**Medieval Europe, 1200-1500** Kelly DeVries, 2024-10-28 These articles are devoted to the two main aspects of medieval warfare men and technology Men fought led and ultimately killed in war while the technology that they used facilitated these tasks The first group of essays highlights human strengths in the fighting of medieval wars with a focus on events of the 14th and 15th centuries specifically the Anglo French wars and wars against the Turks A second group addresses the technological side of warfare in particular the advent and proliferation of early gunpowder weapons which evolved rapidly during the late Middle Ages although never replacing the role of men The articles study various facets of this evolution from the increased use and effectiveness of guns in battles sieges and naval warfare to changes in their science and metallurgy surgical treatment of wounds caused by them and governmental centralization of the technology Jews and the Wine Trade in Medieval Europe Haym Soloveitchik, 2024-05-03 Although Jews were at the centre of commercial activity in medieval Europe a talmudic ban on any wine touched by a Gentile prevented them from engaging in the lucrative wine trade Wine was consumed in vast quantities in the Middle Ages and the banks of the Rhineland hosted some of the finest vineyards in northern Europe German Jews were until the thirteenth century a merchant class How could they abstain from trading in one of the region's major commodities In time they ruled that it was permissible to accept wine in payment of debt but forbade trading in it and they maintained that ban throughout the Middle Ages Further study in the twelfth century however led Talmudists to discover that Jews were only forbidden to profit from trading in Gentile wine if they dealt with idolaters but that trade with Christians and Muslims was permitted Nevertheless the German community refused to take advantage of this clear licence Using Jewish and Gentile sources this study probes the sources of this powerful taboo In describing the complex ways in which deeply held cultural values affect Jews engagement in the economy of the surrounding society this book also illustrates the law of unintended consequences how the ban on Gentile wine led both to a major Jewish contribution to German viticulture and to the involvement of Jews in moneylending with all its tragic consequences **The Rise of the Medieval World 500-1300** Jana K. Schulman, 2002-05-30 Beginning in 500 with the fusion of classical Christian and Germanic cultures and ending in 1300 with a Europe united by a desire for growth knowledge and change this volume provides basic information on the significant cultural figures of the Middle Ages It includes over 400 people whose contributions in literature religion philosophy education or politics influenced the development and culture of the Medieval world While focusing on Western European figures the book does not neglect those from Byzantium Baghdad and the Arab world who also contributed to the politics religion and culture of Western Europe Europe underwent fundamental changes during the Middle Ages It changed from a preliterate to a literate society Cities became a vital part of the economy culture and social structure The poor and serfs went to the cities The devout joined monastic orders Christianity spread throughout Europe while a man was born in Mecca who would change the shape of the religious map Islam spread throughout the Holy Land Christian piety led to the Crusades This book provides a convenient guide to those who helped shape these movements

and counter movements during this era that would pave the way for the Renaissance      *Encyclopedia of Plague and Pestilence, Fourth Edition* George Childs Kohn, 2021-11-01 Praise for the previous edition the entries provide vivid historical detail No other work approaches this topic in such a brief encyclopedic manner a useful addition to any academic reference collection Choice a useful resource for high school and public libraries Booklist does an excellent job a conscious effort to put a human perspective on pestilence Given the climate of the times and the concerns about bioterrorism this title would be useful for a variety of subject areas Recommended The Book Report Tracing the history of infectious diseases from the Philistine plague of 11th century BCE to the COVID 19 pandemic *Encyclopedia of Plague and Pestilence Fourth Edition* is a comprehensive A to Z reference offering international coverage of this timely and fascinating subject This updated volume provides concise descriptions of more than 740 epidemics listed alphabetically by location of the outbreak Each detailed entry includes when and where a particular epidemic began how and why it happened who it affected how it spread and ran its course and its outcome and significance Full color and black and white photographs maps appendixes a bibliography and a chronology are also included New and updated coverage includes Cholera Cocoliztli COVID 19 Ebola H1N1 Hepatitis A HIV AIDS Legionnaires Disease Malaria MERS Rift Valley fever Typhoid Yellow Fever Zika      Popes, Lawyers, and Infidels James Muldoon, 2015-11-10 Criticism of the way in which Europeans have treated the inhabitants of the non European world in the course of European expansion has a long history Three centuries before Christopher Columbus encountered the American Indians European intellectuals and clergymen had criticized the treatment of the peoples whom the crusaders and other Europeans met as they moved outward from the heartland of European civilization The connection between the sixteenth century Spanish writers who criticized the Spanish conquest of the Americas and medieval writers who criticized the behavior of Europeans toward the non Europeans they encountered on their borders is more familiar Yet their criticism referred back to medieval legal traditions and arguments about the rights of infidels in the face of European expansion However it is the increased recognition of the importance of this connection that has inspired much new research in the field of medieval canon law The most important theorist of what we now call race relations in the Middle Ages was Sinibaldo Fieschi a distinguished canon lawyer who became Pope Innocent IV 1243 54 whose pontificate is the starting point of this study As a working canon lawyer and pope Innocent's work provides an unusual insight into the whole development of Christian infidel relations for his work covers those who lived within Christian Europe those who were recent converts to Christianity and those who lived beyond the bounds of Christendom As pope he initiated the Mongol mission the first attempt to deal with the Mongol threat to Eastern Europe on a diplomatic level and to convert the Mongols to Christianity As a lawyer he was also the author of a commentary on the nature of a just war that became the basis for all future discussion of the rights of infidels who lived in the path of European expansion A wide knowledge of both legal theory and papal practice blended in a single career and it was this union of these two traditions that formed the intellectual background of Vitoria and

