## **Electronic Magazines Soft News Programs On Network Television:**

*Electronic Magazines* William C. Spragens, 1995-06-27 The traditional documentary programming of network television's bygone era has given way to the recent explosion of ratings driven personality based news magazine programming While ostensibly conforming to a high standard of public service these magazines as even some of their producers admit must succumb to the forces of public appetite and profit maximization in order to be competitive This study examines this phenomenon of the electronic magazine and shows how the soft news programs affect the public's view of American politics and culture Maintaining the distinction between the syndicated tabloid style programming whose survival depends almost entirely on rating success and the more responsibly conceived network magazine programming Spragens provides a thorough content analysis of 60 Minutes Dateline NBC 20/20 and similar network series His study traces the development of the television magazine genre from the original 60 Minutes through the current crop of news programs it tracks the soft hard or sensational serious content dichotomy and its relation to ratings and it draws conclusions about the trends in soft news programming and their impact on the American public

*Television Program Master Index* Charles V. Dintrone, 2014-02-01 This work indexes books dissertations and journal articles that mention television shows Memoirs autobiographies biographies and some popular works meant for fans are also indexed The major focus is on service to researchers in the history of television Listings are keyed to an annotated bibliography Appendices include a list of websites an index of groups or classes of people on television and a list of programs by genre Changes from the second edition include more than 300 new shows airing on a wider variety of networks 2000 plus references more than double the second edition and a large increase in scholarly articles The book provides access to materials on almost 2300 shows including groundbreaking ones like All in the Family almost 200 entries cult favorites like Buffy The Vampire Slayer 200 plus entries and a classic franchise Star Trek more than 400 entries for all the shows The shows covered range from the late 1940s to 2010 The Walking Dead References range from 1956 to 2013

**Soft News Goes to War** Matthew A. Baum, 2011-10-16 The American public has consistently declared itself less concerned with foreign affairs in the post Cold War era even after 9/11 than at any time since World War II How can it be then that public attentiveness to U.S. foreign policy crises has increased This book represents the first systematic attempt to explain this apparent paradox Matthew Baum argues that the answer lies in changes to television's presentation of political information In so doing he develops a compelling byproduct theory of information consumption The information revolution has fundamentally changed the way the mass media especially television covers foreign policy Traditional news has been repackaged into numerous entertainment oriented news programs and talk shows By transforming political issues involving scandal or violence especially attacks against America into entertainment the soft news media have actually captured more viewers who will now follow news about foreign crises due to its entertainment value even if they remain uninterested in foreign policy Baum rigorously tests his theory through content analyses of traditional and soft news

media coverage of various post WWII U S foreign crises and statistical analyses of public opinion surveys The results hold key implications for the future of American politics and foreign policy For instance watching soft news reinforces isolationism among many inattentive Americans Scholars political analysts and even politicians have tended to ignore the soft news media and politically disengaged citizens But as this well written book cogently demonstrates soft news viewers represent a largely untapped reservoir of unusually persuadable voters

*Science on American Television* Marcel Chotkowski, 2024-05-31 As television emerged as a major cultural and economic force many imagined that the medium would enhance civic education for topics like science And indeed television soon offered a breathtaking banquet of scientific images and ideas both factual and fictional Mr Wizard performed experiments with milk bottles Viewers watched live coverage of solar eclipses and atomic bomb blasts Television cameras followed astronauts to the moon Carl Sagan through the Cosmos and Jane Goodall into the jungle Via electrons and embryos blood testing and blasting caps fictional Frankensteins and chatty Nobel laureates television opened windows onto the world of science But what promised to be a wonderful way of presenting science to huge audiences turned out to be a disappointment argues historian Marcel Chotkowski LaFollette in *Science on American Television* LaFollette narrates the history of science on television from the 1940s to the turn of the twenty first century to demonstrate how disagreements between scientists and television executives inhibited the medium s potential to engage in meaningful science education In addition to examining the content of shows she also explores audience and advertiser responses the role of news in engaging the public in science and the making of scientific celebrities Lively and provocative *Science on American Television* establishes a new approach to grappling with the popularization of science in the television age when the medium s ubiquity and influence shaped how science was presented and the scientific community had increasingly less control over what appeared on the air

Encyclopedia of journalism. 6. Appendices Christopher H. Sterling, 2009-09-25 The six volume *Encyclopedia of Journalism* covers all significant dimensions of journalism including print broadcast and Internet journalism US and international perspectives history technology legal issues and court cases ownership and economics

