Christian metaphysics to each other and even to themselves The conversation takes shape in this volume as a symposium of seventeen essays by leading scholars both of Heidegger's philosophy and of Jewish Studies **Hermeneutic Philosophies**
