**Nutrition and the Elderly** Charlotte Kenton, 1981

*The Role of Nutrition in Maintaining Health in the Nation's Elderly* Institute of Medicine, Food and Nutrition Board, Committee on Nutrition Services for Medicare Beneficiaries, 2000-06-09 Malnutrition and obesity are both common among Americans over age 65 There are also a host of other medical conditions from which older people and other Medicare beneficiaries suffer that could be improved with appropriate nutritional intervention Despite that access to a nutrition professional is very limited Do nutrition services benefit older people in terms of morbidity mortality or quality of life Which health professionals are best qualified to provide such services What would be the cost to Medicare of such services Would the cost be offset by reduced illness in this population This book addresses these questions provides recommendations for nutrition services for the elderly and considers how the coverage policy should be approached and practiced The book discusses the role of nutrition therapy in the management of a number of diseases It also examines what the elderly receive in the way of nutrition services along the continuum of care settings and addresses the areas of expertise needed by health professionals to provide appropriate nutrition services and therapy

Nutrition and Quality of Life in the Elderly Daniela Caetano Gonçalves, Gabriela Salim de Castro, 2024-06-12 The WHO estimates that by 2050 30% of the world's population will be elderly The increased life expectancy of the population coupled with falling fertility contributes to this

scenario in many countries Although the life expectancy of the population has increased the recurring concern is to ensure the quality of life of this group Some diseases are directly associated with the aging process such as sarcopenia and osteoporosis On the other hand chronic degenerative diseases such as diabetes hypertension and cancer are associated with long term inadequate health habits and therefore are more prevalent in the elderly Among the factors that contribute to a lifestyle that influences the onset of these diseases we can highlight sedentarism and poor diet quality

**Aging Process** H.J. Armbrecht,J.M. Prendergast,R.M. Coe,2012-12-06 There has been much popular and scientific interest in the fields of nu trition and aging in recent years As the importance of proper nutrition in children and young adults becomes more fully understood it is natural to wonder if proper nutrition could play a similar role in later life Recent research has indicated that nutrition can potentially intervene in the ag ing process in at least two ways First studies in animals and humans have shown that nutrition can be used to improve functional status which in turn is related to perceived quality of life Second nutritional manipu lation has been used to extend maximal life span in laboratory animals How these interesting findings apply to the human situation remains to be explored The purpose of this book is twofold The first is to present recent ad vances in our basic knowledge of how nutrition and aging interact with each other The second is to discuss some applications of this knowledge to the care of the elderly patient The interaction between aging and nutrition is complex because each may act on the other in either a synergistic or antagonistic fashion Aging may alter the nutritional status of the elderly by affecting the way nu trients are absorbed and utilized by the body Aging may also influence food intake and therefore nutritional status by decreasing the palatabil ity of food The environment of the elderly may change so they are less likely to eat well balanced meals      *Principles and Practice of Geriatric Medicine* M.S.