**That's the Way It Is** Charles L. Ponce de Leon, 2015-05-04 Ever since Newton Minow taught us sophisticates to bemoan the descent of television into a vast wasteland the dyspeptic chorus of jeremiahs who insist that television news in particular has gone from gold to dross gets noisier and noisier Charles Ponce de Leon says here in effect that this is misleading if not simply fatuous He argues in this well paced lively readable book that TV news has changed in response to broader changes in the TV industry and American culture It is pointless to bewail its decline That s the Way It Is gives us the very first history of American television news spanning more than six decades from Camel News Caravan to Countdown with Keith Oberman and The Daily Show Starting in the latter 1940s television news featured a succession of broadcasters who became household names even presences Eric Sevareid Walter Cronkite David Brinkley Peter Jennings Brian Williams Katie Couric and with cable expansion people like Glenn Beck Jon Stewart and Bill O Reilly But behind the

scenes the parallel story is just as interesting involving executives producers and journalists who were responsible for the field's most important innovations Included with mainstream network news programs is an engaging treatment of news magazines like 60 Minutes and 20/20 as well as morning news shows like Today and Good Morning America Ponce de Leon gives ample attention to the establishment of cable networks CNN and the later competitors Fox News and MSNBC mixing in colorful anecdotes about the likes of Roger Ailes and Roone Arledge Frothy features and other kinds of entertainment have been part and parcel of TV news from the start viewer preferences have always played a role in the evolution of programming although the disintegration of a national culture since the 1970s means that most of us no longer follow the news as a civic obligation Throughout Ponce de Leon places his history in a broader cultural context emphasizing tensions between the public service mission of TV news and the quest for profitability and broad appeal

Journalism at the End of the American Century, 1965-Present James Brian McPherson, 2006-06-30 McPherson captures the best and worst aspects of American journalism since 1965 The press has evolved into a conglomeration of entities that today can be described as pervasive entertaining and justifiably mistrusted In some ways today's press offers the best journalism Americans have ever seen In other ways the modern news media fall short of the ideals held by most of those who care about journalism and far short of the promise they once seemed to offer in terms of helping create an enlightened democracy Neither a paean to the press nor an exercise in media bashing this book finds much to criticize and to praise about recent American journalism while illustrating that traditional journalistic values have diminished in importance not just for many of those who control the media but also for the media consumers who most need good journalism Chapters are devoted to various themes that include social unrest the influence of entertainment values technological shifts media consolidation and corporatization issues of content versus context new kinds of news media and why the 1970s may have been the high point of American journalism Events and issues given extra attention include the rise of television news and later CNN the Civil Rights Movement and other race related issues the Women's Movement various forms of alternative journalism wars in Vietnam and Iraq investigative journalism the World Trade Center attacks the Clinton Lewinsky scandal the 2000 and 2004 presidential campaigns and elections civic journalism and journalism scandals

**Communication Consultants in Political Campaigns** Robert V. Friedenberg, 1997-10-28 We will never know the precise identity of America's first political consultant It is likely that candidates were seeking favorable coverage in colonial newspapers as early as 1704 it is also likely that by 1745 candidates were using handbills and pamphlets to augment press coverage of campaigns and we know that one successful candidate George Washington in 1758 purchased refreshments for potential voters These traditional approaches to winning votes have in recent years been amplified by consultants who have shown how cable networks videocassettes modems faxes focus groups and other means of communication can be put to partisan use In this book Robert V Friedenberg examines all of the communication techniques used in contemporary political campaigning After providing a history of political consulting

**Media, and Modern Democracy** Paolo Mancini, David L. Swanson, 1996-05-30 This important new text brings together an outstanding group of international scholars to look at the current state of electoral politics around the world. Elements of the modern or American model of election campaigning have been adopted in many countries in recent years including the use of mass media, the personalization of campaigns, use of public opinion polls, and a general professionalization of campaigns and conditions would seem to favor the spread of that model. Contributors to this volume from established democracies, new and restored democracies, and democracies facing destabilizing pressure examine the extent to which electoral politics in their countries have been affected by the emergence of high tech professional campaigns. Countries examined provide a cross section of today's democracies including the United States, Britain, Sweden, Germany, Russia, Poland, Spain, Israel, Italy, Argentina, and Venezuela. The work will be of interest to scholars and students alike in political communication, political parties, and elections, and comparative politics.
