Germ Killers Fighting Disease:

Germ Killers Sally Morgan, 2009-01-01 *Germ Killers Fighting Disease* looks at how science and modern medicine save millions of lives each year and at the constant battle that is waged to stay ahead of new threats to health. It explains how diseases are caused and spread and how vaccination has successfully wiped out some major killers. It explores the importance of health education and aid in combating diseases such as cholera and TB, how drugs are developed and tested, and recent outbreaks of diseases such as West Nile Fever and *Clostridium difficile*. **World's Worst Germs** Anna Claybourne, 2006 When you get ill, part of your body stops working the way it should. If you have a stomach bug, your stomach stops working properly. It cannot do its normal job of breaking down food. Find out all about germs in this title. **The Fight Against Germs** Josepha Sherman, Margaux Baum, 2016-07-15 From the dawn of history, individuals and civilizations have battled disease. The struggle shifted once epidemiologists, medical professionals, and other specialists identified the microscopic organisms often to blame for much of humanity's illnesses over time. This book examines both the history of battling disease and the ever-shifting frontlines of the modern struggle against germs, as well as possible future developments. From cutting-edge medical treatments to common sense measures to prevent and address the insidious effects of germs, measures that have changed remarkably little through the centuries, this work documents how the fight against germs helps the human race to survive and thrive. **Attack of the Superbugs** Kathiann M. Kowalski, 2005 Explains how many pathogens have evolved and become resistant to antibiotics and examines the problems this causes around the world and how scientists might overcome them. **Healers and Killers** Allison Lassieur, 2014-06-01 There are animals and plants that kill or heal, and sometimes do both. This high-interest nonfiction series includes reading experiences in five content areas: Life Science, Earth and Space Science, History, Social Studies, Technology, and Careers. It introduces grades 4-8 content area vocabulary in a medium that struggling readers can master. Read UP with 3 levels of readability. Each level set of 5 books contains a book from the five content areas so a student can keep reading in one content area if he or she prefers. **Conkey's Stock Book** Conkey, G.E. co., Cleveland, 1911 **Brain Fever: How Vaccines Prevent Meningitis And Other Killer Diseases** Richard Moxon, 2021-06-25 In *Brain Fever*, the internationally renowned medical scientist Richard Moxon FRS shares his experiences of bacterial meningitis, a fearful and devastating infection of the brain. In a clear, non-technical style, he explains what meningitis is, what causes it, who gets it, and how research has come up with vaccines that can prevent it. A paediatrician, Moxon engages the reader in a compelling story of how chance, opportunity, and passion drew him into researching the bacteria that are the dangerous assassins of unsuspecting, previously healthy people, especially young children. Moxon traces the story of his involvement as one of the extraordinary and inspiring group of scientists who pioneered a milestone in medical history: the development of vaccines to prevent bacterial meningitis. In this must-read book, *Brain Fever* provides expert insight into what it takes to develop a vaccine. As we are learning from the COVID-19 pandemic, it is vaccines that we

rely on to fight and overcome the devastation caused by virulent pathogens His message is clear and challenging no other intervention in the history of medicine confers a greater public health benefit than immunisation This book is a 2022 Nautilus Book Awards winner This book is a 2021 Best Book Award Winning Finalist sponsored by American Book Fest Related Link s

Best Laid Plans Terence E. McDonnell, 2016-08-18 We see it all the time organizations strive to persuade the public to change beliefs or behavior through expensive expansive media campaigns Designers painstakingly craft clear resonant and culturally sensitive messaging that will motivate people to buy a product support a cause vote for a candidate or take active steps to improve their health But once these campaigns leave the controlled environments of focus groups advertising agencies and stakeholder meetings to circulate the public interprets and distorts the campaigns in ways their designers never intended or dreamed In *Best Laid Plans* Terence E McDonnell explains why these attempts at mass persuasion often fail so badly McDonnell argues that these well designed campaigns are undergoing cultural entropy the process through which the intended meanings and uses of cultural objects fracture into alternative meanings new practices failed interactions and blatant disregard Using AIDS media campaigns in Accra Ghana as its central case study the book walks readers through best practice evidence based media campaigns that fall totally flat Female condoms are turned into bracelets AIDS posters become home decorations red ribbons fade into pink under the sun to name a few failures These damaging cultural misfires are not random Rather McDonnell makes the case that these disruptions are patterned widespread and inevitable indicative of a broader process of cultural entropy
