Eleven Papers On Differential Equations American Mathematical Society Translations Series 2 Vol 126:

Translations. Ser. 2, 159. Proceedings of the St. Petersburg Mathematical Society. - 2 United States. Office of Naval Research, 1994-11-22 This book contains papers on a wide range of topics including diophantine equations algebraic number theory ring theory theory of functions of a real variable partial differential equations approximation of functions differential geometry computing theory and statistical mechanics The last three papers present historical perspectives on mathematics in St Petersburg **Books in Series, 1876-1949** R.R. Bowker Company, 1982 **Second Siberian Winter School "Algebra and Analysis"** Igor' Aleksandrovich Aleksandrov, Leonid A. Bokut, Leonid Arkad'evich Bokut', Yurii G. Reshetnyak, 1992 This book the second in the series of proceedings of Soviet Regional Conferences contains papers presented at the Second Siberian Winter School Algebra and Analysis held at Tomsk State University in 1989 The papers touch on a variety of topics including Lie algebras and Lie groups sheaves and automorphic forms *Singularity Theory and Some Problems of Functional Analysis* Semen Grigor'evich Gindikin, 1992 The emergence of singularity theory marks the return of mathematics to the study of the simplest analytical objects functions graphs curves surfaces The modern singularity theory for smooth mappings which is currently undergoing intensive developments can be thought of as a crossroad where the most abstract topics such as algebraic and differential geometry and topology complex analysis invariant theory and Lie group theory meet the most applied topics such as dynamical systems mathematical physics geometrical optics mathematical economics and control theory The papers in this volume include reviews of established areas as well as presentations of recent results in singularity theory The authors have paid special attention to examples and discussion of results rather than burying the ideas in formalism notation and technical details The aim is to introduce all mathematicians as well as physicists engineers and other consumers of singularity theory to the world of ideas and methods in this burgeoning area *Third Siberian School: Algebra and Analysis* Leonid Arkad'evich Bokut', Michiel Hazewinkel, Ilya Grigor'evich Reshetniak, Simeon Ivanov, 1995 Mathematical Reviews , 2003 **Ordered Sets and Lattices II** , This indispensable reference source contains a wealth of information on lattice theory The book presents a survey of virtually everything published in the fields of partially ordered sets semilattices lattices and Boolean algebras that was reviewed in Referativnyi Zhurnal Matematika from mid 1982 to the end of 1985 A continuation of a previous volume the English translation of which was published by the AMS in 1989 as volume 141 in Translations Series 2 this comprehensive work contains more than 2200 references Many of the papers covered here were originally published in virtually inaccessible places The compilation of the volume was directed by Milan Kolibiar of Comenius University at Bratislava and Lev A Skorniyakov of Moscow University Of interest to mathematicians as well as to philosophers and computer scientists in certain areas this unique compendium is a must for any mathematical library Notices of the American Mathematical Society American Mathematical Society, 1985 Contains articles of significant interest to mathematicians including reports on current mathematical research *Books in*

Series, 1980 Catalogue, Books and Journals in Advanced Mathematics American Mathematical Society, 1985 *The Collected Papers of Stephen Smale* Stephen Smale, Felipe Cucker, Roderick Wong, 2000 This invaluable book contains the collected papers of Stephen Smale These are divided into eight groups topology calculus of variations dynamics mechanics economics biology electric circuits and mathematical programming theory of computation miscellaneous In addition each group contains one or two articles by world leaders on its subject which comment on the influence of Smale's work and another article by Smale with his own retrospective views Nonlinear Evolution Equations Nina Nikolaevna Uraltseva, 1995-05-19 This collection focuses on nonlinear problems in partial differential equations Most of the papers are based on lectures presented at the seminar on partial differential equations and mathematical physics at St Petersburg University Among the topics explored are the existence and properties of solutions of various classes of nonlinear evolution equations nonlinear imbedding theorems bifurcations of solutions and equations of mathematical physics Navier Stokes type equations and the nonlinear Schrodinger equation The book will be useful to researchers and graduate students working in partial differential equations and mathematical physics Eleven Papers on Differential Equations S. A. Akhmedov, 1985 The papers in this volume like those in the previous one have been selected translated and edited from publications not otherwise translated into English under the auspices of the AMS ASL IMS Committee on Translations from Russian and Other Foreign Languages Scientific and Technical Books and Serials in Print, 1989 **Frontiers in Analysis and Probability** Nalini Anantharaman, Ashkan Nikeghbali, Michael Th. Rassias, 2020-11-21 The volume presents extensive research devoted to a broad spectrum of mathematical analysis and probability theory Subjects discussed in this Work are those treated in the so called Strasbourg Z rich Meetings These meetings occur twice yearly in each of the cities Strasbourg and Z rich venues of vibrant mathematical communication and worldwide gatherings The topical scope of the book includes the study of monochromatic random waves defined for general Riemannian manifolds notions of entropy related to a compact manifold of negative curvature interacting electrons in a random background l_p cohomology in degree one of a graph and its connections with other topics limit operators for circular ensembles polyharmonic functions for finite graphs and Markov chains the ETH Approach to Quantum Mechanics 2 dimensional quantum Yang Mills theory Gibbs measures of nonlinear Schrödinger equations interfaces in spectral asymptotics and nodal sets Contributions in this Work are composed by experts from the international community who have presented the state of the art research in the corresponding problems treated This volume is expected to be a valuable resource to both graduate students and research mathematicians working in analysis probability as well as their interconnections and applications From Particle Systems to Partial Differential Equations II Patrícia Gonçalves, Ana Jacinta Soares, 2015-04-04 This book focuses on mathematical problems concerning different applications in physics engineering chemistry and biology It covers topics ranging from interacting particle systems to partial differential equations PDEs statistical mechanics and dynamical systems The purpose of the second meeting on Particle Systems and

PDEs was to bring together renowned researchers working actively in the respective fields to discuss their topics of expertise and to present recent scientific results in both areas Further the meeting was intended to present the subject of interacting particle systems its roots in and impacts on the field of physics and its relation with PDEs to a vast and varied public including young researchers The book also includes the notes from two mini courses presented at the conference allowing readers who are less familiar with these areas of mathematics to more easily approach them The contributions will be of interest to mathematicians theoretical physicists and other researchers interested in interacting particle systems partial differential equations statistical mechanics stochastic processes kinetic theory dynamical systems and mathematical modeling aspects *Subject Guide to Books in Print* ,1997 **Complex Analysis and Dynamical Systems VI** Lawrence Zalcman,2016-05-19 This volume contains the proceedings of the Sixth International Conference on Complex Analysis and Dynamical Systems held from May 19 24 2013 in Nahariya Israel in honor of David Shoikhet s sixtieth birthday The papers range over a wide variety of topics in complex analysis quasiconformal mappings and complex dynamics Taken together the articles provide the reader with a panorama of activity in these areas drawn by a number of leading figures in the field They testify to the continued vitality of the interplay between classical and modern analysis The companion volume Contemporary Mathematics Volume 653 is devoted to partial differential equations differential geometry and radon transforms
