Low-Cost Veterinary Clinical Diagnostics Ryane E. Englar, Sharon M. Dial, 2023-02-22 Low Cost Veterinary Clinical Diagnostics A practical guide to maximizing the diagnostic value of in house quick assessment tests QATs In Low Cost Veterinary Clinical

Diagnostics the authors provide a hands on resource designed to facilitate healthcare delivery across the spectrum of care Historically clinicians have been taught to apply the gold standard approach to the practice of medicine However recent advances in veterinary medical care and associated technologies have made practitioners question whether a one size fits all approach is truly best After all when we perform diagnostic tests are we testing out of the desire for completeness to cover all bases for the good of the patient Or are we testing because we are expected to The reality is that gold standard care is not always advisable and not always possible In clinical practice veterinarians frequently encounter obstacles that limit their approaches to case management Cost of care is a significant constraint that requires practitioners to rethink which diagnostic tests are essential Not every patient requires a complete blood count CBC chemistry profile urinalysis and fecal analysis to obtain diagnostic value This text suggests that the best approach to case management be determined by the situation the context the patient and the client While sophisticated panels of tests may remain the recommended approach to case management Low Cost Veterinary Clinical Diagnostics outlines entry level in house diagnostic blood urine fecal and body cavity fluid tests how to perform them as well as the breadth and depth of patient specific data that can be gleaned from quick assessment tests QATs Readers will also find A thorough introduction to patient care considerations communication strategies that facilitate cost conscious shared decision making Comprehensive explorations of quick assessment tests QATs in hematology including packed cell volume PCV total solids TS buffy coat analysis blood smears blood glucose blood urea nitrogen BUN saline agglutination tests and activated clotting time Practical discussions of quick assessment tests QATs involving urine including urine color dipstick analysis specific gravity USG and urine sediment analysis Pragmatic evaluation of fecal analysis including considerations surrounding fecal color volume consistency and odor saline smears or wet mounts and fecal flotation Discussion on body cavity fluid analysis Sample case vignettes complete with question and answer Q A Perfect for veterinary practitioners veterinary technicians veterinary and veterinary technician students Low Cost Veterinary Clinical Diagnostics offers a quick and easy reference guide to maximizing diagnostic value in those cases where care is cost prohibitive

Life Cycles of Ectoparasites in Small Animals Dunbar Gram, Heather S. Walden, Jeanmarie Short, 2021-07-08 T00:00:00+02:00 Small handbook gathering all the life cycles of the most common ectoparasites in dogs and cats Similar parasites are grouped together based on their life cycle and consequently their sensitivity to parasiticides The aim is to provide readers with key aspects of parasite control and prevention highlighting those diseases that can be transmitted by them Geographic distribution maps are also included

Ecology of Wildlife Diseases in the Neotropics Gerardo Acosta-Jamett, Andrea Chaves, 2024-03-06 This contributed volume focuses on the Neotropical region and explores the environmental ecological and socio economic components that facilitate the emergence of zoonotic diseases This book highlights the primary ecological environmental social and economic variables associated with the risk of maintenance transmission and dissemination of emerging re emerging and neglected infectious diseases in which

Neotropical vertebrates are involved It compiles up to date knowledge and research for the neotropical region as well as discusses the current needs of knowledge improvement The chapters include various examples of the cycles of infectious diseases all with world wide relevance where neotropical wild vertebrates are affected or involved **Elsevier's Veterinary Assisting Textbook** Margi Sirois, 2012-08-21 Based on NAVTA approved guidelines Elsevier's Veterinary Assisting Textbook by Margi Sirois offers comprehensive coverage of the knowledge and skills you need for a successful career in veterinary assisting You ll learn about the role of the veterinary assistant and how to perform key responsibilities of the job including assisting the veterinary technician and the veterinarian by restraining animals setting up equipment and supplies cleaning and maintaining practice and laboratory facilities and feeding and exercising patients Targeted coverage addresses only those topics that are relevant to veterinary assisting Authoritative content covers everything you need to know to pass the Approved Veterinary Assistant AVA exam and succeed in clinical practice Authors and contributors are leading experts in veterinary medicine veterinary technology and veterinary assisting Full color format features a wealth of illustrations and photographs that clarify key concepts and enhance learning *Comparative and Veterinary Pharmacology* Fiona Cunningham, Jonathan Elliott, Peter Lees, 2010-03-10 The human animal bond has evolved and diversified down the ages Dogs cats and even horses have long fulfilled the role of faithful companion and indeed as exemplified by the introduction of seeing and hearing dogs there may be a critical level of co dependency between the species In the twenty first century the animal types that are kept as pets in many parts of the world are extensive ranging from reptiles through rodents to ruminants and beyond As would be predicted by the nature of the relationship the approach to treatment of a companion animal is often closely aligned to that which would have been offered to their owner However an increasing awareness of welfare issues such as the recognition that animals experience pain and the proven benefits of disease prevention in intensive farming units together with the growth in zoos and wildlife parks has increased the likelihood of food producing and non domesticated animals receiving medicinal products during their life time Although many of the individual drugs or classes of drugs administered to animals are the same as or derived from those given to man the safe and effective use of drugs in animals often cannot be achieved by simply transposing knowledge of drug action on or behaviour in the body from one species to another The impact of the anatomical physiological and pathophysiological variability that spans the animal kingdom can often profoundly alter drug response
