Making Trouble Robert Manne, 2011-08-03 Robert Manne has twice been voted Australia's leading public intellectual This book will show you why Making Trouble takes aim at the new Australian complacency This is a book

that will enlighten and challenge as it traces the ideas and events that have recently changed the nation It covers much ground from Howard to Gillard by way of Rudd from Victoria s bushfires to the Apology from Wilfred Burchett to Julian Assange Making Trouble also includes an exchange of letters with Tony Abbott critical appraisals of the insider Paul Kelly and the outsider Mark Latham an insightful discussion of the political and moral issues surrounding climate change appreciations of W E H Stanner and Primo Levi a reflection on ways of remembering the Holocaust and incisive and original essays about the question of reconciliation and the treatment of asylum seekers As this eloquent and important book shows no one in Australia makes a better argument than Robert Manne Australia'S Unthinkable Genocide Colin Tatz,2017-04-04

We are a moral people and the very notion that Australians could have anything to do with genocide is unthinkableso claimed parliamentarians when Australia was asked to ratify the UNs Genocide Convention in 1949 The reality is that even decent democrats and people who consider themselves good colonists are capable of doing just thatkilling people because of who they were forcibly removing their children in order to assimilate them and erase them from the landscape and then in the name of their protection incarcerated them on reserves in a manner that caused them serious physical and mental harm This confronting book addresses the whole issue of what happens to an indigenous minority who were considered other than human an unworthy order of beings destined to die out *The Climate Change Challenge and the Failure of Democracy* David Shearman,Joseph Wayne Smith,2007-08-30 This provocative book presents compelling evidence that the fundamental problem behind environmental destruction and climate change in particular is the operation of liberal democracy Climate change threatens the future of civilization but humanity is impotent in effecting solutions Even in those nations with a commitment to reduce greenhouse emissions they continue to rise This failure mirrors those in many other spheres that deplete the fish of the sea erode fertile land destroy native forests pollute rivers and streams and utilize the world s natural resources beyond their replacement rate In this provocative book Shearman and Smith present evidence that the fundamental problem causing environmental destruction and climate change in particular is the operation of liberal democracy Its flaws and contradictions bestow upon government and its institutions laws and the markets and corporations that provide its sustenance an inability to make decisions that could provide a sustainable society Having argued that democracy has failed humanity the authors go even further and demonstrate that this failure can easily lead to authoritarianism without our even noticing Even more provocatively they assert that there is merit in preparing for this eventuality if we want to survive climate change They are not suggesting that existing authoritarian regimes are more successful in mitigating greenhouse emissions for to be successful economically they have adopted the market system with alacrity Nevertheless the authors conclude that an authoritarian form of government is necessary but this will be governance by experts and not by those who seek power There are in existence highly successful authoritarian structures for example in medicine and in corporate empires that are capable of implementing urgent decisions impossible under liberal democracy

Society is verging on a philosophical choice between liberty or life But there is a third way between democracy and authoritarianism that the authors leave for the final chapter Having brought the reader to the realization that in order to halt or even slow the disastrous process of climate change we must choose between liberal democracy and a form of authoritarian government by experts the authors offer up a radical reform of democracy that would entail the painful choice of curtailing our worldwide reliance on growth economies along with various legal and fiscal reforms Unpalatable as this choice may be they argue for the adoption of this fundamental reform of democracy over the journey to authoritarianism **Crazy Bastard**

drought management are parts of freshwater policy and acknowledging that water is a scarce natural resource and has economic value He calls for the development of basin wide policies to minimize conflicts within riparian countries as well as a freshwater policy baseline to minimize internal conflicts on water sharing arrangements By pointing out the need for full participation of all stakeholders in developing a baseline policy including people displaced by the construction of large dams Ray suggests a new system in which riparian countries are guaranteed that no water related project proceeds without a transparently developed environmental impact assessment and evaluation of alternative options **Best Australian**