Las Casas and the eminent critics who followed them This is the first complete study of this subject based upon a careful analysis of papal and legal sources Papal sources included letters found in papal registers including the unpublished Vatican Register 62 which contains only letters dealing with the problems raised by infidel societies The legal sources include commentaries on the basic texts of canon law that bear on the status of infidels as well as legal opinions written to deal with specific problems involving Christian infidel relations Although directed to specialists and students of this period this work original in concept and exceptionally well written is sure to find a far wider audience The whole subject is important and topical too in view of the current interest in racism and race relations itself the subject of the author s Appendix

**Clash of Crowns** Mary McAuliffe,2015-06-02 Conflict between England and France was a fact of life for centuries but few realize that this conflict originated with the Vikings and their settlement of what would become Normandy In this compelling and entertaining history Mary McAuliffe takes the reader back to those dark and turbulent times when Viking descendant William the Conqueror became king of England yet as duke of Normandy remained an unwilling subject to the French crown This led to ongoing hostility between his descendants and generations of French monarchs culminating in the clash between young Philip Augustus of France and his royal English rivals most notably Richard Lionheart Mary McAuliffe colorfully provides the background and context for this clash of crowns whose outcome would shape the course of English and French history throughout the centuries that followed **Europe in the High Middle Ages** William Chester

Jordan,2004-02-24 From the Crusades to the plague this account brings to life the key moments of the High Middle Ages It was an age of hope and possibility of accomplishment and expansion Europe s High Middle Ages spanned the Crusades the building of Chartres Cathedral Dante s Inferno and Thomas Aquinas Buoyant confident creative the era seemed to be flowering into a true renaissance until the disastrous fourteenth century rained catastrophe in the form of plagues famine

and war In Europe in the High Middle Ages William Chester Jordan paints a vivid teeming landscape that captures this lost age in all its glory and complexity Here are the great popes who revived the power of the Church against the secular princes the writers and thinkers who paved the way for the Renaissance the warriors who stemmed the Islamic tide in Spain and surged into Palestine and the humbler estates those who found new hope and prosperity until the long night of the 1300s Part of the Penguin History of Europe series edited by David Cannadine The Penguin History of Europe series is one of contemporary publishing s great projects New Statesman The Medieval City State Maude Violet Clarke,1926

*Warfare, Crusade and Conquest in the Middle Ages* John France,2023-04-21 This volume brings together a series of articles by John France published over a span of more than forty years covering a number of aspects of the military and crusading history of the Middle Ages both in Europe and the Near East An interest in understanding how war worked and why informs a first group of articles ranging from Carolingian armies to the organisation of war in the 13th century The focus then turns to the Crusades the most ambitious conquests of the era with a set of studies on the First Crusade and others on the manner and conduct of warfare in the territories of the Latin East The volume also includes a major unpublished analysis co authored with Nicholas Morton of the problems faced by the local Islamic powers in the early Crusading period reminding us that an army is only as strong as its enemies permit and suggesting that the crusaders should be seen in this light

**Conrad II, 990-1039** Herwig Wolfram,2010-11-01 In this biography of the German emperor Conrad II 990 1039 internationally renowned medievalist Herwig Wolfram paints a fascinating portrait of a consummate politician set against the background of a Europe entering a new millennium Conrad was the founder of the Salian Dynasty under whose almost century long dominion Germany became the most powerful state in Western Europe He was also the first emperor of the high Middle Ages to rule the three kingdoms of Germany Italy and Burgundy Conrad s reign marked the triumph of the concept of kingdom and the zenith of what has been termed imperial grandeur He broadened the internal bases of imperial power and brought the full weight of his office to bear upon popes clerics and abbots in the pursuit of his ecclesiastical policies His astounding ability to achieve his political goals was practically unparalleled among the emperors of the High Middle Ages Wolfram sees Conrad as a politician in almost the modern sense of the word capable of exploiting the political social and economic structures of his day in order to exert his authority and marginalize his opponents The result is an intimate portrait filled with fresh insights about Conrad and his consort Gisela who as Wolfram demonstrates played an influential advisory role with her husband First published in 2000 this work demonstrates Wolfram s masterly command of the sources and the storyteller s craft making Conrad II a compelling history of an emperor and his magnificent epoch *Debating medieval Europe* Stephen Mossman,2025-06-24 Debating medieval Europe serves as an entry point for studying and teaching medieval history Rather than simply presenting foundational knowledge or introducing sources it provides the reader with frameworks for understanding the distinctive historiography of the period digging beneath the historical accounts provided by other

textbooks to expose the contested foundations of apparently settled narratives This second volume addresses the central and later Middle Ages covering the period c 1050 c 1450 The chapters cover such topics as the papacy the Empire and the German lands the British Isles the Crusades and the Latin East and incorporates the very latest epidemiological research in its presentation of the Black Death It features a highly distinguished selection of medieval historians including Graham Loud Amy Livingstone and Len Scales     **The Far-Farers** Victoria Clark,2003-01-01 The author of Why Angels Fall follows the odyssey of Thorvald an eleventh century Viking Christian who left his Icelandic homeland to make an epic journey to Jerusalem offering an intriguing study of western Christendom at a time of dramatic changes in Western Europe and the Holy Land     Medieval History Penelope Delafield Johnson,1985
