Step-by-Step Relief Carving David Bennett,Roger Schroeder,2003-05-01 A successful relief carving relies not just on the artist s ability to carve the wood but also on the ability to make use of light and shadow to create depth This step by step guide explores both of these key elements and uses start to finish instructions photographs and detailed captions to explain what traits make a good relief carving Also included are illustrations and exercises that reinforce the importance of light in relief practice exercises to improve carving skills and patterns for five additional relief projects [Practical Wood Carving - How to Use the Tools and Make the Designs](#) Edward Hobbs,2016-09-06 Originally published in early 1900s The illustrated contents include Materials Tools and Equipment Care and Use of Tools First Steps in Wood Carving Chip Carving Incised Work Relief Carving Pierced and Laminated Work Wood Sculpture and Knife Work Preparation of Designs etc Many of the earliest hobby and craft books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive Home Farm Books are republishing many of these classic works in affordable high quality modern editions using the original text and artwork [A Manual of Wood Carving](#) Charles Godfrey Leland,2020-09-28 Skill in wood carving as in every other art is to be attained only by thoroughness Let the pupil therefore bear in mind that he or she must be careful to master the first lessons and to go no further until these can be executed with ease and accuracy This will be greatly aided if the book is read with care and not used for mere reference Teachers will please observe that the work is in a regular series of progressive lessons the first being extremely easy and that these lessons lead so gradually one to another that the last are no harder than the first to one who has gone on carefully from the beginning This will be found to aid teaching and self instruction greatly Every item of information will be found under its proper head and not scattered here and there through different chapters for every lesson is complete in itself and from the first the pupil is taught how to produce some satisfactory work of its kind Thus indenting or stamping which can

be learned at once and grooving with a gouge which is not more difficult are capable of producing very beautiful decoration even if the worker goes no further No writer has indeed ever seriously considered what valuable and varied results may be produced by these simple processes Finally the author has endeavoured in these pages to treat wood carving not merely as a fine art whose chief aim is to produce specimens of fancy work for exhibitions and facsimiles of flowers never to be touched but also to qualify the learner for a calling and what nine tenths of all practical wood carving really consists of that is house and other large decoration and of work which is to be perhaps painted and exposed to the air There is no reason why the artist should not be prepared to undertake figure heads for ships garden gates cornices for roofs and rooms dados door panels and similar work as well as mere drawing room toys which should have no finish save the delicate touch of the cutting tool The author would observe as regards this work that he has been under very great obligation to Mr John J Holtzapffel Assoc M Inst C E whose name is so well known to all workers in wood and metal for revisions suggestions and addition of the chapter on the use of the saw in carving He is also indebted to Mr Caddy teacher of wood carving in Brighton for valuable suggestions Tools and Implements The first and most important is a strong and if possible a heavy table or bench If the pupil cannot afford this an ordinary small kitchen table must be found It should be used for carving alone as it will be necessary to bore holes and drive screws into it But if a table cannot be spared for this the pupil must make shift by putting a board at least an inch in thickness on a common table and fastening it with clamps At a more advanced stage he will carve standing up at a higher bench or with his work on a stand Pupils in wood carving shops often carve standing from the beginning
