men and citizens and he believed that subjects have the right to resist rulers who exceed the limits of their powers Although he appealed to the authority of Grotius and Locke the grounds on which he defended natural rights were distinctively his own He drew upon the Reformed or Presbyterian theology to propose that in respecting the natural rights of individuals one shows ones reverence for Gods creation Inasmuch as all of mankind longs for lasting happiness which can be found only in worship of or reverence for God such reverence is the natural law which obliges all to respect the rights of all Natural RightsincludesSupplements and Observations on Pufendorf 1724 Natural Theology 1729 Logic 1722 two theses and a manuscript on teaching all in English for the first time Gershom Carmichael 16721729 was the first professor of moral philosophy at the University of Glasgow preceding Hutcheson Smith and Reid James Mooreis Professor of Political Science at Concordia University in Montreal Michael Silverthorneis Honorary University Fellow in the School of Classics at the University of Exeter Knud Haakonssenis Professor of Intellectual History and Director of the Centre for Intellectual History at the University of Sussex England *Methodical System of Universal Law* Johann Gottlieb Heineccius,2014 **The Principles of Natural and Politic Law** Jean Jacques Burlamaqui,2006 The year 1694 saw the death of Samuel Pufendorf who with Hugo Grotius was the foremost representative of the modern tradition of natural law theory and the birth of Jean Jacques Burlamaqui who helped transform the tradition and convey it to new generations As professor of natural law in Geneva Burlamaqui used Pufendorf s works on natural law but taught and wrote on the subject in the vernacular not in the traditional university Latin By making natural jurisprudence more accessible Burlamaqui helped make it part of civic education Burlamaqui intended his writings to defend a middle road between the two main rival traditions in early modern natural law theory that deriving from Leibniz and Wolff and that from Pufendorf and Barbeyrac In fact he seems closer to the former The basis of this version of *The Principles of Natural and Politic Law* is Thomas Nugent s 1763 English translation which became a standard textbook at Cambridge and at many premier American colleges including Princeton Harvard and the University of Pennsylvania The first scholarly work on Burlamaqui was written by an American M Ray Forrest Harvey who in 1937 argued that Burlamaqui was well known among America s Founding Fathers and that his writings exerted considerable influence upon the American constitutional system In his introduction Nugent said of Burlamaqui His singular beauty consists in the alliance he so carefully points out between ethics and jurisprudence religion and politics after the example of Plato and Tully and the other illustrious masters of antiquity Jean Jacques Burlamaqui 1694 1748 was a Swiss jurist His chief works are *Principes du droit naturel* *Principles of Natural Law* 1747 and *Principes du droit politique* *Principles of Political Law* 1751 Petter Korkman is a Fellow at the Helsinki Collegium for Advanced Studies and is a Postdoctoral Researcher in Philosophy at the Academy of Finland Knud Haakonssen is Professor of Intellectual History and Director of the Centre for Intellectual History at the University of Sussex England *A Treatise of the Laws of Nature* Richard Cumberland,2005 Liberty Fund published the first modern edition of *A Treatise of the Laws of Nature* based on John

Maxwell's English translation of 1727. The edition includes Maxwell's extensive notes and appendixes. It also provides for the first time in English manuscript additions by Cumberland and material from Barbeyrac's 1744 French edition and John Towers's edition of 1750. Jacket Of the Law of Nature and Nations Samuel Pufendorf, 2026-01-27 In *Of the Law of Nature and Nations* Pufendorf provided a comprehensive system of society law and government based on a theory of human nature. Eschewing contemporary theological ideas of human perfection and other worldly beatitude, he founded his natural law on the need for sociability in this world. While paying great respect to Grotius as the founder of a modern enlightened natural law, Pufendorf criticized his remaining scholasticism. Similarly, he learned from Hobbes but rejected the reduction of natural law to individual self-interest. Pufendorf wanted to transform natural law by getting rid of its metaphysical foundations but he retained its function as a moral basis for civil law and the state. *Of the Law of Nature and Nations* was Pufendorf's magnum opus. Despite its enormous size, the work was translated into nine languages. Together with the shorter textbook version *The Whole Duty of Man*, published in thirteen languages, Pufendorf's work influenced generations of students across Europe and America. Samuel Pufendorf (1632–1694) was one of the most important figures in early modern political thought. An exact contemporary of Locke and Spinoza, he transformed the natural law theories of Grotius and Hobbes, developed striking ideas of toleration and of the relationship between church and state, and wrote extensive political histories and analyses of the constitution of the German empire. Basil Kennett (1674–1715) was an antiquary translator and Anglican clergyman who led a team effort in translating Pufendorf's great work. Knud Haakonssen is Professor of Intellectual History at the University of Sussex, England. *Edmund Burke and the Natural Law* Peter James Stanlis, 2015-03-10 Today the idea of natural law as the basic ingredient in moral, legal, and political thought presents a challenge not faced for almost two hundred years. On the surface, there would appear to be little room in the contemporary world for a widespread belief in natural law. The basic philosophies of the opposition—the rationalism of the philosophes, the utilitarianism of Bentham, the materialism of Marx—appear to have made prior philosophies irrelevant. Yet these newer philosophies themselves have been overtaken by disillusionment born of conflicts between might and right. Many thoughtful people who were loyal to secular belief have become dissatisfied with the lack of normative principles and have turned once more to natural law. This first book-length study of Edmund Burke and his philosophy, originally published in 1958, explores this intellectual giant's relationship to and belief in the natural law. It has long been thought that Edmund Burke was an enemy of the natural law and was a proponent of conservative utilitarianism. Peter J. Stanlis shows that on the contrary, Burke was one of the most eloquent and profound defenders of natural law, morality, and politics in Western civilization. A philosopher in the classical tradition of Aristotle and Cicero and in the Scholastic tradition of Aquinas, Burke appealed to natural law in the political problems he encountered in American, Irish, Indian, and British affairs and in reaction to the French Revolution. This book is as relevant today as it was when it was first published and will be mandatory reading for students of philosophy, political science, law, and history.

Natural Law Theories in the Early Enlightenment T. J. Hochstrasser, 2000-09-14 This study examines the development of natural law theories in the early stages of the Enlightenment in Germany and France T J Hochstrasser investigates the influence of theories of natural law from Grotius to Kant with a comparative analysis of important intellectual innovations in ethics and political philosophy This book assesses the first histories of political thought giving insights into eighteenth century natural jurisprudence Ambitious in range and conceptually sophisticated it will be of great interest to scholars in history political thought law and philosophy
