Why is Landscape Beautiful? Lucius Burckhardt,2015-05-19 Lucius Burckhardt 1925 2003 taught architectural theory at Kassel University and in the 1980s coined the term Promenadology or the science of Strollology and developed this into a complex and far sighted

planning and design discipline Given that the landscape as an idea only exists in our heads Burckhardt's writings and drawings are not so much concerned with beautiful vistas but focus instead on the multi-faceted interaction a simple walk-taker has with his environment To those who observe the environment with their eyes wide open interesting questions will arise again and again for example why city and country can no longer be separated so easily in the face of progressive urbanization Or why we consider a viaduct to be beautiful but a nuclear power station an intrusion And also why gardens are works of art and should therefore be appraised as such This book contains 28 texts by the design and planning critic for the first time in English with the focus on landscapes gardens as an art form and the science of strollology
